-- Now that all our readers have, as we

hope, enjoyed a merry Christmas and a happy New Year, we deem it proper to call the attention of those among them who are interested in such matters to the fact that Mr. Godfrey Wolff, the popular Altoona clothier, has still on hand a large stock of elegant winter clothing which he wishes to dispose of without delay, and for which he will accept much lower prices than the same articles brought before the polidays. Try him. -- The Tribune wanted to know in its Sat-

urday's issue whether it would be out of order to remark that there was a likelihood of the Ebensburg and Cresson Branch being snowed up on that day. Certainly it would be out of order for that journal to tell the truth about anything pertaining to Ebensburg, and as the Branch road was unquestionably snowed up at the time indicated, the fact does not seem to be a proper subject for remark, unless the Tribune is willing to

The prisoners were taken to Indiana and put in jul there, after which the officers, to-gether with Kinney, started for Gien Hope, in Clearfield county, where they arrived on Tues-day. At this place two more men were secured, and with this reinforcement the party started out into the pine regions for the house of a man mamed Sands, which they reached about mid-night on Tuesday. Entering the building they found Scott Mardis, alias Scott Smith, and Adam Leck, alias Walters, sitting at a stove eating apples. They were arrested, and then the thrilling temperance drama of "The Drunkard's Warning" and as Mr. Mackin-tosh Moke in the new and original side-splitting farce of "Turn Him Out," both which were performed on the evenings of Dec. 22d and Jan. 2d, to no doubt large and appreciative andiences, by the Dillin Comedy Company, a local dramatic association which has at least the merit of presenting a play bill Adam Leck, alias Waiters, sitting at a stove eating apples. They were arrested, and then the house was scarched. There were found two moids made out of plaster paris, and which were used for the coining of half dollars.— These are very ingeniously constructed, and evidenced considerable skill on the part of the manufacturer. The officers also found in the house a quantity of bogus halves, which had evidenced considerable skill on the part of the manufacturer. The officers also found in the house a quantity of bogus halves, which had evidently been made quite recently. .... WAS IT A MURDER ?- The lifeless remains of a man named Anthony Campbell, as many of our readers will no doubt remember, were found one morning about five years ago in the Conemaugh river, some

three miles below Johnstown, and the general presumption at the time and up until a couple of weeks ago was that he had been accidentally drowned by falling into the river while in a state of intextcation. This belief has now, however, been shaken if not dispelled by a letter received in Johnstown from a lady residing in Cleveland, Ohlo,

who declares that her step-son, name not given, has confessed that he murdered and robbed Campbell in Millville borough, and then threw the body into the water at that point, the force of the current, the river running high at the time, carrying it down to the place where it was subsequently found. This alleged confession has recalled to the mind of a gentleman in that vicinity the fact that a scuffle took place on the night of Campbell's disappearance in the rear yard of a disreputable drinking saloon in that borough, and this added to the fact that the deceased was known to have about five hundred dollars in his possession, with which he intended to make the last payment on some property purchased by him from the C. I. Co., and the further fact that when the body was taken from the water it hore marks of violence but no money was found upon it, gives color to the story recently disclosed in regard to his tragic death, and of which his relatives are said to have entertained strong creditable manner. The singing by the full suspicions ever since the sad event. Nothing so far as we know has yet been done toward the arrest of the alleged self-confessed

to suppose that an inquiry into the matter has at least been instituted.

WHEN a discoverer of any scientific subject asks the co-operation of the learned in science, to test the merit and truth of his discovery by severe tests and practical re-sults, and then to indorse and recommend it, it is fair to presume it is valuable for the purpose intended. Such has been the course pursued by Messrs. Hall & Co., proprietors of Hall's Vegetable Sicilian Hair Renewer. And all those who have tested it (among whom we may mention Dr. A. A. Hayes and S. Dana Hayes, Chemists and State

Assayers of Massachusetts; Walter Burn-ham, M. D., Prof. of Surgery in Penn. Uni-versity, Philadelphia; Geo. Gray, M. D., Professor of Anatomy and Physiology.) as-sert it is the best preparation in use for all cutaneous diseases of the scalp. Restores gray hair to its original color, prevents the hair from falling out, creates a new growth. It is certainly worthy of a trial. - Newburyport Herald of Gospel Liberty.

Apropos of this very creditable showing on part of the Johnstown Savings Bank, the following which we clip from an exchange will prove interesting :

There are many men who carn good wages and

- A very interesting and enjoyable entertainment, consisting of music, singing, declamations, dialognes, etc., was given at the Cogregational church in this place on Wednesday evening last, but it affords us no pleasure to say that, owing to the inclement weather, and mayhap to the stringency of the money market, the andience was no. in point of numbers what it should have been. The entertainment itself was participated in by the choir and several other proficient vocalists, as well as by scores of little folks, all of whom acquitted themselves in a very class, comprising nearly if not quite two hundred voices, was exceedingly pleasing, and the poetical recitations of the little girls and boys, many of whom were scarcely "knee high to a hopper-grass," were very entertaining, not to say wonderful, considering that "you'd scarce expect one of my age," etc. The efforts of little Harry Shryock, a Wilmore youth of twelve or fourteen years, who recited "The Rights of Boys" and "Socrates Snooks" with a grace, clearness and precision that was really astonishing, were

eartily encored, as indeed were many others of the literary and musical morceans embraced in the well arranged programme. All in all, it was an entertainment such as our Congregational friends, possessing as they do abundant talent and taste for such enterprises, know full well how to get up and carry through to a successful issue.

All the farmers were of the "well to do" sor' and some of them, who have tarned their attention to fruits and market gardening, have grown rich to fruits and market gardening, have grown rich. The soil is loam, varying from eandy to clayey, and surface gently undulating. Intersected with small streams and occasional wet meadows. In which deposits of pent or muck are stored, suffi-cient to fertilize the whole upland surface, after it has been exhausted of its natural fertility. It is certainly one of the most extensive tracts, in an almost level position, and suitable condition for pleasant forming, that we know of this side of the Western Proiries. We found some of the old-est farms apparently just as profitably productive as when cleared of forest fifty or a hundred years ago.

ago. The geologist would soon discover the cause of this continued fertility. The whole country is a marine deposit, and all through the soil we found evidences of calcareous substances, generally in the form of indurated calcareous mari, showing many distinct forms of ancient shells, of the fertinry formation ; and this marky substance is scat-bred all through the soil, in a very commissient form and in the exect condition most easily useimtiated by such plants as the farmer desires to culti-
