Special Washington Letter.

Washington, Feb. 1.—Representative D. R. Anthony. of Kansas, states that the farmers of Kansas, who in the campaign of last fall were so enthusiastic over the so called "progressive Republicanism" of the LaFollette school of politics are regaining their senses and returning to the Republican party. The Kansas farmers like the farmers of many other states, were fooled by the charge of insurgent candidates on the stump that the Republican party was controlled by "the system" or the "interests" and that something should be done to save the country. To accomplish this they voted against Republican candidates. Mr. Anthony says that the farmers of his state now are of the opinion that a "progressive Republican" is "a delusion and a snare." It is highly probable that the farmers of the every other state who deserted the Republican party last fall soon will be deeply impressed with the folly of their course. Champ Clark's Democratic Ways and Means Committee already is at work preparing a Democratic tariff bill, which the Democratic House in the next Congress eagerly will pass. Then the farmer who voted against the Re-Republican party last November will realize just what the Democratic vic tory meant to him. Champ Clark's Democratic tariff bill will be the sort of tariff bill passed during the second administration of President Cleveland, which proved the most destructive tariff measure ever enacted by Con-

Through Republican tariff legislation the prosperity of the farmer has been astounding. In the Payne law the farming interests received everything they asked in the way of protective duties on agricultural products. Now the agricultural schedule will be revised along sure enough Democratic lines. . It will propose revision that the famers of the country have insisted would be reinous.

The Clark bill may or may not become a law. If it does not that will be due entirely to those senators who remain loyal to Republican principle They may succeed in preventing the enactment of the legislation the farmers fear. With the downfall of the Republican party, if that should ever happen, there would be more gloom and adversity in the homes of the farmers of this country than the farmers can imagine.

#### TOLD IN PANTOMIME.

The Worth of a Chinese Royal Gift to

Li Hung Chang.
The late empress dowager of China
was something of a humorist. The author of "Behind the Scenes In Peking" tells a story of how Li Hung Chang, after concluding the treaty of Shimonoseki, was presented by the empress with a cloth of gold bag con-taining some heavy article. The treasure turned out to be a large vase, and Li, who was an enthusiastic collector of Chinese ceramics, at once sent for his secretary, Mr. Pethick, to come

and examine the new acquisition.

Some time was spent in a careful examination to determine the dynasty during which this treasure was produced, but the date of this especial paste was lost, with its other technical classifications. After a long time Mr. Pethick lifted it gingerly, placed it on a table, put himself in front of it. drawing a wrap round his shoulders, and slowly, very slowly, held his hands up to it, turning them in the attitude of warming at a fire.

Chinese need few words. Li under-stood and was heartbroken. The pantomime indicated to him that the supposed priceless vase was only a clever reproduction made in Paris, and the secretary, warming his hands before it, meant it was so fresh from the pottery furnace that he could still notice the warmth.

#### FOOD AND DIGESTION.

Civilized Man Needs Cheerful Sur-

roundings at His Meals. Robust people so long as they get what suits their own uncultivated taste are apt to make very light of what they call "fancies" about food and overlook their real importance Feeding on the part of civilized man is not the simple procedure which it is with animals, although many animals are particular as to their food and what is called "dainty." The ne-cessity for civilized man of cheerful company at his meal and for the absence of mental anxiety is universally recognized, as well as the importance of an inviting appeal to the appetite through the sense of smell and of sight, while the injurious effect of the reverse conditions, which may lead to nausea and even vomiting, is admitted

Even the ceremonial features of the dinner table, the change of clothes. the leisurely yet precise succession of approved and expected dishes, accompanied by pleasant talk and light hearted companionship, are shown be strict scientific examination to be im portant aids in the healthy digestio of food, which need not be large in quantity because wisely presented. Sir Ray Lankester in London Telegraph.

#### Why Spiders Fight.

When two spiders fight there is generally a good reason for the attack and the vigorous defense that follows It is not generally known that after certain time spiders become inca pable of spinning a web from lack of material. The glutinous excretion from which the slender threads are spun is limited; therefore spiders cannot keep on constructing new snare when the old ones are destroyed. But they can avail themselves of the web producing powers of their younger neighbors, and this they do without As soon as a spider's web constructing material has become exhausted and its last web destroyed it sets out in search of another home, and unless it should chance to find one that is tenantless a battle usually ensues, which ends only with the retreat or death of the invader or defender.

#### A Pretty Compliment.

His incessant work, his avoidance of all rest and recreation and his rigorous self denial made Joseph Pulitzer in his days in harness the despair of his family.

In this connection a pretty story is told about the famous journalist's son Ralph. Mr. Pulitzer had refused to take a holiday, and Mrs. Pulitzer ex-

An Exclusive Lassie.

Grandma—Why don't you play with that little girl across the street, Nettie? I'm sure she's a nice girl. Nettie (aged six)—But, grandma, you surely don't want me to play with a girl who lives in a frame house! I only play with brownstone front girls.-Chi-

#### Making Insurance Maps.

In making insurance maps certain features are considered essential, and the growth of the system has proved their wisdom and clanged them only as regards the amount of detail that has been incorporated. Of first importance were the colors to show the different materials used in the construct tion of a building. Naturally red seemed a proper color to signify brick and yellow to signify wood. colors have always been employed for these materials. Other colors have been added from time to time, thus blue for stone, gray for iron, etc.

