Hans Patrick C. Connor, formerly known by the nom de plume of "Beau Hacket," contributed the following to the S: Louis Home Journal:

Never insure your life for the benefit of your wife for a greater sum than ten thousand dollars. A widow with more money D. W. HARSHBERGER & CO. than that is a dangerous legacy to leave

The "game of life" is very like a game of cards. Time deals, death cuts, and everybody is waiting for the last trump. I think men drink in crowds because they are afraid to drink by themselves. It requires a good deal of courage to t nd up alone and pour a glass of whiskey down your throat.

There are some inconsistencies in this world that I don't exactly understand. Everybody is anxious to go to heaven, but nobody is in a hurry about it.

If a man is without enemies I would not give ten cents for all his friends .-The man who can please everybody hasn't got sense enough to displease anybody.

When an acquaintance says, "How are you?" and rushes by you without pausing for a reply, I wouldn't, if I was in your place, follow him more than a m le to t li him I was well.

A convenient way of testing the affections of your intended, is to marry another woman. If she don't love you, you will find it out immediately.

Do unto other men as they would like enough money in two weeks to hire a shirt washed.

The song "Dear Mother, I've Come Home to Die," always struck me as a happy illustration of American assurance. Our young go abroad to spend the hard earnings of the old folks, and when they are dead-broke, retorn home to be buried at the express of their impoverished pa-

A REMARKABLE INVENTION .- It is statel that a German glass-maker has lately made a remarkable discovery. He has invented a telecope, or magnifying glass, by meens of which the most intricate nerves and vessels inside of the body may be seen from the ou side. In fact, the whole arrangement and action of the intaior organs may, by means of this glass, be distinguished.

The discovery will probably be of immense benefit to mankind, as by means of it the pl ysician will be able to determine with unvarying accuracy, the nature of any particular disease, and the proper m: n ier for treating the same.

The name of the inventor, who will probably realize a large fortune from his discovery, is Gotlieb Juntz. He is very poor, but a well read and highly intelligent man. He has an aged mother, an invalid wif, six ch'ldren, and a blind sister, all dependent upon him for support. His mother was well acquainted with the poet Goethe, and it was probably her many anecdotes of this illustrious person which fi st inspired her son with a desire to do something to win the respect and esteem

The glass he has made will probably place him among the first rank of inventors, and win him the esteem of whole nations.

By means of this invention he has already nearly cured his wife. Six months ago a well known doctor said she could not live, and pronounced her disease to be an affection of the heart.

Juntz, however, has now proven to him with the aid of the wonderful microscope that he was entirely mistaken; the stomach alone being the part affected. We are eagerly looking for further information regarding Juntz and his won-

derful glass.
