

What of The Democracy?

According to the New York World there is now for the first time in fifty years, a coherent Democratic Party which is sobered by victory and responsibility.

The way to the complete rehabilitation of the Democratic Party is now so simple that it can be lost only by blind stupidity and folly.

Very interesting; but what are the first principles? Is it the Jeffersonian doctrine to which old time Democrats are constantly appealing and concerning the meaning of which no two agree?

There is a hungry lot of Democratic politicians in these States and the names "mentioned" do not as yet promise much substantial support to the "new" Democracy.

It may be that some of these newly elected Democratic Governors—who don't count at Washington—have been sobered by responsibility and hope that the sobering influence will extend to the Democratic bosses and sub-bosses and to the Southern chairmen of committees, but that is only a hope.

The Republican Party is bound to accept as its policy the scheme of President Taft, which means an end to "general revisions" by committees of Congress.

That is not the Democratic idea at all. Be as sober as they may, the Democratic proposition is a "tariff for revenue only"—a tariff, that is to say, that will look to revenue as the first object and without regard to protection.

So it is seen that even Mr. Foss, who is held up as a representative leader of the "coherent" and "emancipated" Democratic Party, wants, above everything else, to plunge the country immediately into another general revision—and under the auspices of a Democratic Ways and Means Committee headed by a Southern Democrat.

The country either wishes this thing done or it doesn't. It will make up its mind at the election of 1912, when a Republican or Democratic President will be elected.
