

THE FREEMAN.

THURSDAY, JAN. 28, 1869.

LOCAL AND PERSONAL.

Fresh No. 1 Oysters, in cans, constantly for sale by M. L. Oatman.

The entire number of militia enrolled in this county during the year 1868 is put down at 2,416.

Several boys were arrested in Tyrone last week and sent to jail, charged with pilfering from a store in that place.

A lad at Hemlock, this county, while coasting down a steep hill, on Friday last ran against a large log and sustained considerable injury.

We have no contributions to our "Yonth's Department" this week. Answers to Enigma and Charade given in our last will be published in our next issue.

The attention of Supervisors and School Directors is invited to the notice published elsewhere in our paper over the signature of the County Commissioners.

A turkey weighing twenty-four and a half pounds, and measuring five feet from point of beak to tip of tail, was recently shot near Newry, Blair county.

David Fisher, repair foreman on the Pa. R. R. at Wilmore, jumped from an engine while in motion, on Tuesday last week, and was pretty severely injured.

A lad named Myers died in Shirley township, Huntington county, from that dreadful disease, hydrophobia, on the 12th inst. He had been bitten by a rabid cat about a month previous.

Hon. D. J. Marvel gave a reception to the Senator elect, Hon. John A. Scott, and to the members of Congress from this State, in Washington, on Thursday last. It is said to have been a very brilliant affair.

Dr. H. B. Miller, of Altoona, whom we know to be a competent dentist, and clever gentleman, makes a most liberal offer to persons from a distance getting work done by him. See his card.

Mrs. Isaac Cornelius, of Cass township, Huntington county, presented her husband with a Christmas present in the shape of three bouncing babies. It is well known, perhaps, for Mr. C. that "Christmas comes but once a year."

James Powell, of Falls River, Mass., fell from a passenger train near New Florence, a few nights since, and was struck by a freight train, which fractured the cap of one of his knees and tore much of the flesh from his leg. He was taken to the Westmoreland Poor House.

Mrs. Catharine Hoover, of Allegheny Furnace, Blair county, has been suffering with a pain in her foot for the past six years, but recently the pain ascended her leg, and she was surprised to find, a few days since, a long cantharid needle imbedded in the flesh, with the barb protruding.

The news of the murder in Indiana, reported to have been murdered in Indiana county, was John, not Robert, and he is not dead, but still breath. He was not assaulted and beaten, but he either fell, a horse kicked him, somebody struck him, or something else happened to him, and that is all that is known about the whole affair.

The officers and publishers of the Greensburg Democrat have been presented for libel by A. M. Bower, of Irvine. They entered bail in \$100 each for their appearance at the hearing of the case on yesterday. When will people learn the utter folly of prosecuting newspaper men for what they conceive to be libellous?

At the annual election of the Cambria County Fire Insurance Co., held on the 11th inst. the following gentlemen were chosen Directors for the current year: J. M. Moore, E. Barker, J. Crawford, G. M. Reade, A. A. Barker, Jno. Williams, W. Kittell, R. H. Tudor, Jno. Lloyd, E. J. Mills, R. L. Johnston, and Henry Walters.

At an election of the E & C. R. R. Co., held on the 11th inst., the following officers were elected for the ensuing year: President, A. A. Barker; Directors, E. Barker, Henry Foster, James Myers, Jno. Williams, Geo. J. Rodgers, E. W. Evans, Richard Jones, Tho. Griffith, Abel Lloyd, H. J. Lombart, Geo. M. Reade, and Jas. A. Moore.

The Old Follies heretofore, with their wives, sweethearts, and other lady friends, indulged in a most suspicious repeat at their lodge room, on Friday night last. The way is said to have been carried into Turkey with a perfect vengeance, and the whole affair is represented as having been replete with delicious edibles and pleasant enjoyment. Odd fellows, however, not to invite the printers.

A girl named Brown, from Ashland county, Ohio, but who has resided near Williamsburg, Blair county, was recently taken to the Poor House, and the officer who accompanied her alleges that she was the snake protrude its head several inches from her mouth no less than five times while on the way, and in each instance choking fire was the result. Several citizens of Williamsburg testify to like facts.

