The Instinct of Acquisition.

A ferret strangled herself by trying to squeeze through too narrow an opening. She left a very young family of three orphans. These I gave, in the middle of the day, to a Brahma hen which had been sitting on dummies for about a month. She took to them almost immediately, and remained with them rather more than a fortnight, at the end of which time I had to cause a separation, in consequence of the hen having suffocated one of the ferrets by standing on its neck. During the whole of the time that the ferrets were left with the hen the latter had to sit upon the nest; for the young ferrets, of course, were not able to follow the hen about as chickens would have done. The hen, as might be expected, was very much puzzled at the lethargy of her offspring. Two or three times a day she used to fly off the nest, calling upon her brood to follow; but upon hearing their cries of distress from cold she always returned immediately and sat with patience for six or seven hours more. I should have said that it only took the hen one day to learn the meaning of these cries of distress; for after the first day she would always run in an agitated manner to any place where I concealed the ferrets provided that this place was not too far away from the nest to prevent her from hearing the cries of distress. Yet I do not think that it would be possible to conceive of a greater contrast than that between the shrill peeping note of a young chicken and the hoarse growling noise of a young ferret. On the other hand, I cannot say that the young ferrets ever seemed to learn the meaning of the hen's clucking. During the whole of the time that the hen was allowed to set upon the ferrets she used to comb out their hair with her bill in the same way as hens in general comb out the feathers of their chickens. While engaged in this process, however, she used frequently to stop and look with one eye at the wriggling nestful with an inquiring gaze expressive of astonishment. At other times, also, her family gave her good reason to be surprised; for she used often to fly off the nest suddenly with a scream—an action which was doubtless due to the unaccustomed sensation of being nipped by the young ferrets in their search for the teats. It is further worth while to remark that the hen showed so much uneasiness when the ferrets were taken from her to be fed that at one time I thought she was going to desert them altogether. After this, therefore, the ferrets were always fed in the nest, and with the arrangement the hen was perfectly satisfied—apparently because she thought that he had some share in the feeding process. At any rate she used to cluck when she saw the milk coming, and surveyed the feeding with evident satisfaction. Altogether I consider this a very remarkable instance of the plasticity of instinct. The hen, it should be said, was a young one, and had never reared a brood of chickens. A few months before she reared the young ferrets she had been attacked and nearly killed by an old ferret who had escaped from his hutch. The young ferrets were taken from her several days before their eyes were open. —*Nature.*

AN INDIAN MILL.—On the farm of Mr. Hollis Smith, near Marengo, Calhoun county, Michigan, there exists an interesting monument of aboriginal life known in the locality as "The Indian Mill." As described in a letter by Mr. W. H. Payne, of Adrian, it consists of a great block of free-stone, about fifteen feet in length and five feet in width. Near one edge of this block there is a hole fifteen inches deep, having a diameter at the top of twenty inches, resembling a large mortar. "At the time of my visit," writes Mr. Payne, "this 'mill' was filled with water from recent rains. This was measured as it was dipped out, and amounted to fourteen gallons. Early settlers report that this spot was frequented by Indians, who brought their corn to be ground or pounded in this stone mortar. In the vicinity were seen many broad smooth-faced stones, whose surfaces seem to have been highly heated. It is not improbable that these were used by Indians, whereon to bake their cakes of corn. The grain was pounded as follows: A spring-pole was attached to one of the trees which stood near, and from the free end of this was suspended over the mortar, by means of twisted bark, a stone of convenient form and size. Stones suitable for this purpose lie beside the 'mill,' and it is probable that they once served the purpose above indicated."

A BANK which pays the check of a customer after the officers know that he is dead cannot charge the same to his account, except by leave of his executors or administrators, but must hold it as an evidence of debt, and share the fate of other creditors. Thus, A has on deposit in a bank the sum of $10,000, and has issued checks against it for that amount. The checks are afterwards presented for payment. If the bank pays the money the administrator duly appointed may still draw out the $10,000 as part of the estate he represents, enforcing the payment by an order of the court if the bank refuses his draft, and the bank must wait a year for its reimbursement, and then, if the estate does not pay in full, take its pro rata share with the other creditors. In fact, it stands precisely like any private person who has bought up the check after the death of the drawer. The law only protects the payment where the bank, in the ordinary course of business, has paid the checks in good faith without having heard of the drawer's decease

CALIFORNIA!!