In fixing signs and characters for such details as stairways, fire escapes, dumb waiter shafts, etc., a principal object was to make them plain They must be easily understood by an underwriter without ref-erence to my key or marginal foot-

This object has been carried out. with the result that when these insurance maps are examined by an insur-ance man today each sign or character has such an individuality of its own that it can be easily distinguished and is not confused with another. Cassier's Magazine.

#### The Word "Fudge."

"Fudge" is a word with a history. There are prosaic etymologists, as there always are, who derive it from a Gaelic word meaning deception, but Isaac Disraeli's view is much more interesting. He derives it from a certain Captain Fudge, who seems to have been a marine Munchausen. "You fudge it" is said to have been his crew's equivalent to the modern "Rats!" In a collection of some papers of William Crouch, the Quaker, published in 1712 it is recorded that one Degory Marshall informed Crouch that "in the year 1664 we were sentenced for banishment to Jamaica by Judges Hyde and Twisden, and our number was fifty-five. We were put on board the ship Black Eagle. The master's name was Fudge, by some called Lying Fudge."—London Stand-

#### The Leipzig Book Fair.

Leipzig is the largest publication center in the world. More books and pe riodicals are printed there than any where else, and more people are engaged in making and using printers' supplies than in London, New York, Berlin or Paris. Many of the orders for these publications come from England, France, Austria and other countries because the mechanical work can be done in Leipzig much cheaper than More than half of the transactions in books take place at the Leipzig book fair, which occurs every year at the jubilate, the first week in Easter, when booksellers and publishers from all parts of Germany assemble to compare and balance accounts and to make contracts for the next year.

#### A Bawbee From Carlyle.

I used to see Carlyle when I lived as a child in Chelsea. I regarded him with extraordinary aversion and fear One day I was sent to post a letter. I suppose I was older, though uncon scious, as always, of anything ahead. I cannoned into Carlyle. The impact laid me flat on the pavement, where I yelled for some minutes, though soothed eventually by England's great thinker. And then—this is the point of the story—Carlyle dived into his pockets, produced a halfpenny and said kindly, "Here is a bawbee for Bobby." I have the halfpenny to this day. When Mr. Carlyle died I was put into deep mourning. He was the first and perhaps the most interesting of all my street acquaintances.—Robert Ross in London Bystander.

#### Self Reliance.

The spirit of self help is the root of all genuine growth in the individual, and, exhibited in the lives of many, it constitutes the true source of national vigor and strength. Help from without is often enfeebling in its effects, but help from within invariably invis orates. Whatever is done for men or classes to a certain extent takes away the stimulus and necessity of doing for themselves, and where men are subjected to overguidance and overgovern-ment the inevitable tendency is to render them comparatively helpless.-Samuel Smiles.

## One Thing She Could Do For Him.

frail little man started to cross Broadall sorts of fast moving vehicles were whirling their matinee patrons up Broadway. At the same instant a very fleshy lady started from the curb directly opposite with the same purpose in mind

By remarkable luck both succeeded in escaping the passing wheels; but, as fate-would have it, the little man, whose eyes were busy ogling the traf-fic on either side of him, darted plump into the oncoming woman at the mid-dle of the street. The result was a sickening collision, with the little man down and out.

"You should have looked where you were going," said the fleshy woman, bending over the victim on the curb, to which he had been carried by a traffic policeman. "But is there any thing I can do for you?"

"Yes," he replied faintly, opening is eyes a moment. "Get the number of the automobile that struck me."-Lippincott's.

#### Holy Lands of All Religions.

Christians call Palestine the Holy Land because it was the birthplace of the Christian religion on earth as well as that of the Saviour, whose birth, ministry and death are inseparably associated with the history of Jeru salem and vicinity. To the Mohammedans Mecca, in Arabia, is the holy land, it being the birthplace of Mo hammed, the saviour of the followers of that faith.

India is the holy land of the Chinese and other oriental Buddhists, it being the native land of Sakya Nuni, the supreme Buddha. Elis, one of the several divisions of the ancient Pelo ponnesus, was the Mecca and the Jerusalem of the ancient Greeks. The temple of Olympus Zeus was situated at Elis, and the sacred festivals were held there each year. With Achaia it is at present a part of Greece. The believers in the Sinto religion make annual pilgrimage to Sitsa Kara, the immense stone pillar where their su preme ruler last stood while talking to men.-New York World.

Sealing a Mine.
The brilliancy of the clear autumn night was dimming in the first faint light of the dawn when the work of sealing the shafts began. Up into the cloudless sky, through the tangled stee work of the tipple, a tall tower of black smoke 300 feet high poured up into the still air and faded into the dawn. In two hours the black pits were covered, first with a layer of rails, and then on this was laid a solid bed of concrete, and two hours later only a few thin wisps of smoke that poured up through cracks along the edges of the great seal, like steam beneath the lid of a teakettle, told or the inferno that was seething in the mine 400 feet below. With the air cut off and the shaft sealed the fire could live only so long as sufficient oxygen remained to feed the flames.—Atlantic

risky uncertainty in one night stands is the super. In smaller places he works until 6 o'clock in the evening, peacefully partakes of his supper and presents himself at the stage door at 7. which the olive groves around Damascus are guarded by official watchmen to prevent the trees being stripped by thieves. But on a certain date the gov some magistrate issues a proclamation warning all owners of olive trees that they must pick their fruit, for after a certain date it be-comes public property. If a farmer has his crop only half gathered when that date arrives the public will gather it for him.
