THANKS .- We are under obligations to Congressman Morrell for several valuable public documents, and to Representative Porter for a daily copy of the Legislative Record, and for other favors of a more gratifying character, and which we shall ever hold ourself ready to reciprocate.

A Mistake Corrected.

Almost every editor of a newspaper, democratic as well as radical, when he refers to the proposed constitutional amendment conferring suffrage upon negroes in the Northern States, speaks of its adoption by three fourths of the State Legislatures as a foregone conclusion. This is a mistake. There are thirtyseven States in the Union, or at least there ought to be. Three-fourths of that number are twenty-eight. Less than that number of State Legislatures cannot ratify an amendment to the constitution. The radical party now controls the Legislatures of twenty-three States, as follows : Maine, Vermont, Massachis t, Rhode I land, New York, Pennsylvaria, West Virginia, Michigan, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Nebraska, Kansas, Nevada, Arkansas, Tennessee, Louisiana, Alabama, Florida, South Carolina and Norta Carolina. If New Hampshire and Connecticut vote for the radicals at the spring election it will give them two more States, making in all twenty-five. The opponents of negro suffrage control the Legislatures of nine States. In order, therefore, to make up the twenty-eight States it will be necessary for the radicals to carry the three States not yet reconstructed, viz: Virginia, Mississippi and Texas. Their chances of doing so are not at all flattering, since we know that Mississippi, at an election held last summer, defeated her reconstructed constitution by a majority of about eight thousand. From this view of the situation, and it is the correct one, it is safe to infer that this piece of radical bread may yet fall upon the buttered side.

In view of the fact that the Chicago platform distinctly disavowed any right on the part of Congress to regulate the question of suffrage in the Northern States, the submission of this proposed negro amendment to the Northern Legislatures at this time is a gross outrage. They were not elected with reference to that issue, for the very reason that the radical party, by the action of its national convention, had declared that it was or subsidy from the State assumes not only issue in this State at the next fall election Geary and his radical cohorts would be utterly annihilated. As the game of political fraud is now being played, negro suffrage may be inflicted upon this State, not by the votes of her own citizens but by the votes of the negro and carpet-bag Legislatures of the States of North Carolina, South Carolina, Florida, Alabama, Arkansas and Louisiana.

A Silly Proposition.

In event of the disability of a steamer, another may be substituted. The line has the privilege of touching at Southampton.

It is conceded on all hands that Philadelphia, the second city in the Union in point of wealth and population, ought to have a line of steamships to Europe. That she has not long since had such a line in successful operation speaks loudly against the enterprise and public spirit of her own citizens. For many years a vast amount of talk and a great deal of newspaper writing have been expended on the subject, but nothing has been accomplished. In this respect Baltimore is far in advance of that city, having a regular line of such steamships, which has been established by the liberality of her own merchants without any foreign aid or subsidy from the Maryland Legislature. The proposed line of steamships will enure

If the steamship company itself is not competent to start the enterprise, what is to prevent the two rich and powerful corporations we have named, and who are to be the recipients of the profits if there be any, from standing between the steamship company and a failure of the project. If they are to be the gainers in the event of success why not run the risk of a possible loss in the event of a failure? The very fact of asking a donation not a debateable question. If that were the the possibility but the certainty that the doubt whether any other city than Philadelphia or any other corporation than the great mammoth Pennsylvania Rail Road Company | My own impression is that they are about would make such a demand under similar circumstances. If Saint Domingo should be annexed, Hayti, comprising the western portion of the island, would follow in her footsteps with a black population of 600,090. Hayti once belonged to France, and in 1791 the French Assembly, in the name of "Liberty, Fraternity and Equality," declared all the slaves on the island free. Imme liately afterwards what Whereas, It is proposed by Reuger Brothers is known in history as the massacre of Saint to establish a regular steamship line between Domingo took place, in which the entire white population, amounting to twenty-five thousand souls, was swept from the face of the earth in one bloody, indiscriminate slaughter. From that day to this, a period of seventy-eight years, the population of the island has been in a state of chronic revolution. Saint Domingo owes a debt of fifteen millions, which, in the event of its annexation, would have to be assumed by this government. One would suppose that our brief experience of the "man and brother, both as a voter and a lawmaker, would have more than satisfied the insane ravings of even Wendoff Phillips himself. Then we and since they have been here I don't feel so much like betting on the nomination of his Excellency for Governor. They have resolved to hold this convention on the 23d f June, in Philadelphia. It is generally understood that his majesty wished the convention to be held on the 2nd of March, and since the committee have not seen proper to consult his wishes in the matter, his chances den't look so favorable as they did a week ago. It will be a great misfortune to the democrats should he be left out in the cold. There are some insinuations that your State Senator, Harry White, wouldn't feel himself at liberty to decline a nomination by the radicals. For the democratic nominavery fair show of success. The opinion of leading democrats, here is that the convention should not be held until July or August; in fact, it appears to be the general mpression throughout the State. Strange to say, the pasting and folding swindle was not under discussion in the assembly this week. It was engaged principally in local legislation. There was a joint resolution passed requesting our Senators and instructng our Representatives in Congress to oppose the passage of any law placing telegraph lines in the hands of the general govrnment. This is an important matter to the people of our Commonwealth, and I am glad to see that it has been passed. There s talk of a final adjournment on the 10th of March, the Committee of Ways and Means having reported a resolution to that effect .-But, judging from the number of bills to be acted on, the length of the sessions that have been held, and the number of bumcombe speeches that will be made, if the preceedngs thus far is to be a criterion to the kind of speeches we are to have, and I think your eaders will agree with me that they are nore notorious for bumcombe than for argument, the probabilities are that the session will be prolonged considerably beyond that time. They propose to hold night sessions part of the coming week, and business will go through with a rush.
