

ANTHROPOMETRIC LIGHT

DUKE IS TO GOVERN CANADA

It is officially announced that the duke of Connaught will succeed Earl Grey in September as governor general of Canada. He will hold the appointment for two years and that period may be extended.

The announcement that the duke of Connaught will be the next governor general of the Dominion was received in Ottawa with great satisfaction. Aside from his general popularity throughout the empire, it is felt that the presence of so distinguished a member of the royal family at Ottawa will give the capital more political and social importance than it ever has had.

The duke of Connaught is the only surviving brother of the late King Edward. He is sixty years of age, a field marshal in the British army and was a personal aid de camp to the late king, who desired that he receive his present appointment. This is not his first trip to Canada, as he served in the Fenian raid of 1870. He is grand master of the Free Masons of England. Besides the title by which he is commonly known he is the Earl of Sussex, a prince of the United Kingdom and of Saxe-Coburg and Gotha, and duke of Saxony. His wife was Princess Louisa Margaret of Prussia.

Various reports have been current from time to time, particularly from Canadian sources, that the duke of Connaught would not be the next governor general of Canada, although on the original announcement of his appointment, shortly after the death of King Edward, it was officially stated that it had been the wish of the late king that the duke of Connaught, his brother, should go to Canada as governor general.

FOE OF CHILDHOOD'S ENEMY

In the laboratories of the Rockefeller Institute, near New York, Dr. Simon Flexner and his corps of assistants believe they are about to conquer that dread disease of childhood, infantile paralysis, now epidemic in several parts of the United States. Hundreds of monkeys are giving their lives every year to the aid of science in conquering this dread disease, the monkey being the only animals in all the list of those suitable for experimentation that they have succeeded in inoculating with the disease. The microorganism of the disease has been isolated and an early announcement is expected that a preventive, curative and safe serum has been discovered. Infantile paralysis, or anterior poliomyelitis, as it is known to the medical profession, has long baffled medical science. Ordinarily it attacks children between the ages of 1½ and 3 years, but older children and adults are not immune. Although the death rate is not so high as in cerebrospinal meningitis, the train of permanent deformities which follow infantile paralysis makes the disease fully as much dreaded. Only about four or five per cent. of those attacked succumb, but fully 80 per cent. of the cases result in permanent paralysis.

Infantile paralysis is a comparatively new disease. Its symptoms have been described in medical literature for about 25 years, but only in the last four years, since the epidemic of 1907, has it been brought strongly to the attention of the profession in America.

ADVOCATES GOOD HIGHWAYS

W. Page, director of the United States office of public roads and president of the new American Association for Highway Improvement, asserts that the United States suffers a direct loss of \$40,000,000 annually on account of incorrect and inadequate methods in the construction, maintenance and administration of public roads.

This enormous loss is nothing compared with the indirect loss, through excessive cost of transportation, which is caused by the burden which bad roads impose upon the farmers and others who use the highways, and this amount, according to Mr. Page's report, reaches the impressive total of \$250,000,000 every year.

The American farmer is paying two or three times as much to get his products to market as the man who tills the ground in Europe, and this added cost of transportation is known to be an important factor in the high cost of living problem. Road experts say conditions here and abroad are almost exactly reversed, due entirely to bad roads.

Director Page has described the condition of the roads of the United States in making an announcement that the American Association for Highway Improvement has opened offices in Washington. The organization of this association followed a conference of many of the leading road engineers of the country, the presidents of five of the largest railroad systems and representatives of automobile manufacturers and publishing interests.

SUCCEEDS SENATOR BURROWS

Perhaps because of his own personality as well as because he is the successor of the old veteran, Julius Caesar Burrows, in the United States senate, Charles E. Townsend is regarded as a figure of considerable importance in national affairs.

When insurgency broke out in the house of representatives against the rule of Speaker Cannon, Townsend, who had been elected to congress in 1903, became one of its promoters and supporters. His name was even mentioned as that of an available candidate against Uncle Joe. Then in the summer of last year he began a state-wide campaign in Michigan to strip the senatorial toga from the back of Uncle Julius, who was a veteran in the house of representatives when Townsend was a student and who already wore the toga when Townsend was a plodding lawyer in Jackson county, with never a dream perhaps of future legislative honors.

Senator Burrows was beaten in the election of Mr. Townsend to the Senate and is fifty-four years old.

SHIRE HORSE ESSENTIALLY ENGLISH FARMERS' OWN

Animal Has Improved Vastly in Recent Years, in Uniformity of Type, in Feet, Action, Pasterns and Quality of Hair and Bone.

English Shire Mare and Colt.

(By G. T. BARROWS, England.)

