A NEW BIT OF HISTORY. M. Judkins, the librarian of the Massasette Historical Society, in overhauling a chest of old papers deposited in the archives of that body by the late Robert Greenleaf, of Malden, has recently made a curious discovery which has especial inter-est for the people of Penusylvania. Among these papers was one of ancient date which hore this endorsement : "Ye scheme to bagge Penne." This curious title attracted the attention of Mr. Judkins, and he examined the contents of the document with more than

common interest. It is in the quaint handwriting of the Rev. Cotton Mather, and is addressed to "Ye aged and beloved Mr. Jon Higginson." It hears date, "September ve FIREMAN'S COATS, 15th, 1682." and reads thus, the odd spell- to keep you warm and dry. Wotyy makes ing of the original being followed to the let- them at from \$18 to \$20, and any other garter:

"There bee now at sea a shippe (for our friend Mr. Esaias Holeroft of London did ad vise me by the last packet that it wo'de sail some time in August-called ye Welcome, R. Greenway, master, which has aboard an hundred of more of ve heretics and malignants called Quakers with W Penne who is ye Chief Scampe at ye hedde of them. Ye General Court has recordingly given secret orders to Master Malachi Huxett of ye brig Porpose to wayhaye ve said Welcome shilic as near ye WINTED CADMENTO DOD MEN C. DOVC coase of Codde as may be, and make captive ye said Fenne and his ungodlie crewe so that ye Lord may be glorified and not mocked on ye soll of this new countrie with ye heathen worshippe of these people. Much spoyle can be made by selling ye whole lotte to Barbadoes where slaves fetch goode prices in rumme and Pants from \$1.50 to \$9. Vests from 15 cents sugar and we shall noot only do ve heri great to \$5. Also, a general variety of service by punishing ye wicked but we shall make great gayne for his ministers and people. Master Huxett feels hopefull and I will set down ye news he brings when his shippe comes UMBRELLAS, SATCHELS, TRUNKS, &c. back.

"Yours in ye howells of Christ, "Corron Mather."

Master Huxett missed his reckoning and Penn sailed secure within the Capes of the Delaware. But it is carious to reflect on the narrow chance by which the founder of this common wealth escaped the fate of many of his religions brethren who were east ashore on the relentless coast of Massachusetts. In is strange to fancy the wise lawgiver, endeared to the hearts of a great people and their posterity by his wisdom, sagacity and benevolence, hoeing sugar in Barbadoes un der the lash of a Yankee overseer, or crush ing cano into ruin to thaw the granite gizzards which Mather and his theological brethren carried about instead of hearts .--Ah ! How the ancient Cotton must have mourned for the marketable Quakers and the refreshing "rumme" which came not. It is delightful to think how he never got a bit of the "spoyle" which his devilish old soul held in delicious anticipa-tion-how brother Higginson watched fondly for his hogshead, and dreamed of swallowing his half score of heretics in pious punches. They would have made "a rum cretur" of the Great Founder, in a literal sense, if they had got him, but thanks to the good steerage of "R Green way, master," All such goods as Spices, Brushes, Wood and Willow Ware, Shoe Blacking and Station ery will be sold from manufacturer's printed they didn't get him .- Easton Argus.

This you are not, unless you have been to Wolff's Clothing Store, and have bought one of those superb ment you want you can have made to order at ularly in the arrangement of the inner com- accruing thereon. short notice.

BEE The undersigned has secured letters-patent of the United States, dated December 14, 1869, for an improvement in the construction of Bee Hives, and claims for his invention advantages in pursuance of the several Acts of possessed by no other heretofore patented. The principal feature of this Rec Hive is the manner of selling Unseated Lard arrangement by means of which it is thorough- no HEREEY GIVE NOTICE that the fol ly ventilated, thus precluding the possibility of cribed tracts of Unseated Lands a the bees smothering, the comb moulding or the | Ground in the said County of Camb honey souring. This desirable end is accom- parts thereof as may be necessary plished by a vertical perforated tube, running | rearages of taxes due thereon, for centrally through the hive and open at the top more, will be offered for sale at

cured in this improvement. The ventilator is of JUNE NEXT, and continue, by a for the increase of bees. The peculiar construction of the box, partic- such arrearages of taxes and costs

partments, whereby it can be cleaned at any time without disturbing the bees, is another valuable improvement which will be obvious Mr. WOLFF has just returned from the East, | to any person who examines this Hive. An examination of the workings of the bees or the condition of the interior can be made at any time, as the sides are cased with glass. Bees can be trasferred from a different hive to the improved one without any difficulty whatever. It would require too much space to enumerate here all the advantages claimed in this invention, but full information will be promptly furnished by applying in person or by letter to the patentee. I am now prepared to dispose of territory for the sale of the Improved Boe Hive in any portion of the United States.

PETER CAMPBELL, Carrolltown, Cambria Co., Pa.

AUTOMATIC RAILWAY GATE

The patentee of the above has also invented and natented an AUTOMATIC RAILWAY 200 GATE, to which he invites the attention of railroad men. Full information will be fur nished on application, and Company Rights will be disposed of by the inventor. Address as above. [jun.11.70.tf.]

made by chance. Watts, the engineer, took age charges are made. Dealers may rest asthe Thumes, tools his first idea from a ship worm, as he observed it, perforate, with its well armed bead, first in one direction and ahen in another, till the arched way was complete and daubed over the roof and sides with a kind of varnish. The art of portrait painting is believed to have its origin in an acident. Corinthia, a young girl of Sycon, discovered her beautiful lover asleep; the lamp which burned beside him cast the shadow of his profile on the wall; struck by the likeness, and inspired by love, she traced it, and thus produced the first specimen of that delightful art. The hammer of a blacksmith suggested a subject for one of Hayda's best compositions. An artist in vain tried to give the drapery about which he was en. ployed in his picture the graceful folds which could alone satisfy him ; vexed at his failure, HARDWARE, he was about to put the painting away, when a servant entered his studio, and, in putting to rights such things as fell in his way, he threw his master's cloak across the stand, it fell into the graceful felds so much desired by the painter. So an artist, in despair of imparting the expression of the excitement and heat of the chase to the noble horse he was painting, flung his brush impatiently away; it splashed upon the nestrils of the horse, and represented at once the foam, which was all that was required. In every day life our happiest thoughts

seem to be chance corners. -----

A WONDBEFUL STENOGRAPH INVENTION. -We learn that "a mechanic living on the shores of Lake Zurich, M. Theodor Zuppinger, has just invented a mechanism as marvellous as the daguerreotype was first considered to be, the applications of which have since become so popular and universal. The machine of M. Zuppinger in no larger than the human hand, and performs the work of an accomplished stenographer. Placed in contact with the vocal organ, it produces the slightest sounds enunciated by the lips, tongue, or throat. While one is in the act of speaking, a ribbon of paper is detached from the machine, similar to that thrown off Wood, Morrell & Co.'s establishment, and now by the telegraph apparatus, on which the desires to inform his friends and the public genwords pronounced are traced in black and erally that he has commenced business in Sup white. The mechanism is in all respects pes's building, on Clinton street, with a stock most ingeniously constructed, and worthy of being compared with the invention of Niepce, Daguerre, and Morse.

IF BROOMS are wet in boiling suds once a week, they will get very tough, will not cut the carpet, will last much longer, and always sweep like a new broom. A very dusty carpet may be cleaned hy sitting a pail of cold water out by the door, wet the broom in it. knock it to get off all the drops, sweep a yard at a time. If done with care it will clean a if the carpet is very dusty. Snow sprinkled time to melt and dissolve, is also nice for ren-
