Abstract of Fish and Game Laws.

The following is a plain abstract of the game and fish laws of this State, and will furnish all needed information, and we may premise that every person having knowledge of the violation of any of the provisions of the law, may make complaint before the nearest justice of the peace, and said justice *shall forthwith* issue his warrant for the arrest of the offender, and upon the conviction of the offender he shall be sentenced to pay the fine or fines attached to such violation, together with costs; one half of which penalty shall go to the informer, and the remainder shall be paid to the treasurer of the county in which the offense was committed:

It must be understood that there shall be no hunting, shooting, or fishing on Sunday, under a penalty of $25.

No person shall kill or pursue any wild deer, save only between the 1st of October and 1st of January, of any year, under a penalty of $50

No person shall, at any time, kill any fawn when in its spotted coat, or have the fresh skin of said fawn in possession, under penalty of $50.

No person shall pursue any elk or wild deer with dogs in any part of the State, or shall kill in the water any elk, wild deer, or fawn which has been driven thereto by dogs, under a penalty of $40

No person shall kill, or have in possession after being killed, any grey, black, or fox squirrel, between January 1st and July 1st; penalty $5 for each squirrel

Hare or rabbit, between December 15th and October 15th: penalty $5 for each rabbit.

Wild turkey and wood or summer duck, between January 1st and October 1st: penalty $10 for each wild turkey, wood or summer duck.

Upland or grass plover between January 1st and August 15th; penalty $10 for each plover.

Woodcock, between January 1st and July 4th; penalty $10 for each woodcock.

Quail or partridge, between December 15th and October 15th; penalty $10 for each quail.

Ruffed grouse or pheasant, between January 1st and October 1st; penalty $10 for each pheasant.

No person shall at any time, kill or take any wild turkey, grouse or pheasant, quail or partridge, or Woodcock or rabbit by means of any blind, trap, snare, net or device whatever, under a penalty of $10 for each bird or rabbit.

No person shall hunt or permit the hunting of hares or rabbits with ferrets, under penalty of $10 for each rabbit caught or killed by such means.

It is illegal to kill, trap or expose for sale, or have in possession after being killed, any night hawk, martin, whippoorwill, sparrow, thrush, finch, lark, swallow, woodpecker, flicker, robin, oriole, red bird, cedar bird, cat bird, blue bird, tanager, or any other insectiverous, bird under the penalty of $5 for each bird.

No person shall rob or destroy the eggs or nests of any wild birds whatever (only predatory birds, such as are destructive of game or insectiverous birds), penalty $10.

No person shall catch, kill or disturb wild pigeons while on nesting grounds, under a penalty of $25.

It is made illegal to catch an speckled trout, save only by rod hook and line, at any time, or to place any set lines or set nets across any stream inhabited by them; penalty, $25.

No person shall kill, sell, or have in possession after being killed, any salmon or speckled trout, save only from 1st of April to the 15th of August, under penalty of $10 for each fish.

No person shall catch or kill, save only with rod, hook, and line, out line or scroll, at any time, and no person shall catch or sell, or have in possession after being killed, any black bass, pike, or pickered, and Susquehanna salmon, between the 1st of March and 1st of July, under penalty of $25 for each fish.

No person shall kill or catch fish by placing any torpedy, giant powder, nitro-glycerine, or other explosive substance, in any of the streams of this Commonwealth, under a penalty of $50.

No person shall catch or destroy fish by shutting off or drawing off any of the waters of the State, or by dragging small nets or seines therein, when the waters are wholly or partly shut off, under penalty of $50.

No person shall place any set net, fish basket, pond net, gill net, eel wier, kiddle, brush or facine net, in any waters of this State, under a penalty of $25 for each offense,

The use of seines, the meshes or open spaces of which are less than three inches, are prohibited in all the inland waters of this State inhabited by black bass or speckled trout, under a penalty of $25.

