farmer of Somerset township, Somerset coun-ty, was found dead in his bed a few days ago. The Johnstown Demoert, commenting on his sudden death, says that he was a consistent Democrat and an honest man, having voted right at every election since 1812, when he supported James Madison for President. He was in his eighty-eight year when summoned from earth, and leaves behind him considerable of this world's goods. -A cool scamp named Bazin Moore en-

He was subsequently arrested and committed to the lock-up, and all the plunder, we pre-sume, was recovered, though the Mirror fails

to tell how that was, -A deaf mute named Stevens, ntility man employed in the Altoona Radical office, was

struck by a moving coal truck while attempt-ing to cross the Hollidaysburg Branch, on Monday evening last, and knocked over an embankment, receiving injuries, principally of an internal nature, which resulted in death in a few minutes after being conveyed to his residence. The deceased was aged about twenty-two years and kept "bachelor's hall." It is said, remarks the Altoona Glube, from which we gleam the above facts, that he was engaged to be married to a young woman in Frankstown. --We are sorry indeed to learn that our

typographical friend, Capt. E. L. Russ, pressman in the Altoona Tribune office, had the misforture to have nearly the entire fore-

finger and a portion of the second one, as well as a piece of the thumb, torn from one of his hands, Wednesday afternoon last, in consequence of having that member caught by the moving hed of the large new Camp-bell press recently introduced into that es-'ablishment. Friend Russ has our earnest sympathy in his painful misfortune, which could scarcely have come upon him at a more inopportune time.

WONDERS OF MODEEN SCIENCE .- The perfect accuracy with which scientists are enabled to deduce the most minute particalars is their several departments, appears almost miraculous ff we view it in the light of the early ages. Take for example the electro-magnetic telegraph—the greatest in-vention of the age. Is it not a marvelous degree of accuracy which enables an operator to exactly locate a fracture in a submarine cable nearly three thousand miles long? Our venerable "clerk of the weather" has become so thoroughly familiar with those most wayward elements of nature that he can accurately predict their movements.-He can sit in Washington and foretell what the weather will be to-morrow in Florida or New York, as well as if several hundred miles did not intervene between him and the places named. And so in all departments of modern science, what is required is the knowledge of certain signs. From these the scientists deduce accurate conclusions re-garuless of distance. A few fossils sent to the expert geologist enable him to accurately determine the rock-formation from which

they were taken. He can describe it to you as perfectly as if a cleft of it were lying on his table. So also the chemist can determine the constitution of the sun as accurately as the constitution of the sun as accurately as if that luminary was not ninety-five million miles from his laboratory. The sun sends certain signs over the "infinitude of space" and the chemist classifies them by passing them through the spectroscope. Only the presence of certain substances could produce these solar signs. So also, in medical science diseases have certain unmistakable signs, or symptoms, and by reason of this fact, Dr. Pierce, of the World's Dispensary, has been enabled to originate and perfect a system of determining, with the greatest accuracy, the nature of chronic diseases without seeing and personally examining his patients. He has spared neither pains nor expense to as-sociate with himself, as the Faculty of the World's Dispensary, a large number of med-ical gentlemen of rare attainments and skill -graduates from some of the most famous Medical Colleges and Universities of both Europe and America. By aid of Dr. Pierce's system of diagnosis, these physicians and surgeons annually treat, with the most gratifying success, many thousands of invalids without ever seeing them in person. In rec-ognizing diseases without a personal examiation of the patient they claim to possess no miraculous powers. They attain their knowledge of the patient's disease by the

practical application of well established principles of modern science to the practice of medicine. And it is to the accuracy with which this system has endowed them that they owe their almost world-wide reputation for the skillful treatment of all lingering or chronic affections. This system of practice and the marvelous success which has been attained through it, demonstrate the fact that diseases display certain phenomena, which being subjected to scientific analysis or syn-thesis, furnish abundant and unmistakable data to guide the judgment of the skillful practitioner aright in determining the nature of diseased conditions. The amplest re-sources for treating lingering or chronic diseases, and the greatest skill, are thus placed within the easy reach of every invalid, however distant he or she may reside from the physicians making the treatment of such af-fections a specialty. The peculiarities of this scientific system of practice are fully explained in the Appendix of "The People's Common Sense Medical Adviser,"-a book

of over nine hundred large pages which is so popular as to have reached a sale of almost one hundred thousand copies within a few months of its first publication. It is sent (post-paid) by the Author to any address on receipt of one dollar and fifty cents. Ad-dress, R. V. Pierce, M. D., World's Dispen-----