THE CHICAGO & NORTH-WESTERN RAILWAY

Embraces under one management the Great Trunk Railway Lines of the WEST and NORTH-WEST, and with its numerous branches and connections, forms the shortest and quickest route between Chicago and all points in *Illinois, Wisconsin, Colorado, Utah, Nevada, California, Oregon, China, Japan and Australia.* Its

Omaha and California Line

Is the shortest and best route for all points in *Northern Illinois, Iowa, Dakota, Nebraska, Wyoming, Colorado, Utah, Nevada, California, Oregon, China, Japan and Australia.* Its

Chicago, Madison and St. Paul Line

Is the short line for *Northern Wisconsin* and *Minnesota* and for *Madison, St. Paul, Minneapolis, Duluth,* and all points in the Great North-west. Its

Winona and St. Peter Line

Is the only route for *Winona, Rochester, Owatonna, Mankato, St. Peter, New Ulm,* and all points in Southern and Central Minnesota. Its

Green Bay and Marquette Line

Is the only line for *Janesville, Watertown, Fond Du Lac, Oshkosh, Appleton, Green Bay, Escanaba, Negaunee, Marquette, Houghton, Hancock* and the *Lake Superior Country.* Its

Freeport and Dubuque Line

Is the only route for *Elgin, Rockford, Freeport,* and all points via Freeport. Its

Chicago and Milwaukee Line.

Is the old Lake Shore Route, and is the only one passing through *Evanston, Lake Forest, Highland Park, Waukegan, Racine, Kenosha,* to Milwaukee.

Pullman Palace Cars

are run on all through trains of this road.

This is the ONLY LINE running these cars between Chicago and St. Paul, Chicago and Milwaukee, or Chicago and La Crosse.

At Omaha our Sleepers connect with the Overland Sleepers on the Union Pacific Railroad for all points West of the Missouri River.

On the arrival of the trains from the East or South, the trains of the Chicago & North-Western Railway leave Chicago as follows:

For Council Bluffs, Omaha and California, Two Through Trains daily, with Pullman Palace Drawing Room and Sleeping Cars through to Council Bluffs.

Some fury for revenge exists in what we may call the Badawi and the semi-Badawi stages of society, from the "Red Indian" to the Corsican. It is a religious duty. The ghost of the murdered man cannot rest; he haunts the family; even the screech owl and the cuckoo are the voices calling for vengeance. The Albanian or Montenegrin mother will still hang up the blood-stained paternal shirt, and show it to her sons till they take the murderer's life. Hence we shall see that a brother, not a friend, is compelled to behead his wounded brother who ran the risk of falling into Ottoman hands, and when a criminal was shot a multitude took part in the execution. If blood-money (patiti Krvarinu) was accepted, a long ceremony took place. On a fixed day the man-slayer, wearing the fatal weapon round his neck, crawled up to the head of the assembled family, and implored his pardon. The latter, taking the arm, cried in a loud and terrible voice, "Brethren! here is the slayer of our kinsman, will ye that I put him to death?" The reply was, "Pardon him, in the name of God!" The homicide then kissed the feet, the knees, the hands, and finally the lips of the "Domachin," (house-master;) and thus peace was made. Then all sat down to a copious feast, paid for by the murderer, in addition to the 50 or 60 sequins of "blood-money." yet the national saying was, and still is, "Onse ne osveti, onse ne posveti"—Qui non vindicat non sanctificatur. The universal practice is a curious comment upon the theory of Christianity.—*Cornhill.*

There are two little arteries which supply the whole face with blood, one on each side; these branch off from the main arteries on each side of the wind-pipe, and running upward toward the eyes, pass over the outside of the jawbone, about two thirds of the way back from the chin to the angle of the jaw, under the ear. Each of these arteries, of course, supplies just one half of the face, the nose being the dividing line; the left nostril is supplied with blood by the left artery and the right nostril by the right artery. Now, supposing your nose bleeds by the right nostril, with the end of the fore finger feel along the outer edge of the right jaw until you feel the beating of the artery directly under your finger, the same as the pulse in your wrist, then press the finger hard upon it, thus getting the little fellow in a tight place between your finger and the jaw-bone; the result will be that not a drop of blood goes into that side of your face while the pressure continues; hence the nose instantly stops bleeding for want of blood to flow; continue the pressure for five or ten minutes and the ruptured vessels in the nose will by that time probably contract so that when you let the blood into them they will not leak. Bleeding from a cut or wound anywhere about the face may be stopped in the same way. The Creator probably placed these arteries as they are that they might be controlled. Those in the back of the head, arms and legs are all arranged very conveniently for being controlled in like manner.

THE DAY YOU WERE BORN.—An exchange tells us that the following is an infallible method of discovering the day of the week on which any person was born, or the day of the week on which a given day of the month any number of years previous occurred. To the number representing your age in years at your next birthday add one-fourth for leap-years; this amount divided by seven, and the remainder, counted back from the day of the week on which you were born. For instance on your next birthday you will be twenty-four years old; this divide by 4, and the quotient, 6, added to 24 gives 30 as the amount, which, divided by 7, the number of days in a week, gives four weeks and a remainder of two days. Now, if your birthday this year comes on Monday, count back two days, and you have the day on which you were born—Saturday. Try it.