Rev. G. Christoph, for the past seven years or so pastor of the St. Benedict's congregation, Carrolltown, has been called to assume the duties of pastor at St. Vincent's Academy, near Latrobe, and Thursday last took his departure for the scene of his future labors. His clergy friends here were fully and cordially informed of the duties of pastor, and no people has ever more heartily loved or highly esteemed their spiritual director than have the members of St. Benedict's church loved and esteemed Father Christoph.

The weather has been very moderate for some time, and the snow has nearly all disappeared. This is pleasing to a few persons who were afraid of being stayed by a young politician who caused so much coldness here in November by going into business.

As a Democrat of the "New Block" I might submit some new political theories for your consideration. I am not afraid of uttering your opinions by a "nonsensical article."

A movement is on foot here to organize a society of Good Templars, and it is thought the project will be successful.

Rev. J. D. Lardman, of Altoona, who has canvassed the State in the Temperance cause, delivered a lecture on that subject to a large audience, in the Lutheran church here on last (Saturday) evening. He closed his address by many allusions and closed us of having two many allusions and went so far as to caution us against loving Portugal.

Our worthy representative paid us a flying visit on last Saturday. Seems to bear his new honors meekly.

The agent and employees of the P. B. R. Co., are now doing business in the new depot, which is accorded to be as fine a one as there is east of Pittsburgh.

For an indefinite period I reluctantly close on account of nothing to say.

CHIEF, &c.

THE EMBURG FEMALE SEMINARY.—Rev. B. M. Kerr, A. M., Principal, will open the next session of five months, or twenty weeks, on Monday, February 8th, 1869. Terms, per scholar, one-half in advance, \$16, \$20 and \$25, according to grade.

Local Correspondence.

ALTOONA CITY, Jan. 25, 1869.

Friend Mas.—On Thursday night last occurred one of the most terrific fires that ever happened in this city. The large and commodious freight car shop belonging to the Pa. R. R. Co.—a building erected in the form of an L, one wing being about 600 feet and the other about 400 feet long by some 75 or 80 feet wide—was set on fire by some fender in human shape, between the hours of 11 and 12 o'clock on the night in question, and within its contents was totally destroyed. At the time of the fire there were in the shop twelve or fifteen new cars, worth some eight hundred or a thousand dollars each, besides seven other cars laden with merchandise, bacon, lard, leather, coal and sand. These cars and all they contained, together with the lumber and the machinery contained in the building, were also consumed, while several buildings adjacent, belonging to other parties, were more or less injured. The Company's loss is estimated at \$100,000.—They have offered a reward of \$1,000 for the arrest of the miscreant who communicated the fire, and the city authorities have offered an additional reward of \$500 for the arrest and conviction of any one guilty of incendiarism within the corporate limits. As is usual on such occasions here, there is considerable pilfering and stealing going on in other parts of the city while the fire was raging. One lady lost a valuable sewing machine, and several others who had not taken the precaution to secure their doors found themselves victims having, besides, butter and other articles on the following morning. The fire department, as usual, were promptly on the scene, and worked with a will and determination worthy of all praise. The citizens in the vicinity of the conflagration are in a great measure indebted to the brave and gallant firemen for the preservation of their properties.

On Thursday evening some one of the light-fingered gentry obtained an entrance by the back way into the spring room of Mrs. McClellan, but finding there was little of value excepting portions of a dress pattern lying around loose, he confiscated it and a considerable quantity of dress trimmings, besides a small sum of money which he found in a drawer, and then made his exit by the way he had entered.