The Shire horse is essentially the English farmer's own. Across the border the Clydesdale holds sway. It is flattering to the English breeder to know that America and Canada are now taking more Shires than they have ever done before.

England today is being constantly scoured by American buyers for the right kind of Shire horses.

The English Shire horse has improved vastly of recent years, in uniformity of type, in feet, action and has vastly better pasterns and quality of hair and bone.

The farmer's brood mare—the rent payer—is a real feminine type, namely, neither of the gelding or the stallion appearance. She is always mated to a stallion of great masculinity, possessing good, wide, strong feet, and is naturally a free mover, with flat, sound bone, of strong constitution and as big as possible.

In the large studs the greatest care is taken over the matter of suitable stallions selected. Very few traveling stallions are to be found without a veterinary surgeon's certificate of soundness.

If anything, some of the farmers who have found breeding a rapid means of acquiring wealth, are inclined to get quality at the expense of weight and substance. Shows are the best advertisement that the English tenant-farmer has for getting rid of his wares to the landlord or the rich breeder.

Shows in an English summer are as plentiful as sparrows. They are held upon the slightest provocation, where two or three horse breeders are gathered together.

One of the most gratifying features of the Shire horse breeding in the old country, is that the rich man settles in the locality, or suddenly becomes prominent as a breeder of first-class animals. He spends no end of money on buying and maturing.

These often fall into the hands of the farmer cheaply, and very often the farmer sells back their offspring at considerable prices.

Shire service is cheap in England, when one considers the enormous outlay of some of the breeders, and the tenant farmer, or the farmer whose land is only rented, has all the benefits of his rich proprietor's patronage.

The old country may have old-fashioned ways, but the farmer knows when he is well off and he knows that to raise Shire horses successfully is to have a bank balance and to have no haunting fears from a disastrous season.

HORSE SHOEING IS SCIENCE

No Man Is Fully Equipped for Task Unless He Understands Anatomy of Animal's Foot—Advance Being Made.

By WM. J. KELLY.

Formerly the ordinary blacksmith, who knew very little about the underlying principles that should govern horse shoeing, was called upon to shoe horses. As a result very much of the work done was inferior and such work reacted in many instances against the usefulness of the horse that was thus shod.

The advance that has been made in this branch of blacksmithing during recent years, has been very great.

The work of shoeing horses is so variable in its requirements that no small degree of skill is required on the part of those engaged in the business.

It would perhaps be correct to say that no horse shoer is fully equipped for his work who does not understand considerable about the anatomy of the horse's foot. He should also be able to detect defects in the animal's locomotion and should know how to shoe

the horse in such a way that the evils arising from these defects will be lessened or overcome entirely.

Neighborhood Exchanges.

The difficulty of exchanging tools and labor with neighbors is in the personality. Some men will expect to use borrowed tools all through the favorable weather and then return them in a damaged condition too late to be of much use to the owner. In borrowing labor this kind of neighbor will work the hired man half to death and then in returning the labor spend half his time telling stories. In exchanging labor or anything else pick out a farmer who will practice the golden rule.

New Mint Region.

Peppermint growers of New York and Michigan will meet competition from the reclaimed lands of Louisiana. A distillation plant is also in operation. A party of expert agriculturists recently inspecting the region were convinced that the crop can be grown in limited quantities at a good profit. Peppermint oil was imported into the United States during the fiscal year to the extent of 1,238 pounds, worth \$6,416, while the exports of American peppermint oil amounted to 161,811 pounds, worth \$288,318.

HER TROUBLE.

She—How's your wife?
He—Her head troubles her a good deal.
She—Neuralgia?
He—No; she wants a new hat.

CURED HER BABY OF ECZEMA

"I can't tell in words how happy the word 'Cuticura' sounds to me, for it cured my baby of itching, torturing eczema. It first came when she was between three and four weeks old, appearing on her head. I used everything imaginable and had one doctor's bill after another, but nothing cured it. Then the eczema broke out so badly behind her ear that I really thought her ear would come off. For months I doctored it but to no avail. Then it began at her nose and her eyes were nothing but sores. I had to keep her in a dark room for two weeks. The doctor did no good, so I stopped him coming.

"For about two weeks I had used Cuticura Soap for her every day, then I got a box of Cuticura Ointment and began to use that. In a week there was a marked improvement. In all I used two cakes of Cuticura Soap and one box of Cuticura Ointment and my baby was cured of the sores. This was last November; now her hair is growing out nicely and she has not a scar on her. I can not praise Cuticura enough, I can take my child anywhere and people are amazed to see her without a sore. From the time she was four weeks old until she was three years she was never without the terrible eruption, but now, thanks to Cuticura, I have a well child." (Signed) Mrs. H. E. Householder, 2004 Wilhelm St., Baltimore, Md., May 10, 1910.