CONTRACTION.—The lemon-squeezer of the Shylocks.

It robs industry of its profits, and compels labor to yield up all the fruits of its toil for the use of those it borrows.

It squeezes the life out of the producer and transfuses it into the receptacles of the idle usurer.

It robs the nation of its free money, by converting it into an interest-bearing debt, to lie idle in the vaults of the robber, to absorb the products of toil.

It has robbed the lemon of industry to quench the thirst of avarice

It has created a mountain of debt and placed it on the backs of the people.

It has closed the door of prosperity and opened those of the prison and the poor-house.

It has driven thousands to suicide, and tens of thousands to beggary and want.

It has bankrupted the best men of the country, filled our public highways with tramps, enlarged and peopled our prisons, and filled the land with wide-spread ruin and desolation.

It has proved the harvest of hell, and Satan's right-bower, with but one point to make,

ONLY REMEDY FOR

HARD TIMES.

CHANGE YOUR SURROUNDINGS.

All wanting FRUIT FARMS, especially adapted to the growth of the VINE, where it is an established success and pays LARGE PROFITS. The land is also adapted to the growth of Peaches, Pears, Apples, and small fruits; also, Grains, Grass and Vegetables.

Many hundreds of excellent VINEYARDS, ORCHARDS and FARMS can now be seen.

THE LOCATION is only 31 miles south of Philadelphia, by Railroad, in a mild, delightful climate, and at the very doors of the New York and Philadelphia Markets. Another Railroad runs direct to New York.

THE PLACE is already LARGE, SUCCESSFUL and PROSPEROUS. Churches, Schools, and other privileges are already established. Also, manufactories of Shoes, Clothing, Glass, Straw Goods, and other things, at which different members of a family can procure employment.

It has been a HEALTH RESORT for some years past for people suffering from pulmonary affections, asthma, catarrh, ague and debility, many thousands of whom have entirely recovered.

A new Brick Hotel has just been completed, 100 feet front, with back buildings, four stories high, including French roof, and all modern improvements for the accommodation of visitors.

PRICE OF FARM LAND, **$25 00 PER ACRE** payable by installments, within the period of four years. In this climate, 20 acres of land planted out to vines will count as much as 100 acres further north.

Persons unacquainted with Fruit Growing can become familiar with it in a short time on account of surroundings.

FIVE ACRES, ONE ACRE, and TOWN LOTS in the towns of Landisville and Vineland, also for sale.

A paper containing full information will be sent free of cost on application to CHARLES K. LANDIS, VINELAND, N. J.

The following is an extract from a description of Vineland, written by the well-known agriculturist, Solon Robinson, and published in the New York *Tribune*:

All the farmers were of the "well to do" sort, and some of them, who have turned their attention to fruits and market gardening, have grown rich. The soil is loam, varying from sandy to clayey, and surface gently undulating, intersected with small streams and occasional wet meadows, in which deposits of peat or muck are stored, sufficient to fertilize the whole upland surface, after it has been exhausted of its natural fertility.

It is certainly one of the most extensive tracts, in an almost level position, and suitable condition for pleasant farming, that we know of this side of the Western Prairies. We found some of the oldest farms apparently just as profitably productive as when cleared of forest fifty or a hundred years ago.

The geologist would soon discover the cause of this continued fertility. The whole country is a marine deposit, and all through the soil we found evidences of calcareous substances, generally in the form of indurated calcareous marl, showing many distinct forms of ancient shells of the tertiary formation; *and this marly substance is scattered all through the soil, in a very comminuted form, and in the exact condition most favorable, calculated by such plants as the farmer desires to cultivate.* [8-25.-1y.]