The late "Altoona Vindicator," by way of amusement, no doubt, pitches into the City Council with a perfect looseness, for not being as Democratic as he could desire. I think the editor is presuming too far on the gullibility of the dose he gave them in the matter, and followed as good Democratic doctrine. It is true the majority of the Council are Democrats, but they are none the less men of integrity and independence, who know their rights and their duties, and dare maintain the one and perform the other without fear, favor or affection. When sworn into office they were to know no party or sect, or to do anything incompatible with the best interests of the entire city. Their first duty was to elect a "Vindicator," and for that purpose two legal gentlemen were named. One of these was known to the majority of Council as a man of enlarged views and great legal abilities. The other may be his peer in all respects, but he was not so well known, consequently the one that was known to be competent was chosen to fill the position. And that this was right even the "Vindicator" man should be willing to admit, as his own case will bear it out. He has not identified himself with any party, and few men possess a better legal record or more gentlemanly attributes. That the present incumbent is a Democrat and a gentleman is beyond question, but the editor is wrong when he says that the Council should launch into a fury over the fact that the Council has seen fit to stop the pay of an incompetent official. Nor does it argue very much for his intelligence when he says that the Council has the power to stop the pay of an officer. Any man with common sense who has ever read the charter cannot for a moment doubt that Council possesses that very power. But the "Vindicator" man, with his eyes and accents wild, exclaims that the city is in the hands of the Philistines or Republicans. Rather a left-handed compliment to his Honor the Mayor, who has general supervision over all our municipal affairs. The Council, being the first elected under the city charter, had much to contend with, but I think they have done a great deal towards bringing order out of chaos. It is possible, however, that they may be able to do more, and I trust that the approval of the "Vindicator" man could not be considered, if the occasion required it, show much good that the present Council has accomplished, and if the "Vindicator" man could only advise the present and prosperity of our new city will be assured.—The innocuous of the "Vindicator" contain other things which I shall pass by for the present. It is nearly always safe to pleasure the fault in any way with the Democratic organ of the city, and I trust shall never have occasion to do so again.

Quite a sensation was created among the "Vindicator" men by the fact that the Philadelphia Sunday Mercury over the non-deplume of "Allen." Old Lord, but it did cause a rattling among the dry bones. Bowie knives and pistols were greedily in vogue with those who saw the "Vindicator" man, and they had their names associated with the white trash were not a little indignant at the insult.

Yours, &c., T. I. M.

WILMORE, Jan. 25, 1869.

Dear Freeman.—Was hoping to have something new for you this week, but as yet nothing has occurred. Everybody seems to be sleeping—waiting on the returning spring to rouse their dormant energies.

Business, also, has been very dull, except the bark business, which in every form seems to flourish.

The weather has been very moderate for some time, and the snow has nearly all disappeared. This is pleasing to a few persons who were afraid of being stayed by a young politician who caused so much coldness here in November by going into business.

As a Democrat of the "New Block" I might submit some new political theories for your consideration. I am not afraid of uttering your opinions by a "nonsensical article."

A movement is on foot here to organize a society of Good Templars, and it is thought the project will be successful.

Rev. J. D. Lardman, of Altoona, who has canvassed the State in the Temperance cause, delivered a lecture on that subject to a large audience, in the Lutheran church here on last (Saturday) evening. He closed his address by many allusions and closed us of having two many allusions and went so far as to caution us against loving Portugal.

Our worthy representative paid us a flying visit on last Saturday. Seems to bear his new honors meekly.

The agent and employees of the P. B. R. Co., are now doing business in the new depot, which is accorded to be as fine a one as there is east of Pittsburgh.

For an indefinite period I reluctantly close on account of nothing to say.

CHIEF, &c.

THE EMBURG FEMALE SEMINARY.—Rev. B. M. Kerr, A. M., Principal, will open the next session of five months, or twenty weeks, on Monday, February 8th, 1869. Terms, per scholar, one-half in advance, \$16, \$20 and \$25, according to grade.

PRIMEVAL POLITICS.

BY PERCIVAL V. BABY, JR.

Major Editor.—I have been reading of leekshures made by scientific men on Primeval Flora and Fauna, and on Primeval Kenosha, but the subject of primeval politics remains untouched yet. So I guess I had better touch that ere subject just a little. Scientific men prove that the world into which we live is a hundred thousand years old. They prove this by the compound eye in the trilobite, an animal found down into the paleozoic formation. That ere animal was made to see, for it has eyes; therefore their must be binocular vision. It's a hundred thousand years old; therefore their must of bin water and light a hundred thousand years ago.

We drop the fillosity and take up the politics. The word trilobite means three fold, so that this animal so denoted was a paster and folder. Et so, we can trace paster and folders back onto the second geological formation. This ez the first instance on record of paster and folders, but the remains is very numerous.

