VEGETABLE STAINS .- The best method of removing stains from linen and cotton fabrics, produced by spilling wine or vegetable juices, consists of moistening the surface affected (previously wetted) with a solution of hypo-sulphate of soda dissolved in hot water, and then adding on the point of a knife a little pulverized tartaric acid, and rubbing this well in. After the stain has disappeared the cloth may be washed out in lukewarm water, and when dry no trace of the stain will remain.

CORNS AND BUNIONS .- To cure corns take a lemon, cut a piece of it off, and nick it so as to let in the toe with the corn. Tie this on at night so that it cannot move, and you will find the next morning that, with a blunt knife the corn will come away to a great extent, Two or three applications will effect a thorough cure. Bunions are more difficult to cure; but the following has proved a remedy in some cases :--Make an ointment of half an ounce of spermaceti and twelve grains of iodine, and apply twice or thrice a day.

correspondent in the London Gardener's Chronicle recommends a preventive of dryrot, which he says has been thoroughly tested by experiment. It consists in soaking the timber for a short time ip lime wa ter. A pit or good sized tank, according to the extent of the requirement, will answer the purpose, the lime being added to the water in the porportion of eighty-eight grains to the gallon. Timber prepared in this way is said to stand the weather remarkably well.

The Latest Orders.

The following circular letter issued from the White House, was presented to Mack, who deliberately prints it :

HEADQR'S GRANT GIFT ENTERPRISE,) WHITE HOUSE, Mar. 1869.

The following instructions are issued for the benefit of those seeking off o under the new Administration :

Applicants must state the extent and character of the contribution made by them ; the time when made; its value then and its value now. If it consisted of real estate they must specify whether it was improved or unimproved ; whether town or country property. If city lois, whether corner or otherwise; also, whether abutting on an alley or not; if country property how near to a railroad, and whether prairie or timbered. If improved city property, whether gas and water are in all the rooms.

If the contribution consisted of money, the applicant must state the precise sum, and whether it was in bonds, gold or currency.

If the contribution consisted in horses, the applicant must state precisely the age, color, sex and condition of the animal and whether thoroughbred or not, with a carefully prepared pedigree in the former case.

Contributions other than real estate, money, or horses, may be classed under the general head of "miscellaneous," but the items must be distinctly given, together with their value, &c.

Future contributions must be made in money or improved city property. This rule will admit of no deviation. The number of horses on hand forbid further udditions, and the unsalable character of farm property will not warrant the accumulation of that species of real estate. To accommodate customers, however, a real es tate agent will be attached to the headquarters staff, whose duty it will be to use his best endeavors to sell country property, and to convert it into money for the benefit of applicants for office.

All contributious must be made and receipted for before the applicant's claims are BACON, SALT, FISH, passed upon. This rule is necessary to avoid a repetition of the unpleasant relations arising a few days since out of a case in which the applicant was found to be disqualified after the appointment had been ALL KINDS OF FRUITS, made. In no case will the money be refunded.

Compliance with the above instructions will greatly facilitate business. By order of the President of the Grant Gift Enterprise, JULIUS CARSAR STRUTABOUT. A. D. C. and A. A. G., Brig. General and Bvt. Maj. General, Private Secretary. Countersigned : Napoleon Bonaparte Jinks, Captain of the Hoss Marines and Chief Engineer of the Grant Gift Enterprise.
