

PROMINENT PEOPLE

MEXICO'S WEALTHIEST MAN

Not unlike the mighty estates of the old patoons, who used to own tremendous tracts of land around New York and whose sway was more powerful than that of the most puissant feudal baron in Europe, is that of Gen. Don Luis Terrazas, "boss" of the state of Chihuahua, owner of more than half the land included within its wide boundaries and the richest man in Mexico. His wealth is estimated at not less than \$25,000,000 gold and many estimate it much higher.

Terrazas is of interest at this time, for many people are saying that he and his son-in-law, Enrique Creel, are responsible for the rebellion in Mexico. Gen. Don Luis Terrazas has lived all his life in Chihuahua. His parents were small landowners before the invasion of Mexico by the French. When Mexico began to try for freedom from the foreign invaders Terrazas, then a young man without influence, starting with a small body of

vallant followers, built up a force sufficient to drive the French out of the northern part of Mexico. Later when the French were defeated in the south and the empire overthrown with the death of Maximilian, Terrazas took charge of the portion of Mexico now comprised by the state of Chihuahua. Later came Diaz, and Terrazas lent his aid in subduing and forming the republic, receiving his reward "to have and to hold" the state of Chihuahua. Nominally he was elected governor. Really he was made the boss of the state, and while he has not held office as governor continually he has dictated the election of every one who has been chosen and mostly the mantle has fallen on the shoulders of some member of his own family. Therein lies the cause of the present rebellion. Citizens of Chihuahua who have taken up arms against the present government feel that Terrazas and his clan have gabbled Chihuahua; that they can only live there now as peons; and that those in power are growing richer and richer every day, while the common people are growing poorer and poorer.

Short of stature, weazened and wrinkled, with his short, white beard and his Mexican cowboy dress, he walks the streets of Chihuahua today in spite of his seventy-eight years, calmly collecting his 12 per cent, and apparently unadvised that there is a rebellion in his realm which threatens to strip him of the power he has wielded for more than 30 years.

PASTOR TO HAVE BIG CHURCH

Rev. Charles F. Aked, who talked seriously of resigning the pastorate of the Fifth Avenue Baptist church—the Rockefeller church—in New York City because of the supposed failure of a pretentious building project on which he had set his heart, seems to have won his point. As a result Gotham is likely to have the greatest church on modern institutional lines in the world.

John D. Rockefeller has a plan under consideration for presenting his Fifty-fourth street home and his adjoining realty holdings as a site for the new home of the congregation. The trustees of the Fifth Avenue church have for three years been looking for a suitable site on which to build a church such as Dr. Aked desires, but the committee in charge failed to make a selection. Mr. Rockefeller has recently purchased a number of plots surrounding his home and it is believed that he is rounding out his holdings so that they may become available for the new church site if the trustees fail to find one more suitable.

The Rockefeller house, though very large, is not strictly modern, and the owner prefers his Pocantico hills estate. It is understood that he will give up his city residence if the church trustees accept certain offers he is formulating. The plan of Mr. Rockefeller and Dr. Aked, it is said, is to make the new church the greatest and most influential institution of its kind in the world.

MEMBER OF COMMERCE COURT

The successor in the interstate commerce commission of Martin Knapp, who was recently appointed to the new commerce court, is Prof. Balthuser Henry Meyer, one of the most prominent educators in the country and an authority of note on political economy and sociology.

Professor Meyer is a native of Wisconsin, a graduate of the University of Wisconsin and the University of Berlin, and has been an educator since 1884, when he taught a district school in his native state. He has been a member of the Wisconsin railway commission and the new federal railway security investigating commission and has written many important articles on railway legislation and administration and other economic subjects.

The professor also served as expert special agent for the bureau of the census and interstate commerce commission.

WOULD SAVE ROADS BIG SUM

No man has been more in the public eye of late than Louis D. Brandeis, who not long ago declared that the railways could save \$1,000,000 a day by proper and efficient management. Mr. Brandeis first came into prominence in 1903, when as the head of the Public Franchise league of Boston he was involved in the struggle over the reorganization of the Boston gas companies. Largely through his influence legislation was put through which permitted the unification of the gas companies on a unique principle. The total capitalization of the new company was made the same as that of the valuation of the securities of the consolidated companies. The price of gas was set at 90 cents a thousand feet. On that basis the company was allowed to pay seven per cent. on its stock and one per cent. extra for every reduction of five cents a thousand feet in the price of gas. The plan worked successfully.

Mr. Brandeis next became prominently known through his share in enabling the savings banks of Massachusetts to write industrial insurance.

SHORTHORNS POSSESS MANY EXCELLENT DAIRY QUALITIES

English Breeder Developed Milk Producing Strain and His Cows Were Well Known All Over England for Their Superiority.

From the very origin of the breed Shorthorns have had two qualities to commend them to favorable consideration, and it is this dual capacity of beef and milk production that has made them so popular with farmers and stockmen. As beef producers Shorthorns are "known of all men," but their dairy qualities, though excellent when properly developed, are not so generally understood. The early history of the breed furnishes many instances of cows that were great milk producers, says the North-western Agriculturist.