Ayer's Cathartic Pills,

For the relief and cure of all derangements in the stomach, liver, and bowels. They are a mild aperient, and an excellent purgative. Being purely vegetable, they contain no mercury or mineral whatever. Much serious sickness and suffering is prevented by their timely use; and every family should have them on hand for their protection and relief, when required. Long experience has proved them to be the safest, surest, and best of all the *Pills* with which the market abounds. By their occasional use, the blood is purified, the corruptions of the system expelled, obstructions removed, and the whole machinery of life restored to its healthy activity. Internal organs which become clogged and sluggish are cleansed by *Ayer's Pills*, and stimulated into action. Thus incipient disease is changed into health, the value of which change, when reckoned on the vast multitudes who enjoy it, can hardly be computed. Their sugar coating makes them pleasant to take, and preserves their virtues unimpaired for any length of time, so that they are ever fresh, and perfectly reliable. Although searching, they are mild, and operate without disturbance to the constitution, or diet, or occupation.

Full directions are given on the wrapper to each box, how to use them as a Family Physic, and for the following complaints, which these *Pills* rapidly cure:—

For **Dyspepsia** or **Indigestion**, **Listlessness, Languor** and **Loss of Appetite**, they should be taken moderately to stimulate the stomach, and restore its healthy tone and action.

For **Liver Complaint** and its various symptoms, **Bilious Headache, Sick Headache, Jaundice** or **Green Sickness, Bilious Colic** and **Bilious Fevers**, they should be judiciously taken for each case, to correct the diseased action or remove the obstructions which cause it.

For **Dysentery** or **Diarrhœa**, but one mild dose is generally required.

For **Rheumatism, Gout, Gravel, Palpitation of the Heart, Pain in the Side, Back** and **Loins**, they should be continuously taken, as required, to change the diseased action of the system. With such change those complaints disappear.

For **Dropsy** and **Dropsical Swellings**, they should be taken in large and frequent doses to produce the effect of a drastic purge.

For **Suppression**, a large dose should be taken, as it produces the desired effect by sympathy.

As a *Dinner Pill*, take one or two *Pills* to promote digestion and relieve the stomach.

An occasional dose stimulates the stomach and bowels, restores the appetite, and invigorates the system. Hence it is often advantageous where no serious derangement exists. One who feels tolerably well, often finds it a dose of these *Pills* makes him feel decidedly better, from their cleansing and renovating effect on the digestive apparatus.

WANTED—FARMS TO SELL. —I have hundreds of applicants for FARMS just now. Also, rentable city properties to exchange for Farms Hundreds of people crowd into my office, and I cannot get sufficient Farms. I have lots of customers for good improvements—all cash. Write or call as soon as possible, and if not too far distant, I will go and see the property S. M. JAMES, Farm Agency, 154 Smithfield st., Pittsburgh, near the Post-office. [2-23. 1y.]

A TAME SEA GULL.—Many years ago a Mr. Scott, of Benhalm, near Montrose accidently caught a sea-gull, whose wings he cut, and placed it in his garden. The bird remained in that situation for several years, and being kindly treated, became so familiar as to come at a call to be fed at the kitchen door. It was known by the name of Willie. This bird became at last so tame that no pains were taken to preserve it, and its wings having grown to full length, it flew away joined the other gulls on the beach, and came back from time to time to pay a visit to the house. When its companions left the country at the usual season, Willie accompanied them, much to the regret of the family. To their joy, however it returned next season; and with its usual familiarity come to its old haunt, where it was welcomed and fed liberally. In this way it went and returned for forty years without intermission, and kept up its acquaintance in the most cordial manner, for while in the country, it visited them almost daily, answered to its name like any other domestic animal, and ate almost out of the hand. One year however—very near its final disappearance—Willie did not pay his respects to the family for eight or ten days after the general flock of gulls had arrived on the coast, and great loss, as it was feared he was dead. But to the surprise and joy of the family, a servant one morning came running into the breakfast-room in ecstacy announcing that Willie had returned. The whole company rose from the table to welcome him. Food was soon supplied in abundance, and Willie with his usual frankness eat of it in the most hearty manner, and was as tame as any barn-yard fowl about the house. In a year or two afterwards this grateful bird discontinued his visits for ever.

