

A NEW PAPER - We publish the following prospectus, which is decidedly rich:

I propose to start a newspaper on the gift enterprise plan. It will be devoted to sanitary, sewing machines, politics and patent medicines. The following premiums will be given to subscribers:

Subscribers to one copy of the Church Caneer will be presented with a box of patent petroleum paste blacking. This is a superior article; it will black boots or shoes, and may be used as a hair dye.

Subscribers for five copies will be presented with a pair of ironed spectacles with glass eyes, warranted to suit one eye as well as another.

Subscribers for twelve copies will be entitled to a wooden leg, a patent adjustable boot jack, which can also be used as a cork-screw, a coffee mill or an inkstand.

Subscribers for twenty copies will be entitled to a pair of false calves, a gilt-edged copy of Ann Dickinson's speeches and writings.

Subscribers for thirty copies will receive a fitting hoop skirt, and a marble bureau with a mahogany top.

Subscribers for fifty copies will receive a set of summer furs, and burial plot with an order for a tomb stone when required.

Subscribers for five hundred copies will receive a nomination for Congress, with a library consisting of a bottle and a pack of cards.

Subscribers for a thousand copies will be presented with a farm in New Jersey fenced and inclosed.

Cherymen acting as agents for the Caneer will be furnished with one pair of brass tuckles, and an acre of court plaster.

To PREVENT RAILROAD ACCIDENTS - The arch of progress is irresistible. Each recurring year finds us farther advanced in arts and sciences.

A machine has lately been invented to prevent disastrous rail accidents, which is pronounced by scientific men who have examined it a complete success.

The following is a description: Underneath each car, and between trucks, is placed a couple of levers, which are allowed to play up and down by means of firm spiral springs, and are held in place by a strong bar of iron with a slot in it, which is also firmly fastened to the trucks.

Connected with these levers are strong pieces of reliable India rubber in a flat wire, which are to connect with the car immediately in front or in the rear. On the engine is placed an alarm bell and a magnetic battery, which are connected with the insulated wires.

Now, as the cars stand upon the track, the levers above referred to come within a few inches of the rails, and should any one of the cars obstruct the track, these levers are sprung up by the obstruction itself, and an alarm is instantly struck upon the bell in the engine, thus giving the engineer notice that there is something wrong, and he can stop his train.

In case a car or a pair of trucks get off the track while the train is in motion, the alarm bell instantly notifies the engineer, who is thus prepared to stop his train before any damage occurs. The breaking of the insulated wire will cause the alarm to be struck, so that it would seem that no kind of an accident can happen without the engineer of the train knowing it immediately. The connection of the wires to each car is so simple that it can be done at the same time the car is coupled on the train, and with a single motion of the hand.

JOSH BILLINGS IN THE EDITOR'S CHAIR - Josh Billings answers newspaper correspondents in the following brief and lucid style:

Whip - You are rite; mules live to a long age; I've known them myself to live one hundred years, and not half rite. You are rite about there being sure-footed; I've known them to kick a boy twice in a second, ten foot off.

Gertrude - Your inquiry stumps me. The more I think on it the more I can't tell. As near as I can relate now I think I don't know. Much mite be sed both ways, and neither way be rite. Upon the whole, I think I rather think I wud, or I woudnt, just as I think best or otherwise.

Mtark - You're mistaken; the Shakers don't marry. If young Shakers fall in luv they ar sot to wedding onions, and it cures them for this kind to jine the Shakers, but I believe the expense used to be including having yore hair cut and larning how to dance, about \$65.

Sportsman - Yure inquiry is not exactly in m line, but I haste to reply, as fallers, to wit: The right length to cut oph a dog's tail has never yet bin fully discovered, but is undoubtedly hid in his ears, provided yu git the dog's consent.