One of the earliest breeders to develop milk production in his herd was Jonas Whittaker, and, as a result, his cows were known all over England for their excellent dairy

beef form and soon became the four-foot head from which other breeders drew their herd bulls; yet Mr. Bates was careful to cultivate the milking qualities of his herd, and in consequence, had cows that give from 24 to 34 quarts of milk per day. So persistently did he impress this in his herd of cows that many of their descendants proved excellent milkers many generations after Mr. Bates' herd was dispersed. Hence the prevailing opinion that Shorthorn cows of exceptional dairy qualities should be sought among those carrying an infusion of Bates blood has a foundation in fact; yet there are exceptions and some notable ones.

Amos Cruikshank, who drew the attention of the beef producing world

A Prize Winning Youngster.

qualities. Even in the herds of the Booths, where beef form and fleshing quality was the first consideration, cows of heavy milk production were developed. Sir Charles Knightley had a tribe known as the Knightley Fillpails that did much to establish the fame of Shorthorn cows as excellent at the pail. The herd of Thomas Bates was established about the year 1800 and soon became the most noted in England.

This herd was carefully bred for

to the excellence of the Scotch Shorthorns, where the wonderful fleshing qualities he had bred into his herd, was not unmindful of the dairy qualities of his cows, and in that maverick herd of beef cattle were many matrons quite good at the pail.

The large dairies that supply milk for London are composed quite largely, and in some cases exclusively, of Shorthorn cows. This is also true in part of dairies in New York and New England.

WATER FOR DAIRY COWS

Important That the Three or More Gallons Given to Animals Daily be Warmed to About 6 Degrees F.

It is very important that the water drunk by the cows giving three or more gallons of milk daily be warmed to about 60 degrees F. Otherwise the cows will not drink as much as they need to keep up a good milk flow. It does not take much ice water to chill a thin-fleshed cow through and through on a cold winter day, especially when she is compelled to walk some distance through the snow or a cutting wind to get to the tank or pond. Experiments made at the Missouri state experimental station show that drinking water is needed in proportion to the milk yield. That is, a cow giving six gallons of milk a day needs about twice as much water as a cow giving three gallons a day. If the wa-

ter is too cold to be comfortable if drunk in large quantities, the cow will not drink enough, and as a result, will drop considerably in her milk yield. When Missouri Chief Josephine was giving about 100 pounds of milk each day last winter she drank daily about 31 gallons of water. Imagine how she would have suffered if that had been ice water. It was warmed, however, and Josephine did not chill after drinking.

Green Feeding Worth While.

If the best results are to be obtained with poultry they must be furnished plenty of green feed, is a statement so often heard that its repetition seems silly; yet there are flocks on fairly prosperous farms where one would think the practice of regular green feeding had never been heard of.

Conditions for Live Stock.

If you are in doubt as to the conditions you should give your live stock in the barn-yard, imagine yourself in the animals' place.

CARE FOR FARROWING SOWS

To produce strong, healthy pigs, they must be looked after before they are born. The sow must be cared for and fed properly if she is to give birth to a good litter of pigs. As a rule, the sow is neglected during this period, the owner seeming to think that the application of care and feed after she has farrowed is all that is required. We should know that a poorly nourished mother means a poorly, sickly litter of pigs.

The question of shelter is an important one, whether in the northern or southern states, although in the south

—the far south especially—very little shelter except at farrowing time is needed. At farrowing time the mother should always be supplied with a building that will afford shelter from the rain and the wind for both the mother and the pigs until the pigs become dry. If the wind strikes the young pigs when they are first born they will often chill to death. Each farmer can make his own shelter, to be in keeping with his surroundings, but probably the best and most economical building that can be made is a portable hoghouse.

WEAK BACKS MADE STRONG.

Backache in most cases is kidney-ache, and usually accompanied by irregularities of the urine. To remove the pain and weakness, you must cure the kidneys. Do so with Doan's Kidney Pills.

Mrs. Rosa Weismann, 1927 Greenwood Terrace, Chicago, Ill., says: "So intense were the rheumatic pains in my back, I felt like screaming. They gradually became more severe until they ran all over my body. I could not sleep and could hardly move. I steadily grew worse until I could scarcely open or close my hands. No relief was obtained until I began using Doan's Kidney Pills. Soon I felt better and ere long the pain left."

Remember the name—Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Exhorting the Ducks.

There are two tiny boys in this town whose mother sings often to them at their request, and as she is an ardent church woman, the children hear as many hymns as anything else. The other day they were playing with their wooden ducks in the bathtub, and strangely enough the ducks were more inclined to float sideways than in the approved manner. After several attempts to keep the misguided ducks straight the older boy shouted: "Stand up, duck, stand up!" Then two-year-old, noting the familiar phrase, leaned over the tub and exorted. "Tand up, duck! Tand up for Jesus!"

Warned.

