Cours -Corns are of two kinds, veges The National Democratic and table and animal. Vegetable corn grows in rows, and animal corn grows on toes. There are several kinds of corn ; there is nnicorn, capricorn, corn-dodgers, field corn, and toe cora, which is the corn you tion, and of civil government to the American feel most. It is said, I believe, that people. gophers like corn, but a person having porns does not like to "go far," if he can the States by their citizens. help it. Corns have kernels, and many colonels have corns. Vegetable corn grows on ears, but animal corn grows on the feet, at the other end of the body. Another kind of corn is acorn; these grow on oaks, but there is no hoax about the corn? The acorn is a corn with an indefinite article, but the toe corn is a very definite article indeed. Try it and see. Many a man, when he has a corn, he wishes it was an acorn. Folks that have corns, sometimes send for a doctor, and ment bonds, and other public securities. (Re if the doctor himself is corned, he won't newed cheering and cries of "read it again.") doctors say that corus are produced by tight hoots or shoes, which is probably tight boots or shoes, which is probably bondholder. (Great cheering and cries of the reason why when a man is tight they say he is corned. If a farmer manages 6. Economy in the administration of the well, he can get a good deal of corn on government; the reduction of the standing one acre, but I know of a farmer that army and pavy ; the abolition of the Freedhas one corn that makes the biggest acher men's Bureau (great cheering.) and all politica on his farm. The bigger crop of vege-table corn a man raises the better he litetable corn a man raises the better he likes discontinuance of inquisitorial assessing and it, but the bigger crop of animal corn he collecting internal revenue, so that the burden raises the better he don't like it. Another of texation may be equalized and lessened, the kind of corn is corn-dedger. The way it made good , the repeat of all exactments for is made is very simple, and is made as enrolling the State militia into national forces follows (that is if you want to know): You go along a street and meet a man that you know has corns, and is a rough character ; then you step on the toe that as will, without imparing the revenue, impose has the corn on it, and see if you won't have occasion to dodge. In that way country. you will find out what a corn-dodger is.

MEATAL ECCENTRICITIES .- In cases of mental disease persons have wholly forgotten acquired languages, and reverted to their native tongue; on the other hand, it is recorded that Dr. Johnson, when he was dving, attempted in vain to repeat the Lord's prayer in English, but did so in Latin. In the same manner certain events will slip out of the memory altogether. Dr. Prichard tells us an anecdote which proves that the brain sometimes stands still for years upon the invasion of disease, and when the attack has passed can take up the recollection of an action just at the point at which it had left off. A farmer known in history and by its frauds and monopo of New England, whilst enclosing a piece of land, happened, when he had finished his day's work, to put the beetle and wedges which he had used for splitting the timber in the hollow of a tree. That night he was seized with a mental attack which prostrated his mind for many years. | amid the ruins of liberty and the scattered frag-At length, however, his senses were suddenly restored, when the first question he asked was whether his sons had brought in the beetle. They replied that they have belonged to the several States, and have could not find it, fearful of bringing back a recurrence of the attack ; upon which the old man got up, went straight to the hollow tree, and brought back the wedges and the ring of the beetle, the wood work itself having rotted away.