THE CATHOLIC WORLD,-With the present number the CATHOLIC WORLD opens its twen-ty-fifth volume, and it would be difficult indeed to open more brilliantly. There is not a dry article in it even for the average mind, which is saying everything for a magazine that ap-peals constantly to the highest intelligences. The first article will attract the attention of every American and every observer of the United States. It deals with the devil-worship in this constant of the the states of the The first article will attract the attention of every American and every observer of the United States. It deals with the devil-worship in this country, and it will be a revelation to many to see how extensively this worship pre-valls among a people that pridesitself on being in the van of progress and enlightenment. The article is entitled "Voodcoism, Nagualism, and Crypto-Paganism in the United States." So necessarily gloomy a subject is relieved by the ever-pleasing serial, "Six Sunny Months," which introduces us at last to St. Peter's in the pecufarity graphic manner of the author.-"Natalie Narischkin" is a graceful yet profound biographical sketch of a noble Rossian lady, whose life is full of high romance, and who, shandoning the Russo-Greek for the Latin Church, died at last a humble Sister of Charity. "Up the Nile" flows along as pleasantly as ever. The bright "Letters of a Young Irlshwoman" are tinged this month with the deepeest melan-choly. "Presbyterian Infidelity in Scotland" describes what the writer considers to be the rapid dissolution of Presbyterianism in the land of John Knor; the romons he gives for his view of the subject are certainly worthy of grave attention. A beautiful poem on "St. Francis of Assis" follows, In the capital short etory, "How Piercy Bingham caught bis Trout," the very spirit of Charies Lever seems revived. "To f. Jounnas v. Dr. Taylor of Bvoultion" is a scientific article that deals heavily not only who are known as "modern scientists" gener-ally i, and however the writer may be regarded by the votaries of what h denominated "mod-ent beness at mody which he so sbly and viscously treats." English flue in Ireland" is the continuation and conclusion of a former prine with extend with more howed in the difficult branch of study which he so sbly and viscously treats. "English poet-laureate's de-parture from the old lines in which he won his fame, and while acknowledging his power and beauty there, viscrously denies his admission into the circle of dramatists. The last a the Kev. Arthur Tooth is treated in a manner at once amusing yet charitable. "A Walf from the Great Exhibition" and "The Blessing of the Ashes" are poems of an order too rare in mag-azines. From this list the varied and high character of the CATHOLIC WORLD may be eas-ily judged. There is not an article that is not up to the time, while they are all far above the average literature of the day. The number closes with such book notices as the CATHOLIC WORLD has acquired a fame for giving—keen, brillint, and just.

CALIFORNIA POETRY-NO RAIN.

BY S. B. M'CORNICK.

Has Æolus imprisoned Old Neptupe and his train?-They once had a long quarrel, Are they trying it again? Something has happened, for we have No rain, no rain, po rain.

Old Boreas comes down From Northern domain,

And licks up all the moisture On mountain and on plain ; He shakes his icy beard and says, No rain, no rain, no rain.

North-western winds still rattle Against each winds still rathe Against each winds winds still rathe They creep through every crevice Some nectar to obtain; Because the stingy clouds will send No rath, no rain, no rain.

The stars look coldly down. And the moon has changed in vain. And the nimbus clouds pass by. And white frosts blanch the plain;

Even south winds, passing, sigh and say, No rain, no rain, no rain. My heart within me aches,

And fevered is my brain; My long tried nerves are startled At the wind's sad, wild refrain, As they utter that low mor No rain, no rain, no rain.

OBITUARY.

DUNEGAN. - Died, at his residence in Clear-field township, on Sunday, March 18, 1877, Mr. PATRICK DUNEGAN, aged about 49 years.

The cause of Mr. Duncgan's death we learn to have been typhold fever, with which he was afflicted only some twelve days. He was a farmer in comfortable circumstances and a citizen whose intelligence and worth made him citizen whose intelligence and worth made him prominent even among a people who are noted for such good qualities. He was, in fact, an upright man, strictly honest in all his business transactions, and as such was highly esteemed by his neighbors, as well as by all who knew him. He was the eldest brother of E. R. Dun-rgan, Esq., of St. Augustine. May his soul rest in peace. D Desce

FEET FROZEN.-Ou Sunday morning a poor, miserable, forlorn-looking tramp was ound lying by the roadside at Gallitzin, and in the course of a very brief period he would have been frozen stiff and stark if it had not been for the charitable action of some of the citigens. He was taken in charge by one of the Car Inspectors, and, after being resusci-tated, it was discovered that both his feet were frozen. There is a chance that ampntation of these members may yet be necessary, although an effort is being made to save the limbs. He states that his home is in one

Gaunt famine stalks abroad And trends upon the slato, He says "men's sins are many. Then why should men complain? Repent, or else the clouds will send No rain, no rain, no rain."

URESCOPIA-During the whole course of our study and practice we have paid particu-lar attention to this old "German mode" of detecting disease, and especially invite all

those laboring under any lingering disease that has not been cured, because, perhaps, the complaint was not properly understood, to send a vial of their urine for examination. and have the necessary medicine sent them. We wish it distinctly understood that this "special" invitation is given those who have sufficiently tried the remedies of their family physician, and have failed to obtain relief at his hand.

If any others choose to apply we will give them our best medical attention also, and promise them relief in every case where a reasonable hope can be entertained, If we fail to detect the "morbid condi-

tions," if any; or to determine the nature of the disease, or the organs affected, as the lungs, liver, stomach, brain, kidneys, womb, &c., there shall be no charge made. Send us a vial of morning urice by express

(not by mail) with name, age, and P. O. al-dress of the patient, and we can send the necessary medicines. DRS. OLDSHUE,

TROUBLESOME CHRONIC DISEASES .--There are multitudes of Chronic diseases which beset and afflict hundreds of our readers, which in a vast majority of cases, are easily within the reach of cure. The class embraces so many maladies that it were tedions as well as useless to name most of them --Dropsy, Scrofula, Rheumatism, Old and Stubborn Ulcers and Fever Sores; Neuralgia, Head-aches, Contracted Limbs, all, or most of which are, by proper treatment, curable. Consumption, Skin Diseases, Liver Com-plaint, Chronic Diarrhosa, Piles and Fistula make up another class, equally remediable under the improved methods of medicine, which deep research into its hidden powers have brought to light. Dr. Keyser of 120 Penn Avenue, Pittsburgh, has investigated Penn Avenue, Pittsburgh, has investigated these diseases as well as other obscure chronic affections, which has enabled him to promise a cure whenever a cure is at all possible; his office is easily reached, and persons desiring to consult him, can take the morning cars, in most cases, and return home the same day. Use Kayser is the proprietor of Dr. Keyser's Dr. Keyser is the proprietor of Dr. Keyser's Lang Cure, the great remedy for Consump-tion, now sold in pint bottles, at \$1 each.
