

A Strange Sort of Cemetery.

Travelers in South America have made many strange discoveries there—as strange indeed, as those occasionally reported in the fabled and ever interesting East.

Two days journey from Calama, over the dazzling sand and through the stifling dust brings the traveler to Chin Chin, an ancient Peruvian burying place still within the bounds of Atacama.

What is the explanation of so strange a scene? Who are these that now constitute this ghastly company? Where, and how, and why did they first take their places in this vast semicircle?

A thousand questions may be asked, but few answered. The inhabitants of the country who live nearest the spot have no knowledge on the subject.

Others believe that this may have been the remnant of a native tribe, hunted and pursued by enemies, and driven to a desperate choice between two impending evils.

We have enjoyed many a joke about the long names of the mountains and lakes of Maine. But now that these names are big enough to speak for themselves, suppose we all quit laughing at them, and in quitting, give the last word to a correspondent, who writes from Lake Muskatukookobogusquiroitakookobonatic that he asked a boy for fishing.

The scene of the following romance is laid at Yonkers, New York: "A young lady who was engaged to be married soon, on passing a barber shop, saw her intended in a chair and a barber fanning him.

DO YOU HEAR THAT, FIREMEN? AND ARE YOU PREPARED TO OBEY THE SUMMONS?

This you are not, unless you have been to Wolf's Clothing Store, and have bought one of those superb FIREMAN'S COATS.

NO FIT, NO CHARGE! Mr. WOLF has just returned from the East, and his READY MADE CLOTHING DEPARTMENT

Things Worth Knowing.

A MORNING saint has discovered and published in the Church Organ, a sure preventive of small pox, which is: "After being exposed, eat a sufficient quantity of onions to move the bowels, and go on about your business. Try it, and report the effect to this office, so that it may be published to the world with more signatures than one."

VALUABLE RECIPE.—Among the various methods of keeping and making water cool, none is much better or easier than that practiced in the East. The water is put in jugs, bottles or wine coolers, which are placed in buckets filled with salt and salt-petre, and then turned rapidly, until the water almost reaches a freezing point.

FOOD MEDICINE.—Dr. Hall relates the case of a man, who was cured of biliousness by going without his supper and drinking freely of lemonade. Every morning, says the doctor, this patient rose with a wonderful sense of rest, refreshment, and a feeling as though the blood had been literally washed, cleansed, and cooled by the lemonade and the fast.

MEDICAL PROPERTIES OF EGGS.—The white of an egg has of late proved the most efficacious remedy for burns. Seven or eight successive applications of this substance to the burn, and it finally excludes the burn from the air.

CHOLERA INFANTUM.—An eminent physician in the Health and Home gives the following remedy for cholera infantum: "The immediate remedies are such as allay the excessive irritation of the stomach and bowels, and sustain the strength."

How THE TIMBER GERS.—The present consumption of wood in the United States is enormous. One hundred thousand acres of the best timber is cut every year to supply the demand for railway sleepers alone.

LOOK WELL TO YOUR UNDERSTANDINGS! BOOTS AND SHOES For Men's and Boys' Wear.

The undersigned respectfully informs his numerous customers and the public generally that he is prepared to manufacture BOOTS and SHOES of the finest French calf skin boots, of the highest quality, in the VERY BEST MANNER, on the shortest notice, and at moderate prices as like work can be obtained anywhere.

PETER CAMPBELL'S IMPROVED BEE HIVE.

The undersigned has secured letters patent of the United States, dated December 14, 1870, for an improvement in the construction of Bee Hives, and claims for his invention advantages possessed by no other heretofore patented.

The principal feature of this Bee Hive is the arrangement by means of which it is thoroughly ventilated, thus precluding the possibility of the bees smothering, the comb moulding or the honey souring.

The peculiar construction of the box, particularly in the arrangement of the inner compartments, whereby it can be cleaned at any time without disturbing the bees, is another valuable improvement which will be obvious to any person who examines this Hive.

The inventor in the management of the inner compartments, whereby it can be cleaned at any time without disturbing the bees, is another valuable improvement which will be obvious to any person who examines this Hive.

GRADUATE OF THE BALTIMORE COLLEGE OF DENTAL SURGERY, respectfully offers his PROFESSIONAL SERVICES to the citizens of Ebsburg and vicinity, which place he will visit on the FOURTH MONDAY of each month, to remain one week.

RETIBUTION—Singular Case of a Murderer.

As illustrating quick retribution, rare presence of mind, and the value of vouchers for the following is a fiction: Caroline (—), a good-looking, well-proportioned young lady, was the maid with a fashionable young man.

One evening, after a dinner, she was sitting at her mistress's table for a few minutes, when she saw a pair of silk stockings belonging to her mistress, and she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

It happened that she was walking when she passed a group of men, and she heard these words: "There's a leg for a stocking, and a foot for a shoe."

In a moment the events of the day before her mistress was murdered were present to her mind. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

She had almost forgotten the stockings when she saw her mistress's foot in the stocking. She had almost forgotten the stockings when she saw her mistress's foot in the stocking.

THE HIGHEST FLIGHT EVER TAKEN ON RECORD was made in 1867, and Gray Lussan, in Paris, by the price they offered and the number of new and important facts, questioned at that time, as they carried with them a complete set of suitable apparatus, and over a surpassing knowledge of the art and experiment. They ascended to a height of 8,000 to 9,000 feet, and they had taken with them, in case of need, the effect of the rarefied air upon them, did not appear to be in any way affected. In the morning of the two experiments were accelerated; that of Gray-Lussan was always slow, 62 beats per minute, and that of Biot, naturally rapid, was 111. At a height of 20,000 feet a pigeon was liberated; it whirled through the air as if it were flying in the air, and it was found to be enabled to fly. Three weeks ago, Guy-Lussan went up alone, and his height of 29,000 feet, four miles or two thousand feet higher than the top of Chimborazo Mountain. The thermometer was thirteen inches higher than the freezing point, while at the same height it was 80 degrees.
