THE FIRST GOLD MINE. -The first piece of gold found in the United States is said to have been found in Cabaras County, North Carolina, in 1799. It seems from the account furnished Mr, Wheeler by Colonel Burnbandt, that a boy named Conrad Reed went with his sister and younger brother, to a small stream called Meadow Creek, on Sunday, and while engaged along the bank shooting fish he saw a yellow substance shining in the water, which he picked up, and found to be metal. His father carried it to Concord, and showed it to William Atkinson, the silversmith of the town, who was unable to tell what it was. It was taken home by Mr. Reed, and being about the size of a small shoo'. ing-iron, it was used as a weight against the door to keep it from shutting. In 1802 he carried it to market at Fayetteville, where the jeweller pronounced it gold, and melted it, producing a bar six or eight inches long. It was sold to the jeweller for three hundred and fifty dollars, a "big price," as Mr. Reed thought. Upon subsequent examination, gold was found along the surface on Meadow Creek, and in 1803 a piece of gold was found in the stream that weighed twentyeight pounds. Several other pieces were found, varying from sixteen pounds to the smallest particles. The vein of this mine was discover-
