THINGS WORTH KNOWING.

ECONOMY IN COAL .- As the wintry weather is with us once again, and fires are necessary to domestic comfort, a few hints condensed from a diffuse scientific a ticle, will be found of interest. Some Louise-Leepers, in the management of their fires, seem to suppose that an addition of fuel will insure increased combustion, and ally that he has made a great reduction in develop additional heat. Coal, and especially authracite coal, should always be farnished with a sufficient amount of oxygen to keep the fire bright. It is only smothering and retarding the fire to put in a thick layer of coat, as some do, filling the fire-box from a layer of two inches on a fire at one time than will readily ignite and give off a pure white blaze-not a blue flame which denotes also the presence of unconsumed gases-and the fire should be undisturbed on the top. An- Chains of all kinds, Shovels, Spaces, Scythes & CO., Boston, Mass. other point of coal economy: in clearing and Snaths, Rakes, Forks, Sleigh Bells, the grate in the morning there is a quantity Shoe Lasts, Pegs, Wax Bristles, Clothes ty of unburned coal, which has been ex- Wringers, Grind Stones, Patent Molasses It is often dumped into the ash box. By past, ng on enough saltpeter any feion can be cured in forty-eight hours, and pain

will cease almost immediately. Coal Oil for Rivermatism -I wish to inquire if your renders are aware what a valuable remedy the common coal oil is in the matter cases? I have been using considerable of it lately, and have found amagar unmediate relief from it. It is surprising how supple and free from pain der some of our old still backs suffering fluin all sorts of "cricks," and and weights of divers scores of years. So very variable a remody deserves to be more generally known, as its cheapness and abundance renders it generally accesmable Care should be exercised in using at night before lamp or fire light, as it sometimes explodes. - Co.