MARVELLOUS MECHANISM.—Messrs. Patek, Phillippe & Co., of Geneva, have recently produced the most wonderfully complex and ingenious watch ever produced in Geneva. It is a full sized hunter. On one side is a dial with the ordinary marking (hour, minute and second hands), together with a large independent chronographic hand in the center, marking the one fifth of a second, and flying back to XII; to this dial corresponds a repeating mechanism, striking hours, quarters and minutes. If the watch be turned over, a second dial is perceived, having, besides the ordinary marking, a perpetual calendar (months, days of the week, date and phases of the moon) and also a little regulator for the timing. This watch can keep two different times, for instance, Paris on one side and London on the other, while there is only one knob on the stem for setting both dials to time without the addition of a pusher on the rim of the case. The mechanism for setting the hands to time actuates only the finger of the dial that is uppermost at the moment, i. e., the one at which you are looking. This watch has been made to the order of Baron Nicolies, and has been nine months in the making, which is considered a remarkably short period of gestation for so intricate and at the same time so perfect a piece of mechanism.

THE MOSQUITO.—If stagnant water is exposed to a summer's sun for several days, waggletails begin to appear on the surface and grow until near a quarter of an inch long, seeming to live on air and water; in a short time they become encreased and sink to the bottom; in a few hours a short hair grows out of the sides, soon becoming a small catterpillar, rising to the surface and floating to the shore by the aid of the slightest breath of air. Soon a fly is hatched leaving its tiny shell on the water; that fly is the mosquito, which is ready to suck the very blood out of you. Where mosquitoes abound, there is but one certain and efficient means of keeping them from disturbing sleep; get under a mosquito bar, which should be adjusted to the bed before sundown for they do not begin to stir around in the rooms until late in the evening.

Mosquitoes must have a living as well as other people, and, what is more they will have it. We once noticed a device at Key West to keep them away—a woman sitting out of doors near a pile of burning rags, the wind blowing the smoke on her; she could stand that stench by the hour, but the mosquitoes wouldn't—they had more sense.

SIMPLE METHOD FOR TANNING A LAMB-SKIN WITH THE WOOL ON.—Make a strong soap-suds, using hot water; when it is cold, wash the skin in it, carefully squeezing it between the hands to get the dirt out of the wool; then wash the soap out with clean cold water; next, dissolve alum and salt, of each half a pound, in a little hot water, which put into a tub of cold water sufficient to cover the skin, and let it soak in it over night or twelve hours; now hang the skin over a pole to drain; when well drained, spread or stretch carefully on a board to dry. When yet a little damp, sprinkle pulverized saltpetre and alum (an ounce each mixed together) on the flesh side, rubbing it in well. It is now to hang in the shade for two or three days, the flesh side in, until perfectly dry. When entirely dry, scrape the flesh side with a blunt knife to remove any scraps of flesh. Trim off all projecting points, and rub the flesh side with pumace or rotten stone, and with the hand. Prepared in this way, it is white and beautiful, suitable for a door mat, and also nice for the feet in a sleigh or wagon in cold weather.

LOVE those who advise, but not those who praise you.

WHITE SOAP

For the Laundry or Toilet is EQUAL to White Castle Soap, for it is made of PURE VEGETABLE OILS, and of the same process, which retains all the natural healing qualities of the oils. It costs SO MUCH LESS than the imported article that it is rapidly coming into general household use. The use of COLORED Soaps is condemned by Physicians as liable to produce skin diseases, the PURITY of the White Soap renders its use harmless. Made only by PROCTER & GAMBLE, Cincinnati. Trade supplied by Pittsburgh wholesale grocers.

ESTABLISHED 1869.

AGRICULTURAL NOTES.

All colts should be broke to halter while following their dams.

Hoe the cabbage while the dew is on, but never hoe beans while they are wet.

