BURGLARY IN JOHNSTOWN .- About 3 o'-Hon. John Lemon has presented them with ville, noticed a light burning in the jewelry toons, the famous "Mountain City" club, on wards with the main portion of Johnstown Saturday last, and vanquished them in a borough. When Mr. Burns approached the store the light was extinguished, or at least hidden, but after he had passed by it again flared up as brilliant as ever. Not being unseasonable an hour, especially when it was evident that he was, if possible, to be kept in the dark in regard to what was going on inside, Mr. Burns deemed it advislives in the vicinity, and ere long that gentleman and another named Myers appeared upon the scene in company with Mr. Burns. By this time quite a number of persons returning from work had collected on the spot, and it was therefore no the track, from which perilous position he hard matter to secure men enough to stand guard over the prisoners while Captain Butland went home to procure a light for the ourpose of making a still further search of the premises. Scarcely had he departed, however, leaving his revolver in the pos-session of young Myers, when another of the gang, who had evidently been standing guard at the north end of the bridge, made his appearance and with revolver in band demanded the release of the prisoners. As this demand was emphasized by several shots from the revolver, one of which passed through the coat collar of a young man who was helping to guard the prisoners, it was concluded to make a virtue of necessity and let the burglars go. As they were moving off, however, young Myers presented his respects in the shape of a well directed bullet, which took effect in the head of the man with the hat full of jewelry, who was subsequently recaptured and marched off to the ock-up, from whence, in default of \$1,500 bail, he was brought to the jail in this place by Mr. Wm. Grabb, of Johnstown, on Tuesday afternoon. The prisoner gave his name as John Wilson and claims St. Louis as his home. It is believed that he made his appearance in Johnstown for the first time on the evening preceding the raid on Mr. Heiple's store. For burglary and for assault and battery on several of those who aided in his arrest he will have to answer at the next term of the District Court. As 'o the whereabouts of his accomplices nothing

A CAMBRIAN KILLED IN KANSAS.-From clock on Tuesday morning last, an employe the St. Mary's (Kansas) Times of July 31st at the Rolling Mill, named Burns, while on we copy the following account of the sudden his way from his work to his home in Kern- and shocking death of the youngest son of our old friend and much esteemed patron, Mr. Michael J. Storm, to whom, as well as to all the bereaved relatives of the deceased, we tender our heartfelt sympathies. John Storm, the victim of this sad accident, was born and reared in this county and that he was a credit to the land that gave him birth is fully attested by the high esteem in which he was held by his employers, friends, fellow workmen and all others who knew him in his Western home. May be rest in peace eternal.

> The saddest death by accident that we have ever been called upon to chronicle, befell one of our most estimable citizens, Mr. John Storm, on last Saturday, at about II o'clock. The par-ticulars of the accident we obtain from his brother-in-law. Mr. Myors, who was with him at the time, and are substantially as follows: Mr. Storm was Supervisor of this end of the first division of the K. P. R. R., and on Saturday morning was in charge of a gang of men with a construction train, gathering up the old iron along the line of the road and conveying it to the rolling-mills at Topeka. They had got a load and were taking it down when the accident occurred. After leaving Rossville, Mr. Storm took a seat upon a stock car, just in front of the flat-car loaded with the old iron. While the train was running at the rate of eighteen miles train was running at the rate of eighteen miles an hour, the front end of a rail upon the flat-car got outside the standard. Mr. Storm, sec-ing the danger that must inevitably follow if ing the danger that must inevitably follow if the rail struck the ground and fell between the wheels, got upon the car, and, stooping over, attempted to pull the rail back inside the stand-ard. Just at this moment the car passed over a rough joint in the track, and the end of the rail, slipping from his grasp, struck the ground, the centre of the rail meantime catching upon the middle standard of the car, thus causing the rear end to swing around with the rapidity and force of a bolt of lightning, striking him upon the back of the head, mashing his skull and almost severing the top of his head, killing and almost severing the top of his head, killing ilm instantly.

> Immediately upon the arrival of the train at

Tope ka. the heart rending intelligence was telegraphed to his father, who imparted the terrible news to the wife of the decased. It is impossible to describe the agony of the widow who was thus suddenly apprised of the dreadful accident. Almost the entire male population of our town were assembled at the deaction. tion of our town were assembled at the depot at 3 o'clock, to receive the remains of a kind neighbor, a worthy citizen and a generous friend, who had left us so recently, full of life, hope and strength. The corpse had been packed in ice at Topeka and was accompanied by an elegantly fluished coffin, furnished by the an eleganty haished collin, furnished by the railroad company. It was conveyed to his late home, where numerous friends of the family remained with it through the long and silent watches of the night, performing the various ceremonies of the wake and doing all in their power to comfort and console the grief-strick

en wife and relatives.

Sunday atternoon, at 4 o'clock, was the time fixed for the funeral. The regular trains from east and west brought large numbers of friends and acquaintances of the deceased, and at 330 o clock in the afternoon a special train, consisting of three ears leaded with a special train, consisting of three ears leaded with a special train. ing of three cars, leaded with men, women and children from Lawrence and Topeka, and accompanied by Supt. Dorrance, arrived. Soon after another train from Wamero, loaded with railroad men and citizens from that place, came down. The attendance of our own citizens was also very large. Soon after 4 o'clock the pro-cession formed in front of the late residence of the deceased and moved to the church, where solemn and impressive ceremonies were per-formed by Fathers Stantebeck and Kuppins, The services were very beautiful and impressve the priests in their robes, the candles dimburning, the incense smoking, the alter beauilly ornamented with images of the Saviour of man, the saints and apostics, and the coffin containing the corpse, all combined to present a picture of grandour and selemnity that appeared to impress every hear in the large con-gregation. The funeral address, delivered by Father Kuppins, was brief and in good taste. The good character of the decreased, his kindness to his family, his faithfulness to his em-players, his loss to his family, and the commu-nity, the suddenness and tormble character of his death, were briefly dwell upon, and a fer-vent and elequent appeal made to the audience

I understand that an English manufacturing company has recently purchased from Mr. R. B. Good enough. The blackberry season approacheth, and an abundant yield is anticipated. A regular trade in this commodity has been established at Por-tage, and those who aspire to office should not fall to meander in that direction and invest in a few quarts of the delicious fruit, by which means they will aid in brightening up business and no doubt add to their own popularity. Farmers in the city to-day bring distressing news regarding their crops. Their story is that on thousands of acres of bottom land in this region nothing can be saved. The loss will reach several millions of dollars, and hundreds of families will be left destitute. Wheat by the stack and in the shock have floated past in immense quantities, and a great deal of hay has also gone down. There is but little driftwood affoat, and to that fact is due the safety of the bridges. VERY LOWEST FIGURES.
