THE EBENSBURG SCHOOLS.-Editor Freemen-Asa free man, to free men and women, free to give consideration to the schools of the free. The schools are in session, and all know it by the passing to and fro of the ele. I ask that you give this hastily written gladsome noise, but it is hoped that not this only will tell that the schools are open again. Respectfully, A. A. Barker. It is hoped that each free man and woman will come within the veil and see what faces outer display of manner. We are always best satisfied with others when we know them in their homes. That is not a fair estimate of a man which we learn from his movements abroad, or by uncertain report. We want to know what he does at home; also, we want to see the inner life. Thus it is with sured, before his ability or purpose is ques-tioned, the school should be visited and the teacher have an opportunity to explain the workings of his or her school and the necessity of the questioned movement. Schools should be visited, also, to give encouragement and appreciation to both teacher and publi -to see what is in the school that should not be in it and what is not in it that should be in it. They ought also to be visited to establish a common interest (in the success of children) between parent and teacher, for if this is not fixed in one way or another and none is better than to visit the teache whilst at work, there is a link of nower lost or broken, the breaking of which must prove detrimental to success. Therefore I would say to parents, visit your children in the school; talk freely to the teacher about your children and the school in general; stop the teacher on the street to ask about the intercessary equipments for hanging and ring- est that should be so dear to you and to him, but don't stop at asking; go and see the fine, lefty tower; so keep your ears open for any who think themselves excusable, bethe first chime of the beils on Sunday next. cause they have neither child, brother, sister nor ward attending school, I say to them, you also ought to show much interest. You are a member of a community, of a society if you please, and just as the schools of a ombunity progress and are successfully advanced, so do societies advance intelligence and refinement. In other words, give me a fair description of the schools of a town or community, and I have a complete index to the power of its morality and intelligence-

its government and refinement. It may be said that Directors are the proper persons to do the visiting. Let us see,n would not elect six men to direct the physical culture of your child and you be excluded from any direct knowledge of pro cesses. BUCKEYE

Patented Feb'y 1st, 1870. MANUFACTURED BY NIEBEL & PENNINGTON Tiffin, Ohio.

The Buckeye Grain and Seed Cleaner is far superior to any other Fabring Mill ever unde, having more than twice the screening surface of the ordinary mill, while it is meat and compact, and can be easily handled and lifted around by one man. Its capacity for cleaning is from 50 to 75 bushels per hour, and runs so easily that it can be turned by a boy ten years

Added to the above advantages, it is far cheap-Then any other Fanning Mill now made.
To sustantiate our assertions, we give the following as the opinions of several reliable gen-tlemen, residents of Semen county, Onio, who have given the "CLEABER" a thorough trial: We, the undersigned, have thoroughly tested the Buckeye Grain and Seed Cleaner, and believe it to be superior to any one in use for cleaning Wheat, or other small seeds, for market or for sowing, as it separates every grain of these, tookle or Rye from Wheat designed for seed, and all Red Dock from Timothy, and all wild vine seed from Flax, so as to render each par-ticular kind of seed designed for sowing pures pure and entirely free from filli and foreign
