The rebellion in Cuba against the gov. erument of Spain, which commenced almost ten years ago, has been brought to an end by the surrender of the last of the insurgence, and peace now prevails throughout the island. Very liberal concessions were made by the home government to the rebels, almost every thing they course, their absolute independence. It long and destructive a contest.

There is no other way to destates, and to say in the face of the exposuse that Hayes was "duly and legally elected," and that an investigation into the bringing home to his door, by clear and frand was the most "foolish" of all proseedings.

Accounting to the philosophy of Repub hosts newspapers, it is a perfectly logitimate business to cheat the Democratic party out of its legally elected President. but when it is proposed to investigate the fraud and to show to the world the ways and means by which it was accomplished, the proceeding becomes revolutionary and dangerous to the peace and quiet of the country. A man must entertain a very low and contemptible opinion of the intelligence of the people who will insuit them by the declaration that they are so utterly unfit to govern themselves that the exposure of the

bein, unparalleled though it be, will deread them of all reason and common sense the precipitate them into a condition of clerchy and revolution. The Democracy nothe country have calmly submitted to stylkercise of power by Mr. Hayes during groups third of a Presidential term, for the coson that a majority of their representaeves in Congress voted for the creation of the tribunal whose decision, from which there could be no appeal, placed him where he is, and they propose in good faith to pursue the same peaceable course during the remainder of his four years term of office. The Democratic party, basely cheated out of its rights by the frauds in Louisiana and Florida, but still treasuring up the wrong, will pariently wait until November, 1880, conscious that the American people will then reaffirm with terrible emphusis the verdict they rendered in 1876.

CLOSE on the heels of the recent defeat of the Cameron clan at the Republican primary elections in Lancaster county, follaws another stunning blow in the Susquewas least expected. Charles S. Just now we are reminded of Mr. Anderson's Just now we are reminded of Mr. Anderson's first love by a strange colocidence, which will develop itself in the recital of the story. When Anderson came into the Linion office at Lancaster, he was not long in becoming a frequent visitor at the home of Mrs. Mary Maxwell, a widow lady of considerable literary ability, to whom Jimmy was distantly related. It was not long after his arrival in the city that Jimmy became enumered of Mrs. Maxwell's youngest daughter, Alice, who was some years Jimmy's senior. She was an intelligent young in-'s senior. She was an intelligent young in and by many considered handsome. She is remarkable for the alabaster whiteness and purity of her complexion, which was strong contrast to Anderson's red and frecklet though expressive, face. The boy loved un-wisely. His youth, his overbearing and insinu-ating manner, and his poverty, were obstacles in the way which even his perseverance and "cheek" could not surmount, to say nothing of the fact that the young faily was already being the fact that the young may was already being wooed by a gentleman possessed of more years, of a more comely face, more cash, better prospects and fully as much "check" as the printer's devil. Falling in his awaward attempt at love-making, Jimmy Anderson fell back on his natural taleats, spitefully called the lady "milk-face," "dough-head," &c., until he was "milk-face," "dough-head," &c., until he v demanded having been granted, except, of demanded having been granted, except, of carse, their absolute independence. It will require several years to enable that will require several years to enable that committee as counsel for Louisiana. We have often wondered, since this electoral investigation began, how James B. Anderson feels, when he leds the story of his crime, and faces, in the Potter committee room, the successful rival to his boyleh love.

On Monday morning last, when he went to his work at the Philadelphia North American office, Mr. Auderson was notified that his services as night editor of that paper were no longer needed. The Philadel-

phia Times says ! This blow fell upon Anderson with even more crushing force than the outrage of classin him with Crobin, of Oregon, the rich, red tir of whose unsal extremity establishes a link of beauty between the two distinguished men. Mr. Anderson rose up and left the office. He spent the day in arranging his affairs to travel to Washington for the purpose of sppearing before the Senate committee, acting upon by his peers, and yeaterday morning set down to read an issue of the paper to the columns of which he had contributed nothing. Gloomily indignation of my treatment. Republics are actoriously ungrateful. They go further than ingratitude: they indules in persecution. I have been discharged from my position. If an't get any other newspaper work I can g back to the case. I am as good a printer as any of them, and I can always make a living.

BRYANT AND MAZZINI.-It might be considered ungracions not to join in the general and unchecked praise of the late William Cullen Bryant, whose memory will be cherished and perpetuated in the literaqualities deserve to be imitated, but the closing words of his life, upon the occasion of the nuveiling of the bronze status of Mazzina, were not in behalf of one whose career justified the enlogium. Mr. Bryant concluded his address in the following words which were really his last :

The element of nurest and discontent which exists in this country has its parallel in the old world-the unfed many against the overfed few. Public opinion is expected to accomplish here what standing armies must do there, and it should not excite surprise when so distinguished an orator, poet and publicist, as Mr. Bryant certainly was, commends the example of a Mazzini, that will result in the worst possible fruits. Our greatest danger at this moment exists in the terrible fact, that demagogues may remove beyond restraint the discontented masses, who have suffered much and sufered long, and are moved to the belief that relief can only come through the overthrow of all authority and law. COMMON CARRIERS. - The Supreme Court on Monday reversed the judgment of loads of goods destroyed by fire at Osceola. Clearfield county, on May 20, 1875. The railroad company removed the case to the Supreme Court, contending that the plaintiff released at the time the goods were shipped, and that there was no evidence of negligence of their employes by which the plaintiff's property was destroyed. They further contended that they were not responsible for the unprecedented fire which destroyed the town of Osceola and everything in it, and further, that the wind which caused the fire to spread was the act of God, which relieved the carrier from all responsibility. The Supreme Court surtained all these positions of the company and reversed the case without a venue Samuel S. Blair, of Hollidaysburg, represented the plaintiffs, and D. J. Blair county, and L. W. Hall, of Philadelphia, the railroad company.
