Every father of a family knows that there is a time in the life of his sons that gives him much trouble and some anxiety. We allude to the period of boyhood, when exuberance of spirits and thoughtleseness are at their hight, and when the studies imposed by Echoo! discipline are entirely insufficient to find adequate employment for their too active minds and bodies. And it is not possible, or even desirsole, to increase the already considerathe application of all well bred boys to the study of books and the acquirement of learning. It is not to be a ished that a youth of twelve should? grow up to be a conceited would-be pedant of twenty, and a bookworm of thirty years of age. Thus the task of fading fitting occupation for the leis ure hours of a boy is no inconsiderable one, as few pursuits into which a toy would plunge with eagerness are suited for putting in the way of so much impulsiveness and want of consideration as most boys possess. The question, then, of how to amuse our loys, is one of paramount importance and difficulty.

We would suggest to many parents who have been perplexed with this difficulty, to give their lads every possible opportunity of acquiring a mechanical trade. The industry and ingenuity of a boy of average ability may easily be made to furnish him with a never failing source of amusement of the best order. The boy who can produce or make something already begins to feel that he is somebody in the world, the achievement of a result is not a reward reserved for grown people only. And the education of mind, eye, and hand, which the use of tools mechanical appliances furnishes, is of a great and real value. beyond the good resulting from the occupation of leisure time. Having nothing to do is as great a snare to the young as it is to the full grown: and no greater benefits can be conferred on youths than to teach them to convert time now wasted, and often worse than wasted, into pleasant provement.

We say, therefore, to all parents:

The boy, whose time and mind are now occupied with marbles and kites, may be a Watt, a Morse, or a Bessemer in embryo: and it is certainly an easy matter to turn his thoughts and rausings into a channel which shall give full scope to their faculties. And to most boys the use of mechanical tools is the most fascinating of all oc- at a new and Lower Scale of Prices.

As logic and mathematics have a and the correct solution of problems, in that they teach men the habit of using their reflecting powers syste-These occupations teach boys to think, to proceed from initial causes to results, and not only to understand the nature and duty of the mechanical than anywhere else. powers, but to observe their effects: and to acquire knowledge by actual slight compared to that of the practical experience of the true mechan-

Our advice is, to all who have the c irpenter's or even blacksmith's tools. Give their mind a turn towards the solid and useful side of life. You will soon see the result in increased activity of their thinking capabilities, and the direction of their ideas towards practical results; and still more obviously, in the avoidance of idle mischief and nonsense (to omit all refergreat an extent, the pasttime of the generation which is to succeed us .-Scientific American.

THE INVINCIBLE SCHOOL MARM.-Ladies traveling through Canada by rail are often greatly annoyed by having their luggage unnecessarily searched, but one of the officials recently GET THEM FROM OUR PRESENT STOCK. got his deserts. It happened that a Yankee school teacher, on her way from Kansas to Vermont, passed traband. When the officer demanded her key she begged him not to open it, assuring him that it had come through from Kansas, contained sinply clothes and books and was so full that it would be very troublesome to repack it. But he sternly demanded the key, and maliciously pulled everywould soon move. "What is that to me?" said the quick witted woman; "I have a check for that trunk, and hold the Grand Trunk Railway responsible for its safe delivery. I will not take the key, and you may do as you please with the trunk." Report say that official was very weary and red in the face and rather profane ere he finished packing that trunk.

A cowardly fellow having kicked a news boy for pestering him to buy an evening paper, the boy waited until another boy accosted the "gentleman," then shouted, in the hearing of all bystanders: "It's no use to try him. Jim, he can't read !"

A NOVEL WEDDING TOUR.

ROMANTIC AND PRACTICAL.

Mr. Newbury, of Davenport, Iowa, like Burns, of Gettysburg, is a practical man, under which guise he won the heart of Miss Zamie Severance, a brilliant lady and deservedly popular school teacher, and about five weeks age they were made man and wife. It had been the custom of Mr. New-

bury to make an annual barge trip to New Orleans, and he conceived the novel and romantic idea of making a wedding tour in the same way. The subject was broach to his friends, and also to the friends of the bride, and as it met with much favor on all sides he decided to carry the plan out. A barge was accordingly fitted up in sumptuous style and everything made in shipshape order for the reception of the newly married couple. In addition to the luxuries of life a cargo of onions and potatoes were stowed away in the hold, to be disposed of on arrival at New Orleans In this manner was profit combined with pleasure and common sense with romance.

In addition to Mr. and Mrs. Newbury the craft carried fourteen passengers, three of whom were ladies .-Mr. Hall, an experienced Mississippi navigator, piloted the barge and commanded a crew of four men, all told. The balance of the party was composed of ambitious followers of Nimrod, who had pledged themselves to keep the cuisine well supplied with wild

Immediately after the wedding ceremony had been performed the bridal party and their retainers were escorted to the barge, which was pushed into the stream, and slowly floated past the city on its way to the gulf. The only steam on board was that which issued from the mouth of the teakettle, and hence dreams of boiler explosions did not haunt the slumbers of the voyagers. After a highly enjoyable trip of four week's duration, the and, bride, reached St. Louis on Saturday night. As the journey was only continued by daylight, the length of time consumed was longer than an-

their voyage, and expect to reach New Orleans in about two months. They log will be an interesting document to peruse when the trip is completed, and Mr. and Mrs. Newbury will doubtless carry it back to Davenport with them on their return next spring.

Taking all circumstances into conromantic one on record.

ton season is a generic thing; women come to see the place for the sake of the system of calling, official society is accessible to all, and the introductions obtained there to people of the more select circles, when fortified by wealth and pertinacity, upon the whole charmed round of pleasure. Society in other cities is totally unlike society in Washington. There it is an interchange of kindliness between households of friends; it is the festivity of happy anniversaries, the union of families in new ties, the cherishing of long except so far as the small number of residents is concerned—its whole pur- | HARDWARE, pose and meaning are anomalous; each administration brings a new following, each Congress has a new rabble at its heels; friendships are acci- CARPETS AND OIL CLOTHS, dents of the day, diplomacy is carried on by dining; every party has a pol- GLASS WARE, YELLOW WARE, itical purpose, every civility has a dou-EVERY DAY SUITS will be cleared out at astonishingly low prices considered contrary, there is more of that than CARBON OIL, &c., &c. elsewhere, for it is sustained by the and promptly filled on the shortest notice and chosen intellect and beauty of the most reasonable terms continent. You may meet admirals there who have sailed round the world, generals who have fought mighty batmen and women who are figures of romance of their travel, the heart beat lay figures for aspirants to measure, and the property of reporters. In such a society, of course, all asperities deference is accorded to the opinion of a woman on public matters as if she already possessed her right of suffrage; there is an exhilaration in meeting and avoiding and overlooking, dom unites with a gentle, even if politic courtesy, which it is delightful to
