Hospital Fighters.

Into a hospital came two men with battered faces. "Street fight?" said the surgeon in

charge. It was. Under the doctor's directions orderlies moved beds and patients around until the newcomers separated the length of the ward.

"In this case that precaution may not be necessary," he said. "but after a street brawl it very often is. Before we learned the peculiarities of those people it happened more than once that two men who were mortal enemies were brought in and laid out side by side. Each saw his advantage and was foxy enough to keep still until both were left alone in adjoining cots; then they sailed into each other tooth and nail, trying to finish the job that had been interrupted in the street. Once or twice they nearly succeeded. Now chance patients with pugilistic tendencies are placed so far apart that a neighborly interchange of uppercuts is out of the question .- New York Press.

JOHNSON & MCNARNEY, Att'ys for Plffs.

The Word "Chap."

"Chap" is simply an abbreviation of chapman, the merchant of former days, and is derived from the Anglo-Saxon "ceap," a bargain. The word almost brings before us the loud voiced "cheap Jack" as he cries his wares in the cheaping or market. Chap seems to have come into common use at the end of the sixteenth century and is rarely mentioned in books before 1700. Johnson does not recognize it, though Steele uses it in 1712 in the Spectator ("If you want to sell, here is hap"), and it is found in Balley's Dictionary, 1731. Its original meaning of a buyer or seller still lingers in the dialects of many counties. Coupled with the adjectives old, young, little, poor, it was and is used in familiar language, as is its relative, a queer "customer." Todd, 1818, affirms that a good chap meant one to whom credit might be given, whereas not qualified by good it was a term of contempt.-London Standard.

A Mighty Appetite.

A Mighty Appetite. We eat, but we no longer stuff. The great stuffers of the past are dead. What of that seventeenth century Kentish man Nicholas Wood, for ex-ample, who would eat a whole hog at a sitting and follow it up the next day with thirty decay placens? Without with thirty dozen pigeons? Withal this possessor of a "Kentish stomach" was a sportsman. As proof of this there is that record of his challenge to Taylor, the water poet, to "eat at one time as much black pudding as would reach across the Thames at any place to be fixed by Taylor himself between London and Richmond." Well might old Fuller moralize over that appetite of Wood's. "Let us raise our gratitude," he said, "to the goodness of God, especially when he giveth us appetite enough for our meat and yet meat too much for our appetite."-Westminster Gazette.

The "Tea Leafer." A good deat of the tea consumed by the working classes in the days when Arthur Young complained of the addiction to this luxury had never seen either India or China. In one of John Ashton's works on England he cites : case in which a boy charged with gambling stated that the money found in his possession had been made by picking tea leaves. This led to the discovery that many persons made a living by picking sloe leaves and white-thorn leaves in the fields near Camberwell and selling them to a local cow keeper for a penny a pound. One man said he picked from fifty to sixty pounds a day and always found a market for them. The leaves were subse quently sold to a wholesale merchant. who obtained as much as 8 shillings a pound for them under the guise of tea. The merchant was prosecuted and fined, not for adulteration, but for defrauding the revenue. And the "tea leafer" is still the slang name for the petty thief.-London Standard.

Whims of Parrots. "It is odd," said the bird store keeper, "but it is true, how people come into a bird store and expect to open up a conversation with a parrot offhand. They fail and then make up their mind that the parrot is worthless. This will apply to a majority of seekers after a talking parrot. They do not give the bird credit for the sense it actually possesses. There are parrots valued at anywhere from \$50 to \$500 that will not be coaxed into conversa-tion with a stranger nor while he is present, although they are the very best of talkers. Parrots often refuse to perform when there are purchasers looking on, but once the store is clear of them they will chatter away through their whole vocabulary as if their very lives depended on their being heard This obstinacy often spoils good saies. Most parrots will talk to a girl or wo-man much quicker and freer than to a boy or a man."-Browning's Monthly,

Ostriches and Their Eggs. A singular thing about ostriches is the way they bring up their babies. To begin with, there are a good many

eggs in the nest (dug out of the hot sand), but the eggs were laid by different mothers. Ostriches do not lay eggs every day, and, being far apart, they would not hatch together. When the nest is prepared, therefore, all the ladies in the neighborhood are invited to contribute an egg apiece, the hostess returning the favor in due time. Ostrich eggs are delicious. One weighs three pounds, or is equal to a dozen of a hen's. They are very convenient, too, for the hunters in the

desert. They not only furnish a delightful meal, but a dish to cook in. The shell is hard and thick, and the egg is set on the fire, a hole is broken in the top, it is stirred with a stick, and when it is done the saucepan es as a dish as well.-New York Tribune.

The Name of Rio de Janeiro. Rio de Janeiro owes her name to the accident of a date and the mistake of her discovery. When Alphonso de Souza, the Portuguese navigator, found himself in the spacious bay he imagin-ed he had found the mouth of a noble river, and because the day happened to be the 1st of January, 1531, he named the supposed river after the first month of the year. The name was not applied to the city that grew up on the slopes of the hills till many years afterward, but San Sebastian, the original name, is now almost for gotten. Rio as a city purchases the beauty of her site at the cost of health. for the giant ridges that form the beautiful background to the town shut out the breezes that might blow tropical nuisances harmlessly to sea.-London Spectator.

The Moss Troopers.

Moss troopers was the name given to the desperate plunderers and robbers who secreted themselves throughout the sixteenth and seventeenth centuries in the "mosses" on the borders of Scotland. These outlaws were largely made up of deserters and crim-inals from the armies of England and the continent, and their depredations and cruelties were the terror of the region infested by them. Many severe laws were passed against them, but they were not fairly extirpated until the eighteenth century.
