LOCAL CORRESPONDENCE.

JOHNSTOWN, Nov. 26, 1867.

Dear Freeman—The wife of our town-

man, Mr. John Brady, met with a painful

and serious accident on Tuesday last.

She had started up stairs with the youngest

child in her arms, and when about half way

to the landing, she missed her footing, and

falling backwards, fractured one of her

limbs just below the knee, and also sprained

her ankle. Fortunately she succeeded in

preserving the child from injury. Medical

aid was promptly summoned and the

broken limb properly adjusted, but owing to the serious

nature of her injuries she is now lying in

critical condition. This is a severe

affliction to Mr. Brady's family, and it

is rendered more poignant by the fact

that he himself has been suffering from

a fractured limb ever since the

terrible accident at the station in this

place, last September a year, from which

he had only sufficiently recovered to

enable him to visit his relatives on the

mountain on the morning of the day his

wife was so severely injured.

A man named Russell, a resident of

Johnstown, met with a severe injury

on Saturday last. A portion of the

machinery at which he was at work

at that place, struck him with such

force as to fell him to the earth.

Medical attendance was soon

procured, and we learn that Mr. Hagg

is recovering. The accident occurred

at a saw mill, a mile or two from

Johnstown.

COMMUNICATIONS.

CARROLL TWP., Nov. 26, 1867.

To the Editor of the Freeman—I regret

that you lent the columns of your paper

to certain A. D. Criste for the purpose

of singling me out as one of the Board

of Poor House Directors, and as a medium

of personal hostility to any man

living, having endeavored to live at

peace with all men, and having

conscientiously discharged my duty, as

Poor Director, I am quite at a loss

to conceive why I should be singled

out from the whole Board as the object

of personal abuse. Let me say a few

words in reply: In the first place, let

me assure you that I have no objection

to know every transaction that

occurred at the Poor House since I

have been a member of the Board. And

the records will show, and I appeal

to them, that no other Director

has drawn less from the public

treasury than I have, during the year

that I have been a member.

It is false, then, in the first place,

that the Board of Johnstown at my

instance. It was proposed by my

senior, and every senior turned

home. Instead of singling and

feeling action, the balance, even

under the pressure of the lightest

mainspring, vibrates with a

wide and free motion, and the

beat has the clear ringing sound

always characteristic of the

Waltham Watch. The machine is

a timekeeper for the start.

This system of watchmaking is

unknown in England, and is entirely

original with the Waltham

Company. The Company claim

AMERICAN WALTHAM WATCHES.

The true value of Machinery applied to

Watch-making is not that by its use

Watches are made rapidly, but that

they are made correctly. Very few

people know a Waltham Watch

is superior to any other. In the

first place, at Waltham the Watch is

regarded as a machine, to be

constructed with infinite diversity

of form and function expressly for

the purpose, to produce the

finished pieces. By means of

multiplying gages and microscopes,

tests and inspection for the

detection of wear in the cutting

tools, and for faults and flaws in

steel and stone are made to

accompany the watch in every

stage from beginning to end.

As a necessary result, the watch

goes together or perfect machine.

Every part is found to fit

properly in its place. Every pin

is pushed to its place, and every

spring is turned home. Instead of

singling and feeling action, the

balance, even under the pressure

of the lightest mainspring, vibrates

with a wide and free motion, and

the beat has the clear ringing

sound always characteristic of

the Waltham Watch. The machine

is a timekeeper for the start.