TO REMEDY badly-shutting windows, cover the bottom of the sash with fresh putty, chalk the corresponding face of the frame, shut down the window fast and leave it long enough for the putty to harden. The fresh putty will accommodate itself to any inequalities and harden into a permanent, close fitting joint, any excess being pressed out between the sash and the frame. The chalk on the latter will prevent the putty adhering to it and thus interfering with the opening of the window.

TO KEEP HAMS.—There is no better way to keep hams through the summer, free from taint or insects, than by hanging them up in the smokehouse, which is of course to be kept perfectly dark. Where there is no smokehouse or dark room, sew each ham up in a canvas bag and thoroughly whitewash it. We have also kept them perfectly by rubbing into them wood ashes, packing them in barrels and covering them with ashes.

CURE FOR CHILBLAINS AND NEURALGIA.—Take one ounce each of chloroform, hartshorn, turpentine, oil of spike and sweet oil; shake well, heat it by the fire, and apply three or four times a day. I have tried it, writes a correspondent, after suffering for eleven years, and have experienced a permanent cure.

A SOVEREIGN REMEDY for stains from gallnut ink and iron-mould is a solution of one part of oxalic acid in ten parts of hot water. Dip the stain in this solution, and after a few minutes it will disappear. Afterwards rinse the spot in a solution of soda to kill the acid and restore the color if affected.

July 30, 1868. Main Street, Ebensburg.

Manhood: How Lost, How Restored.

Just published, a new edition of Dr. Culverwell's Celebrated Essay on the *radical cure* (without medicine) of SPERMATORRHŒA or Seminal Weakness, Involuntary Seminal Losses, IMPOTENCY, Mental and Physical Incapacity, Impediments to Marriage, &c.; also, CONSUMPTION, EPILEPSY and FITS, induced by self-indulgence or sexual extravagance, etc.

☞Price, in a sealed envelope, only six cents.

The celebrated author, in this admirable Essay, clearly demonstrates, from a thirty years' successful practice, that the alarming consequences of self-indulgence may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain, and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately, and radically.

Sent under seal, in a plain envelope, to any address, on receipt of six cents, or two postage stamps. Address the Publishers,

F. BRUGMAN & SON, 41 Ann St., New York; Post Office Box 4586.

LOOK WELL TO YOUR UNDERSTANDINGS

JOHN D. THOMAS,

Boot and Shoe Maker

THE Undersigned respectfully informs his numerous customers and the public generally that he is prepared to manufacture BOOTS and SHOES of any desired size or quality, from the finest French calf-skin boots to the coarsest brogans, in the VERY BEST MANNER, on the shortest notice, and at as moderate prices as like work can be obtained anywhere.

Those who have worn Boots and Shoes made at my establishment need no assurance as to the superior quality of my work; others can easily be convinced of the fact if they will only give me a trial. Try and be convinced.

☞Repairing of Boots and Shoes attended to promptly and in a workmanlike manner.

Thankful for past favors I feel confident that my work and prices will commend me to a continuance and increase of the same.

JOHN D. THOMAS.

CRAMPTON'S IMPERIAL SOAP

IS THE "BEST."

This soap is manufactured from pure materials, and as it contains a large percentage of Vegetable Oil, is warranted fully equal to the best imported Castile Soap, and at the same time possesses all the washing and cleansing properties of the celebrated German and French Laundry Soaps. It is therefore recommended for use in the Laundry, Kitchen, and Bath-room, and for general household purposes; also, for Printers, Painters, Engineers, and Machinists, as it will remove Printers' Ink, Grease, Tar, Oil, Paint, etc., from the hands. Manufactured only by

CRAMPTON BROTHERS,

2, 4, 6, 8, and 10 Rutgers Place, and 33 and 35 Jefferson Street, New York.

For sale by KOONS & RUOFF, 292 N. Delaware Avenue, Philadelphia, by MYERS & LLOYD, Ebensburg, and by grocers generally. [10-29.6m.]

To Consumptives.

THE advertiser, having been permanently cured of that dread disease, Consumption, by a simple remedy, is anxious to make known to his fellow sufferers the means of cure. To all who desire it, he will send a copy of the prescription used, (free of charge,) with the directions for preparing and using the same, which they will find a SURE CURE for CONSUMPTION, ASTHMA, BRONCHITIS, &c. Parties wishing the prescription will please address Rev. E. A. WILSON,

194 Penn St., Williamsburgh, New York.

Errors of Youth.

