So great was and an imperfect knowledge of English. his muscular power that he would some- He dislikes to show his strength and imes bind a cord round his head and fails to realize his own value. If he break it by the swelling and pressure of , were to give public exhibitions of his the veins. An ordinary meal for Milo wonderful powers he would doubtless was twenty pounds of meat, as much be recognized and acknowledged to be bread, and fifteen pints of wine. Poly- the most powerful man in the world in damus, of Thessalia, was of prodigious certain lines of strength. strength and colossal height, and, it is said, alone and without weapons, killed an enormous and enraged lion. One day (it is recorded) he seized a bull by one of its hind feet, and the animal escaped only by leaving the hoof in the grasp of the athlete. The Roman Emperor Maximinus was upward of eight feet in height, and, like Milo of Cro tone, could squeeze to powder the hardest stone with his fingers and break the leg or jaw of a horse by a kick. His wife's bracelet served him as a ring, and his every-day meal wassisty pounds

of meat and an amphora of wine. While a prisoner in Germany, Richand 1, accepted an invitation to a boxing match with the son of the jailer. He received the first blow, which made him stagger : but, recovering, with a blow of the fist killed his antagonist on the spot. Topham, who was born in London in 17f0, was possessed of astonishing strength. His armplts, hollow in the case of ordinary men, were with him full of muscles and tendons. He would take a bar of iron, with its two ends held in his bands, place the middle of the bar behind the nape of his neck, and then bend the extremities by main force until they met together, and then bend back the iron straight again. One night, perceiving a watchman asleep in his box, he carried both the man and his shell to a great distance, and deposited them on the wall of a church yard. Owing to domestic troubles, he committed suicide in the prime of life. The famous Scanderburg, King of Albania, who was born in 1414, was a man of great dature, and his feats in sword excruise have never been equaled. On one occasion, with a scimitar, he struck his antagonist such a terrible blow that its tremendous force cleaved him to the whist. He is said to have often cloven in two men who were clad in atmorfrom head to foot. On one occasion the brother and nephew of a certain Ballaban, who had been convicted of crucities toward the Albanians, were brought to him, bound together .-Transported with rage, he cut them in two with one stroke of his weapon .-Maurice, Count of Saxony, the hero of Fontenoy, inherited the physical vigor of his father, and was especially noted for the surprising muscular power, or "grip," of his hands. On one occasion, needing a corkscrew, he twisted a long ron nail round into the required shape with his fingers, and with this extenporized implement opened a half dozen bottles of wine. Another time, when stopping at a village blacksmith shop to have his house shod, he picked up a number of new horsestors, and with his hands snapped them in two as readily as if made of glass, much to the surprise and disgust of the smith If history is to be believed, Phaylins of Crotomi could jump a distance of fifty-six feet. The exercise was practiced at the Olympic games and formed part of the course of the Pentathion .-Strutt, the English authority on games and amusements, speaks of the Yorkish numper named Ireland, whose powers were something marvelous. He was 6 feet high, and at the age of 18 years leaped, without the aid of a springboard, over nine horses ranged side by side .-He cleared a cord extended fourteen feet from the ground with a bound, crushed with his foot a bladder suspended a height of sixturen feel, and on anoffice occasion lightly cleared a large wagon covered with an awaing. Col. tronside, who lived in India early in this century, relates that he met in his travels an old, white-haired man who with one leap sprang over the back of an enormous elephant flanked by six. cantels of the largest breed. A curious French work published in Paris in 1745, entitled "The Tracts Toward the History of Wonders Performed at Fairs, mentions an Englishman, who at the fair of St. Fermain, in 1723, leaped over forty people without touching one of them. In our own day we are familiar with many remarkable expositions of 40 YEARS BEFORE THE PUBLIC strength and endurance. Dr. Winship, with the aid of straps, fifted a weight of 3,500, pounds and with the little finger of his hand could raise his body a considerable distance from the ground. The strongest man in the world at the present time, so far as we are able to learn, now lives in Reno. Washes TLES SOLD WITHIN THE LAST FEW TEARS. county, Nev. A San Francisco Chronis. It gives relief wherever used, and has the els reporter recently witnessed the astonishing feats of this remarkable man. and was fully satisfied by what he saw from the cough mixtures now in use. Sold that he is really all that has been chains- by all Druggists at 25 cents per bottle. ed for him. His name is Angelo Cardela, an Italian, aged thirty-eight years ; stature, five feet ten inches; weight, 190 pounds ; occupation, laborer ; habits, temperate, though he has no scruples constipation, sick-headaches, fever and ague, against the moderate use of malt liquors and all diseases of the stomach and liver. and the light wines of his country. In personal appearance he is not remarks. | Sold by all Druggists at 25 cents per box. ble ; merely a good-natured looking son R. E. Sellers & Co., Pittsburg, Pa. of Haly, with a broad, heavy face ; a cleacher 24, 1878,-17. noble development of chest and shoulelers, and large, fleshy hands. His AGOODPLAN, had no athletic training. When "stripped to the buff," however, a marked peculiarity in his spinal column is at . my s once appurent. His backbone is, we might say, double-jointed, with the vertebral articulations unusually large and Though he is not a man of unusual size, his spinal column is double the ordinary width, and his other bones and joints seem made on a similar large musual size, his spinal column is double and generous scale. After some solicitation, he family consented to favor the reporter with an exhibition of strength. which proved to be such an astonishing exhibition of lifting power as scarcely to be believed. The reporter, whose weight is 150 pounds, stood with one foot on the floor and arms outstretching, his hands being lightly grasped by two friends, one on each side, to preserve the balance of his body. This slight assistance, however, had no tendency to mize his body, being merely to keep him from toppling over. Cardela then stoop-ed down and placed the third finger of his right hand under the hollow of the T.R. M. R. S. CREERY, Surgeon Dea-

This standard article is compounded with the greatest care.

Its effects are as wonderful and as satisfactory as ever.

It restores gray or field hair to its youthful color. It removes all eruptions, itching

and dandruff. It gives the head a cooling, soothing sensation of great comfort, and the scalp by its use becomes white and clean.

By its tonic properties it restores the capillary glands to their normal vigor, preventing baldness, and making the hair grow thick and strong.

As a dressing, nothing has been found so effectual or desirable.

A. A. Hayes, M. D., State Assaver of Massachusetts, says, ~ The constituents are pure, and carefully selected for excellent quality : and I consider if the BEST PREPARATION for its intended purposes."