The next instance of paster and folder ez found onto the beaver, which has a fat tale made up purpose to paster and fold. It's a wicker worm, and built many dams, for which reason it ez reckoned that they were a crewel wicked rasc. Both these species is now extinct, except the beaver, but another species has sprung up at Harrisburg that is akin to the old trilobite, which ez minutely proved. Examining it or their eyes, they are found to be made for light, and tho' not a water animal, yet examining the retina of their eyes it is found that greenbacks ez distinctly reflected. They ar numerous, true, and breed fast, like the old trilobite. Whether this species breeds in Louisiana old mill-dam, on Paxton creek, or ez a good question for antiquarians. Our Leekshure doctor investigates the matter, and they seem to breed very numerously. No doubt thousands of years after this sum geologist will dig up the organic remains of these pesky critters, and speculate onto their origin. Ez their eyes ar as good as the eye of the paleozoic trilobite no doubt the greenback will still be visible onto their eyes. Gen. Grant, not being a scientific man, is merrily on this subject, but he thinks the matter is that large others who fit for their country ought to git theirs. Yours, in the wool, N. J. O.

NOTA BENE, which means take notice.—My Uncle promised twi giv' me one of Webster's quarto Dictionaries if I would spell twi hundred words that he would select. When it come onto the test I spell all but the last word, which was the name of a river onto Italy. I spelled it first "P-o-e," but he said it wasn't Edgar Poe. I then spell it "P-o-a-h," but he said it wasn't an in-jerkschism. I then traced my nerves and spell it "P-e-i-a-n-g-h." He last said that would do, and giv' the dictionary onto me. Neather him nor me noe ez yet if it is right or wrong. But he ez I'm improving in spella'.

JOHNSTOWN, Jan. 25, 1869.

Dear Freeman.—Local news is still scarce. The weather has been warm and mild up to the 24th inst. The snow is pretty well gone and the streams are all open.

Parke's new Opera House has received the finishing touches, and is now a model of elegance and comfort. It is very commodious and is otherwise admirably adapted to the purpose for which it has been fitted up. It will be occupied for a brief period, commencing on Monday night next, by a theatrical troupe from Pittsburg.

The Cambria Iron Company is about changing its title to the Cambria Iron, Coal and Steel Company. There will be an increase of capital stock—some say to six millions of dollars. More territory will be bought up, and the "machine" will no doubt be run strong.

The weather has been so favorable that stone masons are busily engaged in putting up the foundations of houses, and many new buildings are progressing. Painters are engaged on outside work, and carpenters are framing tenements. There certainly will be a cold spell yet, and will likely be early in February.

The spring elections will soon be at hand, but little interest is now taken in local elections.

There have been several exhibitions and musical entertainments in the Union Hall and other places, but not of an extraordinary character.

The chicken pox are prevailing in some localities—otherwise the general health is good. The soft weather may occasion sickness.

There will be an eclipse on the evening of the 27th inst. If the weather should be clear, the moon will be seen, partially obscured, commencing at about 7 o'clock.

I have nothing more to note just at present and being unwell will keep your indulgence to next week. M. CHAMBERLAIN, JR.

IN DEMAND.—Considerable inquiry is being made just now for tenement houses by many of those who do not own the roofs that shelter them. There should be more houses erected in our town, and our neighbors who know the best way in removing the centre of the county to its extreme circumference, we hope to see many new buildings put up the coming summer. And those who make these improvements will do well to remember that George is still maintained by that gentleman.

If you wish to indulge in the finest bivalves, the choicest confections, nuts, fruits, etc., the freshest ale or beer, or any other palatable delicacy, you can be accommodated at a moderate price by Mr. Fuller.

We understand our friend, M. L. Oatman, of this place, is doing the largest Flour trade done in Emburg. He keeps on hand at all times the choicest brands of Flour, and sells at a shorter profit than any dealer in this vicinity. The choicest Groceries, all kinds of goods, can be bought at the most reasonable rates.

STILL MAINTAINED.—The reputation earned by A. H. Fuller for keeping the largest and most delicious oysters ever brought to Emburg is still maintained by that gentleman. A movement is on foot here to organize a society of Good Templars, and it is thought the project will be successful.

Rev. J. D. Lardman, of Altoona, who has canvassed the State in the Temperance cause, delivered a lecture on that subject to a large audience, in the Lutheran church here on last (Saturday) evening. He closed his address by many allusions and closed us of having two many allusions and went so far as to caution us against loving Portugal.