A GENTLEMAN who suffered for years from Nervous Debility, Premature Decay, and all the effects of youthful indiscretion will, for the sake of suffering humanity, send free to all who need it, the recipe and direction for making the simple remedy by which he was cured. Sufferers wishing to profit by the advertiser's experience can do so by addressing in perfect confidence,

JOHN B. OGDEN, 42 Cedar st., New York.

J. GALLITZIN LAKE, ATTORNEY AT LAW, Ebensburg, Pa. Office with Register and Recorder, in Court House,

A DOGGISH STRATEGY.—At one of the convents in France twenty poor people were served with a dinner at a certain hour every day. A dog that belonged to the convent did not fail to be present at the time of this regale, to receive such of the scraps as were worth and then thrown to him. The gate, however, were poor and hungry, and of course they were not very well-fed, so that their pensioner did not get more than scent the feast of which would fain have partaken.

The portions were served out to person by means of a bell, and as delivered outside by means of what religious houses is called a turn machine like the section of a cask, by turning round exhibits a that is placed on the concave side does not discover the person who moves it.

One day this dog, having made but a few scraps, remained until paupers had all gone, took the bell in his mouth and rang the bell. The stratagem succeeded, and he obtained his dinner. The next day he repeated it again and met with the same fortune.

At length the cook, finding that twenty one portions were served out every day instead of twenty, was determined to discover the trick; and doing this he had no great difficulty for, lying in wait, and noticing paupers as they came for their portions, and seeing no other living except the dog, he began to suspect the truth. His suspicions were confirmed when he saw the animal served with great deliberation until the others had all gone, and then pull it.

The matter was related to the community and in order to reward him for his ingenuity, the dog was permitted to ring the bell every day for dinner, upon which some broken victuals were always afterwards served out to him.

A BRIEF HISTORY OF THE USE OF WINDOW GLASS.—Glass was first moulded instead of blown. Within the fourth century were the first to anything of it and then it was only casually mentioned—as "the soul that objects through the eyes of the as through a window furnished with glass." When the openings for admitting light first began to be filled with *something,* waxed linen or paper was in common use, while the dwelling of the royal and patrician, a very thin shell was used in small quantities, and also a semi-"white stone formed from lime talc, such as is still found in the houses of the peasantry of Russia.

It has long been a mooted question whether glass was in use in ancient Rome for windows, but by late discoveries in the ruins of Pompeii it is evident that there was window glass but that it was moulded instead of blown.

Glass-blowing was known in France as early as the thirteenth century, and yet so rude was the art that for a hundred years after it was made use of even in royal palaces. When the Duchess of Berry retired to the convent of Montpensier special mention was made of the waxed linen in her windows. Even at the end of the eighteenth century there were men in the provincial cities of France who followed the profession of *chassissers*—that is, the profession of pasting oiled paper in window sash.

Parchment and horn have also been used to admit light. In Japan some transparent paper nearly like rice silk is in use. It seems difficult to believe that what seems now so indispensible to our comfort, was unknown a little more than a time since a great luxury.

RED PEPPER AND POULTRY.—The virtues of red pepper in raising poultry are set forth in this wise by a Farmer," in a recent number of the Woonsocket *Patriot*:

"I do not know if other persons raise poultry and pet birds are so much dependent as I am on red pepper. But I have found so much benefit from the use in my poultry yards and bird cages, that it may not be amiss to call the attention of others to its many properties. I do not speak of the article that is sold in the drug stores and sometimes not remarkably fresh, but of the capsicum that grows in our gardens. I have tried all the different varieties, and the most pungent and efficacious is the small kind usually known by the name of 'bird's pepper.' The plant in itself is a beautiful object. It grows about two feet high, and in autumn its bright little scarlet berries look like coral beads, peeping out under the dark green foliage. I have one plant in a pot for an ornament for a flower stand. The seeds possess a stimulating and reviving property, and I find that two or three given to a newly-hatched chicken, especially if they are weakly, have a most happy effect. If a hen looks feeble after moulting, six of these berries or pods, given daily in some corn meal and sweet milk, improve her wonderfully. Last summer two of my canaries began to droop. Every day I gave them each one seed of the 'bird's pepper,' and in less than a week they were quite well. The same remedy is invaluable for mocking birds.

A LADY says: I would like to tell your readers how I have kept my house-plants thro' the coldest night so far this winter: I set them on a table in the center of the room, hung the curtains at the windows, leave a lamp burning in the middle of the room and find my plants all right in the morning. Cost, one cent per night.

A SURE cure for pain in a hollow tooth is a mixture of powdered alum and common salt, applied with a little of cotton wool. A sensation of coldness follows the application, after which the pain gradually subsides
