#### Pins--How They are Made--An Interesting Account.

A correspondent writing from Seymour. Connecticut, gives the following account of how pins are manufactured:

The pin machine is one of the closest approaches that mechanics have made to the dexterity of the human hand. A small machine, about the height and size of a ladies' sewing machine, only stronger, stands before you. On the back side a light belt de scends from the long shaft at the ceiling that drives all the machines, ranged in rows on the floor. On the left side of our machine hangs on a peg a small reel of wire, that has been straightened by running through a compound system of small rol-

This wire descends and the end of it enters the machine. This is the food consumed by this snappish, voracious little dwarf. He pulls it in and bites it off by inches, incessantly, one hundred and forty bites to the minute. Just as he seizes each bite a saucy little hammer, with a concave face hits the end of the wire three taps and "upsets" it to a head, while he gripes it in a counter-sunk hole between his teeth.

With an outward thrust of his tonge he then lays the pins sidewise in a little groove across the rim of a small wheel that slowly revolves just under his nose. By the external pressure of a stationary hoop those pins roll into their places, as they are carried under two series of small files three in each. These files grow finer teward the end of the series. They lie at a slight inclination on the points of the pins, and by a series of cams, levers, and springs are made to play "like lightning." Thus the pins are pointed and dropped in a little shower in a box. Twenty-eight pounds of pins is a day's work for one of these jerking little automatons. Forty machines on this floor make five hundred and sixty pounds of pins daily. These are then polished .-Two very intelligent machines reject every crooked pin, even the slightest irregularity of form being detected.

Another automaton assorts half a dozen lengths in as many different boxes, all at once and unerringly, when a careless operator has mixed the contents of boxes from various machines. Lastly, a perfect genius of a machine hangs the pins by the head in an inclined platform through as many "slots" as there are pins in a row on the papers. These slots converge into the exact space spanning the length of a row. Under them runs the strip of pin-paper. A handlike part of the machine catches one pin from each of the slots as it falls, and by one movement sticks them all through two corrugated ridges in the paper from which they are to be picked by taper fingers in boudoirs, and all sorts of human fingers in all sorts of human circumstances.

NEW PLAN FOR RAISING POTATORS .- A correspondent gives the following as his

plan for raising potatoes: Plow your ground deeply, harrow down smooth, mark out three feet apart, drill or plant in hills as you like, cover shallow with dirt, on top of which place straw, (if partly rotted all the better,) ten or twelve inches thick. You now have nothing to do in the potate patch until digging time, when you raise the straw and take out the potatoes; which will be found in large yield, and pice and clean.

Hoofland's German Bitters

is entirely vegetable, and contains no liquor. It is a compound of Finid Extracts. The Boots, Herbs, and Barks from which these extracts are made are gathered are extracted from them by a scientide chemist. These extracts are them forwarded to this country to be used expressly for the manufacture of these Eftters. There is no alcoholic substance of any kind used in compounding the Fitters, hence it is the only Eitters that can be used in eases where alcoholic stimulants are not advisable.

### Hoofland's German Tonio

to a combination of all the ingredients of the Bitters, with runs Santa Crus Rum, Orange, etc. It is used for the same diseases as the Bitters, in cases where some pure alcoholic stimulus is required. You will bear in mind that these remedies are unlively different from any others advertised for the cure of the diseases named, these being scientific preparations of medicinal extracts, while the others are mere decoctions of rum in some form. The TONIC is decidedly one of the most pleasant and agreeable remedies ever offered to the public. Its taste is exquisite. It is a pleasure to take it, while its life-greing, exhibitrating, and medicinal qualities have coused it to be known as the greatest of all losses.

DEBILITY. There is no medicine equal to Hoofand's Owner There is no medicine equal to Hoofand's Gorman Bitters or Tonie in the cases of Debility. They import a tone and and vigor to the whole system, strengthen the appetite, ocuse an enjoyment of the most food, enable the shomach to dipert it, purify the blood, give a good, sound, healthy complexion, eradicate the y-liou tinge from the eye, import a bloom to the cheeks, and change the patient from a short-breathed, emaciated wouk, and nervous invalid, to a full-faced, stoul, and vigorous person.

Weak and Delicate Children are made strong by using the Blitters or Tonie. In fact, they are Family Medicines. They can be administered with perfect safety to a child three months old, the most delicate female, or a man of ninety.
