Ayer's Cherry Pectoral,

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption.

Among the great discoveries of modern science, few are of more real value to mankind than this effeetual remedy for all diseases of the Throat and Lungs. A vast trial of its virtues, throughout this and other countries, has shown that it does

surely and effectually control them. The testimony of our best citizens, of all classes, establishes the fact, that CHERRY PECTORAL will and does relieve and cure the afflicting disorders of the Throat and Lungs beyond any other medicine. The most dangerous affections of the Pulmonary Organs yield to its power; and cases of Consump-tion, cured by this preparation, are public-ly known, so remarkable as hardly to be believed, were they not proven beyond dispute As a remedy it is adequate, on which the public may rely for full protection. By curing **Coughs**, the forerunners of more serious disease, it says unnumbered lives, and an amount of suffering not to be computed. It challenges trial, and convinces the most sceptical. Every family should keep it on hand as a protection against the early and unperceived attack of Pulmonary Affections, which are easily met at first, but which become incurable, and too often fatal, if neglected. Ten-der lungs need this defence; and it is unwise to be without it. As a safeguard to children, amid the distressing diseases which beset the Throat and Chest of childhood, CHERRY PECTORAL is invaluable; for, by its timely use, multitudes are rescued from premature graves, and saved to the love and affection centred on them. It acts speedily and surely against ordinary colds, securing sound and health-restoring sleep. No one will suffer troublesome Influenza and painful Bronchitis, when they know how easily

ney can be cured. Originally the product of long, laborious, and successful chemical investigation, no cost or toil is spared in making every bottle in the utmost possible perfection. It may be confidently relied upon as possessing all the virtues it has ever exhibited, and capable of producing cures as memorable as the greatest it has ever effected.

EXTRAORDINARY DISCOVERY .- With much pleasure we announce that Col. J. Franklin Reigart, of Lancaster City, Pa., now practicing as a Selicitor of Patents in this city, has succeeded in seizing, holding and permanently fastening the colors of nature upon metal, glass, or any material. Neipsey, Daguerre, and all the scientific photographers of Europe and this country have for years endeavored to secure this great disideratum, but could not accomplish it; but Col. Reigart

now exhibits the positive result, viz: pic tures in colors that are "Iridescent Pictures," the perfection of the daguerreotype, ambrotype and photographic arts, that excel the colors of the pearl, equaling the glittering colors of the rainbow, and cannot he copied SUGAR KETTLES AND CAULDRONS in the manufactured colors or pigments made by man. The discoverer informs us that he observed that the yellow light belongs to the animal kingdom, the blue light to the vegeeral kingdom, and red is the fire of hanimate nature, and that those three lights or colors are the forces of nature, and when combined ght that is the greater power. Danuerre fastened the shadow, but Reigart has fastened the substance, and he claims the discovery all their times and hues, and applying and most sincere thanks for the very liberal pa astening them permanently upon the surs tropage I have already received, and wil ace of metal, glass, or any other material. encleaver to please all who may call, whethby the use of any mineral, vegetable, or an- er they buy or not. lmal substance, for producing pictures in colors or for any other unful purpose, chen cal or mechanical, by any process whatever. The New Wonder Land,

A letter has been received by Pint ry, Secretary of the Smithsonian Inwhich gives a graphic account of the velcus Yellowstone region. The writer Mr. Elliott, the artist, who went to Hayden Exploring Expedition, description these columns some time ago. The of the Yellowstone country hithertoeven when brought by anthorities and able as Lieut, Donne, have been to g dinary that confirmatory testimony is auxiously looked for. Even new, an every respect for the new witness, whose evidence we shall quote, if narrative of the Hayden Expedition . deemed need at before we can also cept stories of wonder hardly short tales in the astounding phenomena (L.

> These, however, are but a pertion of the strange sights to be seen in the Yellowitte Valley. By way of still further mining their memory of the expedition, the party were favored, not long since, with a carb. quake, the character of which is could be several witnesses who, at the fire of the shock, were fifteen miles apaid. We have beard enough now to be satisfied that the region in question must be among the midwonderful of this wonderful central continu of ours, and to suspect that it deserves, it this wise, absolute pre-eminence. Professional Hayden's official report, which, we have will not be long delayed, will enable as arrive at a conclusion more positive-N. I.

San Francisco Egaminer says a gentleman of that city, about 25 years of age, with raldy complexion and curly red hair, who had an intractable ulcer on his left arm, reseing all previous modes of treatment, yielded a the request of trying the effect of transplaning a piece of skin to the ulcer from another person. The nicer was prepared in the mad manner by his physician, and a bit of sin about an inch square was taken from the arm of a fine healthy negro man and innediately spread over the ngly ulcer, and then carefully dressed and bandaged. The skin transplantation had the desired shed-Healthy granulation sprang up and the ussightly ulcer soon healed. A few mouths afterwards he went to his physician and told him that as soon as the sore healed the black skin commenced to spread, and it was increasing. About one third of his arm sat Store.