Asparagus is being milked in a new way A very superior writing letter paper it is said is made from the fibrous portions of the stalk. The season for this vegetable is now nearly over. It usually cut in private gardens by the 20th inst.

A horticultural fumbler's bleaching recipe to preserve all kinds of fruit from the ravages of cut worms, slugs, etc; One pound sulphate of iron, one ounce aloes. Dissolve in water heated to ninety or ninety five degrees, and pour over one bushel of grain.

The indications are that there will be a plethora of peaches this season. The product of Delaware is estimated at 7,000,000 baskets, or one fourth greater than any previous year. Just now the fruit is rather scarce, and commands fifty cents for a medium sized specimen, which is large for the product of hot houses.

In the course of two or three years one of the largest collections of plants in the country will be found in the garden of Mr Bancroft, the poet, at Newport. Scarcely any other is cultivated, and it is said that hundreds of dollars are annually expended in the production of this florian's favorite flower.

The best time to kill a weed is as soon as it is born, before you see it. When the seed has germinated and is just ready to break through the ground, then the leaves appear, and the soil disarranges as it grows until it makes room for the turbed considerably, and it dies in a hot sun; but if it grows until it makes roots it lives in spite of you.

A Manchester manufacturer of horsehair cloth for the breasts of corsets has discovered a substitute for steel mould in a solution of gum chemical properties, which he asserts that it possesses all the elasticity of steel, and is as much cheaper as it is lighter. He has no other application for it, but he supposes no office could be found for it as elastic but the corset, and that neither dress nor corset would be complete without it.

The Directors of the Centennial Exhibition have announced that there will grow in the grounds of the city at the time of the Academy of Science, an exhibition of specimens of trees and shrubs to be found within a radius of fifty miles of the city. It is expected that the first time that the Centennial visitor will see a vegetable in the ground will be the characteristics of a Philadelphian being apparently sufficiently prevent the cutting down of trees, the thanks of a grateful country ought to be bestowed upon Dr. Old Dr. Franklin once got a patent for preparing a dish of codfish, but was rather disappointed when he had been completed and ready to be served, he said, "Having fished for it except carefully to the end, the only thing to do is to open the door and throw the preparation into the Germantown Telegraph.

OLD SAWS.—When the sun shines make hay.

When fowls begin to roost look out for rain.

Look for rain also when cattle begin to crook very low and lie down near the ground, or when swallows fly low.

Soap a nail to drive it into hard wood.

Grease a saw and it will cut easier.

Sprinkle starch in a room to get it on.

For a felon roast a sour apple and lime; cut a small hole and put your finger in as hot as you can bear it.

For a cold mix the juice of a fresh orange that has been baked with sugar, and take a teaspoonful when the cough is troublesome.

Soles of old shoes will make good leather for light gaiters

For chafe on your horse bathe with beer and cover the sore spot with fine coal, or cover with powdered alum and vinegar made into paste.

Mercurial ointment rubbed into a gun barrel will keep it from rusting.

To cure a child of colic rub the stomach gently between the shoulders.

Tomato juice, or lemon juice, sugar or honey, will cure thrush in a child. Dip a rag in the mixture and let the baby suck it.

Sugar mixed with salt, which will not have no saltpetre, will give meat a fine color.

A POINT IN FEEDING COWS.—The following is from the New England *Farmer*: "Cows soon learn what we expect, and if, by any management on their part they can change the usual programme to their advantage they are not slow to do so. We have in our stable which, if let out in the morning, will either poke it through the fence or paw it out under their feet, and in the deliberation with which a spoiled child clears its plate of plum pudding to make room for the delicacies which are held in reserve by the indulgent parent—but if the usual order is given at the last feeding at night, when the cows know they will always do, that it is the last feeding, they take hold of it, if at all hungry, as a matter of business, and will eat it up as though it were as good as the best."

THE cherry crop is a failure in the central part of the State.