Our worthy representative paid us a flying visit on last Saturday. Seems to bear his new honors meekly.

The agent and employees of the P. B. R. Co., are now doing business in the new depot, which is accorded to be as fine a one as there is east of Pittsburgh.

For an indefinite period I reluctantly close on account of nothing to say.

CHIEF, &c.

THE EMBURG FEMALE SEMINARY.—Rev. B. M. Kerr, A. M., Principal, will open the next session of five months, or twenty weeks, on Monday, February 8th, 1869. Terms, per scholar, one-half in advance, \$16, \$20 and \$25, according to grade.

"THE TELEGRAPH," published at Kenosha, Wis., says:

A Good Medicine.—It is not often we say much in praise of Patent Medicines because it is hard distinguishing between the humbug and the really valuable medicine. But we go out of our general custom to say that HOOPLAND'S GERMAN BITTERS is no humbug. We have tried it, and we know it to be almost infallible in cases of indigestion, disarrangement of the Liver, &c. It has cured us of the most obstinate case of Jaundice, after every other remedy had failed. And in no less than half a dozen instances, where we have recommended it to our friends for the same disease, it has proved alike efficacious; and we have yet to hear of the case wherein it has failed.

THIS BITTERS IS ENTIRELY FREE FROM ALL ALCOHOLIC IMPURITY.

HOOPLAND'S GERMAN TONIC is a combination of all the ingredients of the Bitters, with pure Santa Cruz Rum, orange, anise, &c., making a preparation of rare medical value. The Tonic is used for the same diseases as the Bitters; in cases where some Alcoholic Stimulus is necessary. Principal Office, 631 Broadway, New York. Pa. Sold by Druggists and others everywhere. [Jan 21, 1869.]

RABBITAL COSTIVENESS OR CONSTIPATION.—From this affliction arises many of the ailments of mankind. In our country we have a great many people complain of nervous and sick Headache, Biliousness, Inactivity of the Liver, &c. Listlessness, Debility, loss of Appetite, Cholice vomit, want of sleep at night, and a general feeling of distress. Generally the cause of all this train of ailments can be traced to costiveness or constipation of the bowels, and a remedy for this complaint is what is required; but among the multiplicity of cathartic remedies how shall they choose? We all know that cathartics, after thorough action on the bowels, leave them in perhaps a worse constipated state than before the remedy was taken. This, however, is not the case with the new medicine, which we have just mentioned, most effectively, on the liver, causing the organ to throw off the accumulated morbid matter, leaving the stomach and bowels in a perfectly healthy and natural state and not constipated.

Those afflicted in this way would do well, after the treatment above indicated, to take ROBACK'S STOMACH BITTERS where they could take a dose after each meal; they would aid digestion and strengthen the stomach.

HOW TO KILL A TOWN.—The Dubuque Herald gives the following receipt for knocking a town stiff and dead, which we think is so applicable to our own town that we transfer it to our columns: "If you wish to kill off a town, put up no more buildings than you are obliged to occupy yourself. If you should happen to erect an empty building, and any one should want to rent it, sell it at three times its actual value. Look at every new comer with a scowl. Turn a cold shoulder to every business man or mechanic seeking a home among you. Go abroad for wares rather than purchase of your own merchants or manufacturers at the same prices. Refuse to advertise, so that persons at a distance will not suppose any business is being done in your town. A prompt and close observance of these rules will ruin any town in two years."

THE DANGER OF DELAY.—But few diseases require more attention than Colds and Coughs, and few are more generally neglected. How many persons, when they take a cold, consider it of no importance, and let it run on, without reflecting a moment on its consequences. Remember that neglected colds are frequently dangerous, and often result in diseases most difficult to cure. A cold in the head produces a cough, then comes pain in the chest, with difficulty in breathing, and finally ends in Consumption. Who would suffer from a cold, with the probability of a serious attack of Catarrh, Bronchitis, Influenza, or the kind of Lunges, &c., which are prevented by SCHILLER'S HERB BITTERS can be had at any moment's notice. It will remove the tickling sensation which precedes a cold, prevent hoarseness, check coughing, expel the mucus gathered in the bronchiae, and rest successfully that fell destroyer, Consumption.