N. B. It isn't absolutely necessary the dog's consent should be in writing.

How to TAKE OUT INK STAINS - It is certainly very much worth while to know how to take ink spots out of colored clothing. The writer, "on a summer's day," when it seemed as if one had enough to do to support life without extra trouble in the torrid heat, once upon a bottle of ink into her lap, over a line of colored muslin, brown and white, and trimmed with rows of brown braid. Aghast, the first thought was the dress was ruined; the second was to dip the skirt at once into warm water, rinsing as much ink out as possible, but what was left made a rueful sight - hand-breadths of doleful thunder-dark color, over the light summer dress. Quick, it was plunged into a warm solution of sulphuric acid - hot, that it might take effect sooner. Care was taken to dip only the spot into this liquid (there are some people so stupid they will need to be told this), and in a minute they faded, of course, taking the color of the stripes with them. The luen was rinsed in warm water again, and wet with dilution of ammonia, which changed the skirt to its original color, and the dress was as good as ever. Hence I keep high and sublime conrage about all ink mishaps, sure that acid and ammonia and care will make that rite again. The process must be gone through as quickly as possible when once begun, but it will cancel old ink stains on wool, cotton or linen.

SOAKING SEEDS - The Chinese seldom sow a crop without having previously soaked their seeds in diluted manure, keeping them there until they begin to sprout. They hold that this not only gives the plants an early and vigorous start, but preserves the seeds from worms or birds. The practical results of Chinese agriculture are too important for us to speak of them with contempt. Would it not be well for us to use some safe steps for our corn, squashes, melons, etc., as a general rule, and not as an exception?

AN INDIAN MAIDEN, of forty-one years, is but five or six inches high and weighs only thirty three pounds.

A NOVEL MOVIE POWER - A few days since, as a fleet of fishing-vessels were lying on one of the banks with their oars abandoned, their boats wandering from place to place in search of good fishing-ground, they encountered a large boat of sword-fish. The men on board of the boats "struck" one of them, and as they were hauling him in, he came, in his gyrations, full at the stern of the boat, running his sword - several feet long - through the scull-hole, at the same time disengaging the iron from his flesh. Quick as thought, one of the stalwart mariners seized the sword, and getting astride of it, held him firmly. Meantime, the fish, by the action of his tail used as a propeller, urged the boat forward at a good rate of speed until she reached the vessel to which she belonged, her head fortunately being in that direction when he made the attack. The novel scene was witnessed by all the members of the fleet, who greeted the strange performance with cheers and shouts of laughter.

FIRELIES OF JAMAICA - The fireflies of Jamaica emit so brilliant a light, that a dozen of them, enclosed within an inverted glass tumbler, will enable a person to read or write in the night-time without the least difficulty. Indeed, it is an expedient to which many resort. These flies are in size as large as a common live bee, and they are perfectly harmless. Their appearance in unusual numbers acts as a thermometer to the natives; and it is an unquestionable indication of approaching rain.

To TRAVELERS they afford, even on the darkest nights, sufficient light to guide their footsteps with the greatest safety. - The light which they send forth is in every respect equal to that of the purest diamond; and hence the Creole coquettes frequently insert a few of them, confined in pods of gauze, in their hair and parts of their dress, in the same manner as actresses avail themselves of the paste jeweller's art.

MUSICAL - The local of the Cleveland Herald, discussing feine serenaders, says: A male cat sees an acquaintance in the next yard, and asks permission to come over in something like the following: "M-e-r-r-e-r-t-o-y-o-u-r-h-o-u-s-e?" The request and the answer are pitched in a high key, and we have noticed that it don't make a bit of difference whether permission is given or not. Thomas walks right over. The two then pitch themselves on the fence, always taking great care to get directly under the window of a bed-room, and then they discuss the topics of the day. As their conversation goes on they get excited, and each advances his or her opinions in emphatic language. The discussion is sure to interest all the cats in the neighborhood, and they make a straight wake for the rendezvous.

SALT YOUR CHIMNEYS - In building a chimney, put a quantity of salt into the mortar with which the intercourses of brick are to be laid. The effect will be that there will never will be any accumulation of soot in that chimney. The philosophy is thus stated: The salt in the portion of mortar which is exposed absorbs moisture from the atmosphere every damp day. The soot thus becoming damp, falls down into the fireplace. This appears to be an English discovery. It is used with success in Canada.

THE LAST OF THE SUCCESS. - Mr. S. A. Allen's Improved Hair Restorer and Hair Dressing. New style in one bottle.