Runs on the Bank of England.

Even the Bank of England has not been entirely free from runs nor from the necessity of saving itself by strategy. In 1745, for instance, it was forced to employ agents to present notes, which were paid as slowly as possible in sixpences, the cash being immediately brought in by another door and paid in again, while anxious holders of notes vainly tried to secure attention. In 1825 too only the accidental discovery of 700,000 £1 notes saved the bank from stopping payment.—London Chronicle.

USE ALLEN'S FOOT-EASE

The salnt who says he cannot sin may be an earnest man, but it is wisest to trust some other man with the funds of the church.

Don't worry about your complexion—take Garfield Tea, the blood purifier.

It sometimes happens that the black sheep of a family is a blonde.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

An undertaker knows a lot of "dead ones" that he is unable to bury.

Garfield Tea has brought good health to thousands! Unequaled for constipation.

Many men enjoy a dry smoke. Why not a dry drink?

FILES CURED IN 6 TO 14 DAYS. Your druggist will refund money if PAIN OINTMENT fails to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days. 50c.

Angelfood cakes seldom make boys angelic.

Constipation is an avoidable misery—take Garfield Tea, Nature's Herb Laxative.

Misery is the affinity of company.

PRACTICAL ARCHED ROOF BARN

The accompanying plan of arched roof will not need any bracing, providing it is built on a wood frame. If placed on a concrete wall it would need to be fastened to the wall in some manner. This arch could be made out of one-inch lumber, three ply thick, using eight pieces. These will be a trifle shorter than eight feet. Cut outside to circle of 20 feet radius. It will be a little stronger by leaving inside straight. These should be

placed about two feet centers. Nail on outlook like shown on plan for cornice. You can make them out of two-inch by eight-inch the same length, which takes a little more lumber, and we do not consider they would be as strong.

It would be better to use a 3 by 8 inch or a 3 by 6 inch bolted on to underside of ridge to fasten track to, as this would bring the load on two or three rafters.

Dr. Pierce's Favorite Prescription

Is the best of all medicines for the cure of diseases, disorders and weaknesses peculiar to women. It is the only preparation of its kind devised by a regularly graduated physician—an experienced and skilled specialist in the diseases of women.

It is a safe medicine in any condition of the system. THE ONE REMEDY which contains no alcohol and no injurious habit-forming drugs and which creates no craving for such stimulants.

THE ONE REMEDY so good that its makers are not afraid to print its every ingredient on each outside bottle-wrapper and attest to the truthfulness of the same under oath.

It is sold by medicine dealers everywhere, and any dealer who hasn't it can get it. Don't take a substitute of unknown composition for this medicine of known composition. No counterfeit is as good as the genuine and the druggist who says something else is "just as good as Dr. Pierce's" is either mistaken or is trying to deceive you for his own selfish benefit. Such a man is not to be trusted. He is trifling with your most priceless possession—your health—may be your life itself. See that you get what you ask for.

A Country School for Girls in New York City

Best Features of Country and City Life. Out-of-door Sports on School Park of 35 acres near the Hudson River. Full Academic Course from Primary Class to Graduation. Upper Class for Advanced Special Students, Music and Art. Certificate admits to College. School Coach Meets Day Pupils. Miss Bangs and Miss Whiton, Riverdale Ave., near 252d St., West

Kow-Kure
is not a "food"—it is a medicine, and the only medicine in the world for cows only. Made for the cow and, as its name indicates, a cow cure. Boreness, retained afterbirth, abortion, scour, oedema, and all similar affections positively and quickly cured. No one who keeps cows, whether many or few, can afford to be without "Kow-Kure." It is made especially to keep cows healthy. Our book "What to Do When Your Cows Are Sick," sent free. Ask your local dealer for "Kow-Kure," or send to the manufacturers, Dairy Association Co., Lyndeville, Vt.

The Bad Effects of CONSTIPATION

Impure blood, offensive breath, heavy head, shortness of breath, bilious attacks, fitful sleep, loss of appetite, feverish conditions, all come from one cause—Constipation.

The Good Effects of BEECHAM'S PILLS

remedy these conditions because they remove the cause. They start the bowels, work the liver, sweeten the breath, cleanse the blood, tone the stomach, clear the head, improve the appetite and bring restful sleep. The oldest and best corrective medicine before the public is Beecham's Pills.

DR. J. D. KELLOGG'S ASTHMA

Remedy for the prompt relief of Asthma and Hay Fever. Ask your druggist for it. Write for FREE SAMPLE. NORTHROP & LYMAN CO. LTD., BUFFALO, N.Y.
