CARROLL TWP., Oct. 19, 1874. EDITOR FAREWAN-Dear Sir: As you did not put in an appearance with other Ebensburg folks at the Adams' pienic, I have deemed it not out of slace to let you know that I was there with the rest, which rest consisted of something less than 18,000 people—just how many less I am not prepared to say, but certain I am that all who were there seemed to be about as happy as they make 'cm. The string band from St. Augustine furnished excellent nished excellent music, but dancing was not indulged in to any great extent. Ice was not needed to keep things cool, either, as nature had furnished a full supply the night before, which same

running a foot-race.

By the way, Mr. Editor, a noticeable feature in affairs of this kind is the fact that the sporting affairs of this kind is the fact that the sporting men of Altoona always manage to have things their own way when they come to Cambria county. They will never make any concessions, not even the paltry distance of ten feet further than they think they can win any given race in. It they desire to preserve their reputations I hope in the future they won't object to running their horses a little beyond the stipulated quarter of a mile. If the wind and bottom of their horses can't stand the extra strain they had better keep them within the confines of the Mountain City.

Our friend Mr. Patrick Lynch, of Chest township, I am told, has, after the usual billing and cooing in such cases made and provided, entered into a matrimonial alliance with Miss Mary Kline, of the same balliwick. Peace to their ashes!

Our friend Mr. Hopple, I think, is beginning to despair, and no wonder, for he might as well try to throw a 15,00 pound elephant across the ozambique channel as to hope for his election to e office of Puor House Director in this county on the Republican tibles. EXPLANATION AND ELABORATION

OF WANAMAKER & BROWN'S NEW PLAN

Mouses doing a credit business were provide for losses on bad debts, interest on long-standing Resounts, expital locked up, ste. To hear such losses themselves would drive them out of business. Therefore a per cent, is added to the price of each criticle sold, to cover this leakage, and Cosh Repers whether they know it or not, really pay the bad debts and the interest on the long credits of the other customers! Under the Cash Payment system one pays only for what As gets, and contributes nothing to a "Sinking

By this Baston! Change we shall lose some of our customers no doubt, but we will gets ton where

Bring Money for Clothing, and we will supply it at prices possible under so man plan The feteres of this feeture of our plan all will praise. It is simply inesting all slike-exacting mathing from indisposition to bargain or ignorance, and, at the same time, conceding all that shrewdness on the threwdest customer's part could possibly extert, because the "One Price" which we mask on

our goods, shall invariably be NOT the "First" Price, but the LAST and LOWEST PRICE.

NOT the "TOP" Price, but the VERY BOTTOM PRICE.

In other words, Salesman or "Headman," have never been allowed, under ordinary element atsness, to fall below a certain figured it is at that, or at a lower figure that we now determine to mark our goods, calculating the cost to the exact penny, and fixing the price at the low minimum profit on which business on a large scale can be conducted.

We know that the larger business we aim for and anticipate, will require a large increase in the number of customers, and we shall therefore see to it that the "One Price" is based on the Smallest Front, calculated to the exact and lowest penny, which will not be difficult to do with universal Caub Payment for the rule. The price will be marked in plain figures and no alteration allowed. NOTE.—Whenever the exigencies of the search, the state of trade, or the money market may demand, the right is reserved to go through our sack before or after homeses hours and mark down any lot or late of goods, changing the figures on all the liabile, so that the new rates are the same to all, and all buy aithe at the mark down prices.

If the garment is not exactly what you thought, if your taste changes, if the "home folks" profer another color or another shape, if you find you can buy the same material and style elsewhers for less money, if you conclude you don't need it after you get home, if the senson changes suddenly and you wish you had not bought it, bring it back unworn and uninjured, and the full amount of money you paid will be returned on the spot. What more can we do for our customers than this, when we make our clothing so that they can drew the money value with it equally as watt se with a check on the bank?

THE ADVANTAGES

incident to a system having for its cardinal points these which we have now explained, are simply innumerable.

IT MAKES CLOTHING CHEAP.

Sinking the priors several degrees below what they have been heretofore, or sould possibly be under the old By dispensing with certain clerks no longer needed, it reduces "Store Expenses."
By enforcing CASH Payments, the bad debts are avoided.
By putting plenty of ready money in hand, it enables us to buy goods at figures that cradit sees

Wherein our plan differs from others: Wherein our plan differs from others:

(a) It combines all the good points which exist, separately, or in partial combinations, and it adds come new and important features.

(b) It gives such a guarantee as no house in the world, to our knowledge, ever ventured to give as a rule.

(c) It makes our goods equivalent to checke on a hank, whenever they are presented univers or uninjured.

(d) It has the great advantage of an immense business already established, to custain the "New Constitution," and under no other circumstances could so many redical concessions to customers be made.

We have for years been working tourness the present point, and though neutrally falling into the current methods of trade, we observed and noted the defects of the old systems, and have been carefully weighing for a long time these newer plans, and preparing for this
