

the formation of the pile, it would be

wanting in inventors, doubled up the rod and hid it away, wove down the "knocked off," or stopped his loom, and proceeded to the office of the mill, where he demanded to see the principal. The clerk demurred to this, asking if he himself could not do all that was required ; but no, the weaver persisted. Then the manager tried, but with the same result ; only the principal would suit the weaver. The principal was informed of the operative's persistence in determining to see him, so he at once ordered him to be admitted. This was done and the weaver stepped His employer addressed him : "Well, John," (for so we will call him) "what is it you want ?" "Well, maister, I've makkin t' loom cut th' velvet piles ?" would !" replied the employer ; "and I will reward any man handsomely who brings me a plan of doing it," added he. "Awm yare mon, then," said the

betes in Columbia which has been at. tracting the attention of the medical fraternity for some time, and just now is made the subject of report and dis. oussion of the Lancaster county medicalsociety. The patient is a gentleman who is willing that the public may know the different treatments applied fects the disease, that others may profit

directions followed. The treatment would not permit the patient to est anything containing sugar, the next and in large and small quantities were

coil that much sooner rather than swallow such enormous quantities of

seven gallons a day, and discharged in uriae about nine gallons. He ate at one meal as much as three hearty men would eat. He could drink three or