How to TAKE OUT INK STAINS - It is certainly very much worth while to know how to take ink spots out of colored clothing. The writer, "on a summer's day," when it seemed as if one had enough to do to support life without extra trouble in the torrid heat, once upon a bottle of ink into her lap, over a line of colored muslin, brown and white, and trimmed with rows of brown braid. Aghast, the first thought was the dress was ruined; the second was to dip the skirt at once into warm water, rinsing as much ink out as possible, but what was left made a rueful sight - hand-breadths of doleful thunder-dark color, over the light summer dress. Quick, it was plunged into a warm solution of sulphuric acid - hot, that it might take effect sooner. Care was taken to dip only the spot into this liquid (there are some people so stupid they will need to be told this), and in a minute they faded, of course, taking the color of the stripes with them. The luen was rinsed in warm water again, and wet with dilution of ammonia, which changed the skirt to its original color, and the dress was as good as ever. Hence I keep high and sublime conrage about all ink mishaps, sure that acid and ammonia and care will make that rite again. The process must be gone through as quickly as possible when once begun, but it will cancel old ink stains on wool, cotton or linen.

SOAKING SEEDS - The Chinese seldom sow a crop without having previously soaked their seeds in diluted manure, keeping them there until they begin to sprout. They hold that this not only gives the plants an early and vigorous start, but preserves the seeds from worms or birds. The practical results of Chinese agriculture are too important for us to speak of them with contempt. Would it not be well for us to use some safe steps for our corn, squashes, melons, etc., as a general rule, and not as an exception?

STORE ON HIGH STREET, Four Doors East of Crawford's Hotel, Ebensburg, Pa.

EBENSBURG FOUNDRY AGAIN IN FULL BLAST!

NEW FIRM, NEW BUILDINGS, &c.

HAVING purchased the well known EBENSBURG FOUNDRY from Mr. Edw. Glass, and rebuilt and enlarged it almost entirely, besides refitting it with new machinery, the subscribers are now prepared to furnish COOK, PLUMBING & HEATING STOVES, of the latest and most approved patterns.

IRON PUMPING, MILL GEARING, ROSE AND WATER WHEELS, of every description, IRON PUMPING, PLOUGHING and PLOUGH CASTINGS, and in fact all manner of articles manufactured in a first class Foundry. Job Work of all kind attended to promptly and done cheaply.

The special attention of Farmers is invited to two newly patented PLOUGHS which are in use in this county, and which are admitted to be the best ever introduced to the public.

Believing ourselves capable of performing any work in our line in the most satisfactory manner, and knowing that we can do work at lower rates than have been charged in this county heretofore, we confidently hope that we will be found worthy of liberal patronage.

Fair reductions made to wholesale dealers. The highest prices paid in cash for old metal, or castings given in exchange.

OUR TERMS ARE STRICTLY CASH OR COUNTRY PRODUCE. CONVEY, VINROE & CO., Ebensburg, Sept. 2, 1868.

L. L. LANGSTROTH'S PATENT MOVABLE COMB BEE HIVE!

PRONOUNCED THE BEST EVER YET INTRODUCED IN THIS COUNTY OR STATE. Any person buying a family right can have their bees transferred from an old hive to a new one in five minutes, and the result is entirely satisfactory, and the first take of honey has invariably paid all expenses, and frequently exceeded them. Proof of the superior merits of this invention will be found in the testimony of every man who has given it a trial, and among the names are the gentleman named below, and their experience should induce every one interested in Bees to BUY A FAMILY RIGHT!

Henry C. Kirkpatrick, of Carroll township, took 100 pounds of surplus honey from two hives, which he sold at 25 cents per pound.

Adam Dietrich, of Carroll township, took from two hives 100 pounds of surplus honey, which he sold at 25 cents per pound.

James Kirkpatrick, of Chest township, took 60 pounds of surplus honey from one hive.

Jacob Kirkpatrick, of Chest township, obtained 72 pounds of surplus honey from one hive, worth not less than \$21, and the right cost him only \$5.

Peter Campbell from one hive obtained 26 pounds of surplus honey at one time.

Quite a number of similar statements, substantiated by some of the best citizens of Cambria county, could be obtained in proof of the superior merits of Langstroth's Patent Movable Comb Bee Hive.

Persons wishing to purchase family rights should call on or address: PETER CAMPBELL, Carrolltown, Pa., Nov. 5, 1856.

CHAIR MANUFACTORY, WM. P. PATTON, JOHNSTOWN, PA.
