EBENSBURG, PA.

THURSDAY MORNING, : DEC. 1, 1870.

THE Speaker of the Senate, Gen. Harry White, has issued his writ, directed to the Sheriff of Philadelphia, ordering a special election to be held in the First Senatorial -District, on Tuesday, the 20th of this month, to supply the vacancy occasioned by the death of Wm. W. Watt. It is understood that both parties will make their nominations next week. We suppose that Grant will furnish the necessary number of United States troops to secure a fair and honest election. Why not? The district is a close one, and it seems to be conceded that the most unexceptionable and competent candidate will be successful. Let the Democrats of the district, therefore, embrace the opportunity that is now offered to them.

Beecher on Butler.

The new leader of the Radical party, Bensolution of the Alabama question.

Beecher in his discourse at Plymouth Church, sternly rebuked the invitation to war with England. He said: "Cursed of God and of al men may be the man who counsels the red hand of war, except when needed to fight for national existence. The only war we want is the war of righteousness. Let Kings war, let aristocrats war ; but the nobles of this great Republic should know the fellowship of man, and instead of the red hand of war let them put around their neighbors the arm of fellowpathy, and in love."

Rough on Grant.

present incumbent of the White House. An- case. drew Johnson was never made the target of so many poisoned darts as have been lately leveled at Grant by his own partisans. The following plain talk from the Chicago Re.

publican is but one of many cases in point: "It has been no uncommon thing for party organs in the United States to accuse Presidents of their own party of party offences, untruth to the party principles, or unfaithfulness to their actual or implied pledges in respect to individuals or policy. It is the common fate of acceding Vice Presidents to suffer under accusations of party perfidy in general, accompanied, for the sake of emphasis, with suggestions of official malfeasance. But the official career of General Grant presents a case that is peculiar. He stands charged not so much with infaithfulness to his party as official misconduct and personal meanness; and these charges are so we'l established, so universally believed and so freely enlarged upon, that the organs of his own party even which speak in his favor or attempt his vindication are the exception. No American President, taking for it the testimo ny of the Republican press, was ever more thoroughly despised or deserved it better than the one who now dishonors the highest place in the gift of the people by his tenancy.'

Amnesty in Mexico.

A short time ago, the Congress of Mexico, the home of chronic disorder and revolution, passed a law of political amnesty. It is not only so in name, but in substance and reality. By its liberal terms all the revolutionary Generals, as well as those who fought under the standard of Maximilian, are free to return to their homes and are not to be troubled for anything they have done. Even Santa Anna, so long exiled from his country, and nearly all the other exiles, can again make their abode in their native land, their political offences having been forgiven and their political disabilities removed. The law does honor to the members of Congress who passed it. Grant and his administration might learn wisdom from this liberal movement of the Congress of Mexico. But they will not, and the old, stale and hackneyed song of loyalty will be played on the Radical "harp of a thousand strings" until

The McGarraban Claim.

One of the most damaging features of Grant's administration has been his intimate connection with certain well-known jobs or schemes of questionable purity, and which, as they have rapidly succeeded each other, have formed the subject of extended newspaper criticism. The strictures of the Radical press in relation thereto have been both pointed and severe. Passing by the memorable gold speculation in New York, over a vear ago, in which he and his brother-in-law (Corbin) acted a mysterious part, the next notable instance of the kind was the San Domingo treaty, All his energies, as well as his official influence, were exerted in favor of that speculating project. One of his numerous military attaches who hang around the Executive department, and who, like many other things in this world, are more for ornament than use, was dispatched in a government vessel to that island, in company with a United States Senator, for the purpose of procuring statistical information, so called, in order to secure the ratification of the treaty by the Senate. Grant even transjamin F.
