"Well, you see, when I was about seventeen years old I was living in Utica, in the State of New York .---Though I say it myself, I was quite a good-looking girl then, and had several beaux. The one that took my fancy was a young minister, a very promising young man, and remarkably pious and steady. He thought a good deal of me, and I kind of took a fancy to him, and things went on till we were engaged. One evening he came to me and put his arms around me, and kind of hugged me, when I got excited and some flustrated. It was a long time ago, and I don't know but what I might have hugged back a little. I was like any other girl, and pretty soon I pretended to be mad about it, and pushed him away, though I wasn't mad a bit. You' must know that the house where I lived was on one of the back streets of the town. There were glass doors in the parlor, which opened over the street. These doors were drawn to. I stepped back a little from him, and when he came up close I pushed him back again, I pushed him harder than I intended to; and don't you think, girls, the poor fellow lost his belance and fell through one of the doors into the street."

THE Country Gentleman suggests a way to prevent hens from eating their eggs. It is to fill an egg with a solution of pepper, fod put the egg back in the nest. A Danbury man has tried this and says it works like a charm. He put a pretty good dose of pepper in the egg, and placed it in the nest of the criminal. Pretty soon the hen came around, and took hold. It was a brindle animal, with long legs, and somewhat conceited. It dipped in its bill and inhaled the delicacy. Then it came out doors. It didn't gallop out, we don't mean, but it came out-came out to look at the scenery, and see if it was going to rain. Its mouth was wide open, and the feathers on the top of its head stood straight up. Then, it commenced to go around the vard like a circus horse. Once in a while it would stop and push out one leg in a tone of astonishment, and then holler "fire," and start on again. The other hens came out to look on. Soon the hens from the neighbors came over the fence, and took up a position of observation. It was quite evident the performance was entirely new and unique to them. There is a good deal of human nature in hens. When they saw this hen dauce around and have all the fun to itself, and heard it shout "fire," and couldn't see the conflagration themselves, they filled up with wrath, and of one accord sprang upon it, and before the Danbury man could interfere, the brindle hen with the long legs was among the things that were. He says the recipe is effectual .--- Danbury News.

nal asks: Can it be that one of the fair belles of Lebanon has been trying to come up with the learned Dr. White of the Herald? "I will with pleasure allow you the exquisite beatitude of conducting my corporeal system over the space of ground intervening between my paternal domicile and the edifice devoted to divine worship, when the diurnal luminary shall have sought his norturnal resting place behind the occidental horizon."
