

Sicily, while during the same year a destructive earthquake visited San Francisco, Cal. Over two thousand shocks were experienced during the first half of April, 1868, and the destruction of life and property was very great; and on August 13th, of the same year, Peru, Ecuador and Chili were terribly devastated by a violent carthquake, which destroyed several large cities along the coast, a huge tidal wave finishing the destruction. Between thirty and sixty thousand persons on this occasion lost their lives, the exact number never having vet been arrived at. Several slight shocks have been felt in different portions of the globe during 1869, 1870 and 1871; but in 1872 Antioch, in Syria, became again the scene of ter-

rible destruction of both Life and property. During that year California, Oregon, the North Pacific, New Hampshire, North Missouri, Nevada, Virginia, Caucasus, Iceland, Japan, Sioux City, Long Island and Westchester county were affected by shocks of earthquake, although not of a serious character, but illustrative of the fact that no spot of the whole earth is free from the influences of this destructive phenomenon.

THE SNOWFLOWER - A remarkable of a so called snowflower, said to have been discovered by Count Anthosdoff in 1863, in the northernmost portion of Siberia, where the earth is continually covered with a coating of frost.

This wonderful object shoots forth from the frozen soil the first day of the year, and reaches a height of over three feet, blooms on the third day, remains over twenty four hours, and then returns to its original elements. It shines for a single day, then the stem, leaves and flower are converted into snow. The leaves are three in number, and about three inches in diameter, covered by a kind of microscopic ice, developed only on that side of the stem which is turned to the North.

The flower, when opened, is starshaped, its petals of the same length with the leaves, and about half an inchwide. On the third day the extremities of the anthers, which are five in number, show minute glistening peaks like diamonds, the size of the pin's head, which are the seeds of this astonishing flower.

Count Anthoskoff collected some of these seeds, and hastening with them to St. Petersburgh placed them in a pot of snow, where they remained for an entire year, but on the1st of January, 1864, the snowflower burst through its icy envelope and displayed its beauties before the eves of the imperial court.

LEMONS A CURE FOR CONSUMPTION. -A correspondent of an English medical journal furnishes the following recipe as a new cure for consumption : "Put a dozen whole lemons in cold water and boil until soft (not too soft) roll and squeeze until the juice is all extracted, sweeten the juice enough to be palpable, then drink. Use as many as a dozen a day. Should they cause pain or looseness of the bowels, lessen the quantity and use five or six a day until better, then begin and use a dozen or six dozen you will begin to gain strength and have an appetite. Of course às you get better yon need not use so many. Follow these directions and we know that you will never regret it if there is any help for you. Only keep it up faithfully. We know of two cases where both of the patients were given up by the physicians, and TIN, COPPER & SHEET-IRON

EBENSEURG, PA.

Every year increases the popularity

of this valuable Hair Preparation;

which is due to merit alone. We can

assure our old patrons that it is kept

fully up to its high standard; and it

is the only reliable and perfected prep-

wation for restoring GRAY OR FADED

HAIR to its youthful color, making it

soft, lustrous, and silken. The scalp,

by its use, becomes white and clean.

It removes all pruptions and dandruff,

and, by its tonic properties, prevents

the hair from falling out, as it stimu-

lates and nourishes the hair-glands.

By its use, the hair grows thicker and

stronger. In baldness, it restores the

capillary glands to their normal vigor,

and will create a new growth, except

in extreme old age. It is the most

economical HAIR DRESSING ever used,

as it requires fewer applications, and

gives the hair a splendid, glossy ap-pearance. A. A. Hayes, M.D., State

Assayer of Massachusetts, says, "The

constituents are pure, and carefully

selected for excellent quality; and I