BEWARE.—The great success which has attended the celebrated Metropolitan Oil, wherever introduced, has led to the manufacture of inferior burning fluids, which are being palmed upon the public as superior articles. The Metropolitan Oil can have no equal as a cheap, brilliant and satisfactory illuminating fluid, and all oils introduced to compete with it, while they fall very far short of the mark, are infringements on the patent, and hence the proprietor of the right has been obliged to sue, and is now determined to proceed against all parties who undertake to sell any such oils within the bounds of Cambria county. The Metropolitan Oil cannot be excelled in any particular, and the public should beware of all imitations, for they are worthless.

TO CONSUMPTIVES.—The advertiser has discovered to health in a few weeks by a very simple remedy, after having suffered several years with a severe lung affection, and that dread disease, Consumption, is anxious to make known to his fellow sufferers the means of recovery. To all who are afflicted will send a copy of the Prescription used (free of charge), with the directions for preparing and using the same, which they will find a sure cure for Consumption, Asthma, Bronchitis, &c. Any person who wishes to receive the Prescription is to benefit the afflicted, and send information which he conceives to be invaluable; and he hopes every sufferer will try his remedy, as it will cost them nothing, and may receive a blessing from the advertiser. The Prescription will please address.

Rev. EDWARD A. WILSON, 165 South Second St., Williamsburg, Kings County New York. [Nov. 12, 68-19.]

TO ASCERTAIN the length of the day or night at any time during the year, double the time of the sun's rising, which gives you the length of the night, and double the time of its setting, which gives you the length of the day. To see a stock of watches, merchandise that cannot be priced in quantity, quality, or cheapness of price, by any similar assortment this side of the moon a eclipse. There is no moonshine about this kind of statement, however, as all can learn who call the Messrs. Shoemaker a visit.

THE WEATHER.—Though the weather has been very mild for the past three weeks, Messrs. Leopold & Brother, at the Oak Hall Clothing Store, Main street, Johnstown, have sold lots of winter clothing. Buyers know that winter is not over, and that they can purchase cheap and durable goods at Oak Hall.

AUCTION.—Never buy goods at auction. If you do you will get cheated. If you need any thing in the Dry Goods line, go to Leopold Mayer's New York Dry Goods and Fancy Goods Store, and you will have a chance to examine before you buy. He keeps on Main street, Johnstown.

GOOD LOOKS depend on good dress, and no one is well dressed without a new suit. A new suit is now on hand at the Borough Clothing Store, Johnstown, opposite the Express office, on Main street, opposite the Express office. All the doors are always open, and admittance free.

SHADOWS.—Coming events cast their shadows before, when the sun shines, but J. J. Murphy, of the Sun Clothing Store, Johnstown, sells cheap and durable clothing, all the time. He can be found on Clinton street. Doors always open, and admittance free.

OUR NEW FAMILY SEWING MACHINE!!

The superior merits of the "Singer" Machines are well known, either for Family use or for the most extensive business. They are made and so generally adapted, that a numeration of their relative excellences is no longer considered necessary.

THE NEW FAMILY MACHINE, which has been brought to perfection regardless of time, labor, or exp. use, is now confidently presented to the public as incomparably the BEST SEWING MACHINE IN EXISTENCE.

Newly invented, it is SIMPLE, COMPLETE, DURABLE and BEAUTIFUL. It is quiet, light running, and CAPABLE OF PERFORMING A RANGE AND VARIETY OF WORK never attempted upon a single Machine, using either Cotton, Lincen or Cotton Thread, and sewing with great facility the very finest and coarsest materials, and—nothing between two extremes, in the most beautiful and substantial manner, without the necessity of Felling, Bridging, Gording, Tucking, Quilting, Pelling, Trimming, Binding, &c., are NOVEL and PRACTICAL, and have been invented and adapted especially for this Machine.

The Government has already loaned the Union Pacific Railroad twenty four million and fifty-eight thousand dollars (\$24,058,000) and to the Central Pacific Railroad seventeen million dollars (\$17,000,000), making a total of forty-one million seven hundred and six thousand dollars (\$41,058,000) for which it takes a second issue of \$50,000,000, for which it takes a second issue of \$50,000,000, for which it takes a second issue of \$50,000,000.
