The Legislature and Don Cameron.

Can the Democratic party in this State, unaided and of itself, under the present iniquitous apportionment bill, elect a majority of the members of the two houses of the Legislature, and thus dispense with the purely ornamental presence of the son of Simon Cameron in the Senate of the United States? This question admits of but one intelligent answer.

As between the two old parties this is something nearly approaching it would be the result of every election held under the present bill. It could not be otherwise, since the bill will only permit the Democrats to elect one out of eight Senators in Philadelphia, and only nine out of thirty-eight Representatives, while in Allegheny county it enables the Republicans to elect all of the four Senators, and all but one of the fourteen members of the House.

It is not every State that can "point with pride" to such a priceless jewel in its gallery of statesmen as Harry White.

John Sherman has an idea that a temporary resumption will help the Republican party in the canvass this year, and he is working with all his might to bring about an apparent equality between gold and silver and greenbacks.