A serious-minded New Yorker, who, because of his dignified outlook on life, has sent his son, aged twelve, to a particularly strict and proper boarding school in New England, unexpectedly visited the school last week. Ascertaining the location of his young hopeful's room, he climbed the four flights of stairs necessary to reach it—and entered. On a mammoth engraving of "Washington and Generals" (presented to the youth as a Christmas gift by his admiring parent) was the cheerful saluting: "Don't spit on the ceiling. We have lost our ladder."

Her Wedding March.

A young girl who had never heard of Mendelssohn's "Wedding March," but was familiar with the more popular parody on it, was a witness to a wedding ceremony in an uptown church recently. As the betrothed pair walked with dignified tread toward the altar to be wed and the organ pealed forth Mendelssohn's inspiring march, the young girl was plainly shocked. When she arrived at her home she told her mother of the ceremony and innocently exclaimed: "What do you think, mother, they played 'Gee Whiz! I'm glad I'm Free.'"

Domestic Amenities.

Father—I think the baby looks like you. Mother—Yes, it shuts its eyes to an awful lot.

A man who thinks his work is worth dollars a minute will spend an hour looking for a dime he dropped in a room.

EDITOR BROWNE

Of The Rockford Morning Star.

"About seven years ago I ceased drinking coffee to give your Postum a trial.

"I had suffered acutely from various forms of indigestion and my stomach had become so disordered as to repel almost every sort of substantial food. My general health was bad. At close intervals I would suffer severe attacks which confined me in bed for a week or more. Soon after changing from coffee to Postum the indigestion ceased abated, and in a short time ceased entirely. I have continued the daily use of your excellent Food Drink and assure you most cordially that I am indebted to you for the relief it has brought me.

"Wishing you a continued success, I am Yours very truly,
J. Stanley Browne,
Managing Editor."

Of course, when a man's health shows he can stand coffee without trouble, let him drink it, but most highly organized brain-workers simply cannot.

The drugs natural to the coffee berry affect the stomach and other organs and thence to the complex nervous system, throwing it out of balance and producing disorders in various parts of the body. Keep up this daily poisoning and serious disease generally supervenes. So when man or woman finds that coffee is a smooth but deadly enemy and health is of any value at all, there is but one road—quit.

It is easy to find out if coffee be the cause of the troubles, for if left off 10 days and Postum be used in its place and the sick and diseased conditions begin to disappear, the proof is unanswerable.

Postum is not good if made by short boiling. It must be boiled full 15 minutes after boiling begins, when the crisp flay and the food elements are brought out of the grains and the beverage is ready to fulfil its mission of palatable comfort and renewing the cells and nerve centers broken down by coffee.

"There's a Reason."
Get the little book, "The Road to Well-Being," in pigs.

Ever read the above letter? A new sensation from time to time. The one genuine, true, and full of human interest.

The Place to Buy Cheap

S-DROPS

CURES

RHEUMATISM

LUMBAGO, SCIATICA

NEURALGIA and

KIDNEY TROUBLE

FREE

DR. S. D. BLAND

Of Brown, Ga., writes:

"I had been a sufferer for a number of years with Lumbago and Sciatica in my arms and legs, and tried all the remedies that I could gather from medical works, and also consulted with a number of the best physicians, but found nothing that gave the relief obtained from 'S-DROPS.' I shall prescribe it in my practice for rheumatism and kindred diseases."

FREE

If you are suffering with Rheumatism, Neuralgia, Kidney Trouble or any kindred disease, write to me for a trial bottle of "S-DROPS," and test it yourself.

"S-DROPS" can be used any length of time without acquiring a "Drug Habit," as it is entirely free of opium, cocaine, alcohol, laudanum, and other similar ingredients.

Large Size Bottle, "S-DROPS" (500 Doses) \$1.00. For Sale by Druggists.

SWANSON RHEUMATIC CURE COMPANY, Dept. 20, 140 Lake Street, Chicago.

How's Business?

THIS ad. is directed at the man who has all the business in his line in this community.

- Mr. Merchant—You say you've got it all. You're selling them all they'll buy, anyhow. But at the same time you would like more business.
- Make this community buy more.
- Advertise strongly, consistently, judiciously.
- Suppose you can buy a lot of washtubs cheap; advertise a big washtub sale in this paper. Put in an inviting picture of a washtub where people can see it the minute they look at your ad. Talk strong on washtubs. And you'll find every woman in this vicinity who has been getting along with a rickety washtub for years and years will buy a new one from you.
- That's creative business power.

OUR AD. RATES ARE RIGHT —CALL ON US

Word-of-Mouth Advertising

Passing encomiums, only over your store counter, about the quality of what you've got to sell, results in about as much satisfaction as your wife would get if you gave her a box of cigars for Christmas.

Advertising in This Paper

talks to everybody at once and makes them talk back with money.

\$ Aim the \$ Ad. Gun TRUE

It's hot weather, advertise cool things, Mr. Merchant. When it's cold, boost warmth. You know what people want; when they want 'em.

Profit thereby. Send your copy today for your ad in this paper.
