—The most liberal advertisers the FrikeMAN has are Republican in politics, and yet
it is a fact that the first job of any kind we
remember to have ever printed for a man we knew to be a Republican since we came to Ebensburg, was done at this office on Friday last, and that was given to us simply because our neighbor had too much else to do at the time. We don't mention this matter in a spirit of fault-finding, because we have no right to expect men to forget their political preferences even in business matters, but we refer to it merely to call attention to the fact that Republicans as a rule do more for their party organs than Democrats, comparatively few of whom act on the same principle when

they have any printing to do.

A physician was sent for immediately, but death came before the doctor, who could not have averted it anyhow. No blame is attached to the engineer of the train, Mr. Patrick Doran, a native of this county, as the boy tried to cross the track immediately in front of the locomothe track immediately in front of the locomo-tive. The father of the unfortunate youth died from small-pox contracted in Clarion county in 1871, and one of his brothers was instantly killed in Jenner township, Somerset county, by the falling upon him of the sill of a corn-crib in course of erection.

THE COSMOSCOPE. - A New Usefor Edison's Electric Light.—One of the grandest exhibi tions ever attempted to be given to the world is now being prepared by Prof. E. B. Swift, who gave an exhibition in this place on Saturday evening, under the management of H. H. Warner, of Rochester, N. Y. A two hundred horse power steam engine is being constructed to be used in the production of Edison's electric light. This light will be used in conjunction with an immen scope, the invention of Prof. Swift, having a magnifying power of 200,000 diameters, or a surface power of forty billion times. With this instrument Prof. Swift will in the evening throw upon the clouds in immense letters of gold, the words, "Warner's Safe Kidney and Liver Cure," and the names of his other proprietory remedies—the whole describing about the fourth part of a circle, or one-hal of the heavens as we see them. By a series of geometrical triangulations, Prof. Swift has also calculated the exact size of the test plates to be used in the experiment of throwing the letters upon the full moon. This is done by triangulating the distance to said planet, which he finds to be 238,825 miles.—On a perfectly dark night the effect will be grand beyond description. The letters upon the surface of the moon will appear in bright scarlet. Prof. E. B. Swift, in his nightly exhibitions, gives illustrations in throwing let-ters of gold upon a cloudy background. It is one of the greatest discoveries of modern science, and the only instrument in the world that will produce this effect is Prof. Swift's cosmoscope. The lenses for this wonderful experiment are being manufactured expressly for H. H. Warner & Co. by Messrs, Bausch & Lomb, of Rochester, N. Y. Prof. E. B. Swift is not the astronomer, but a cousin of that gentleman, the name of the latter being Lewis Swift. Prof. E. B. Swift is a celebrated microscopist, and as some of the newspapers have been getting the two gentlemen's names confounded, this expla-nation ought to be sufficient to set them

A HANDSOME PAPER.—The Illustrated Scientific News for May is before us, looking handsomer, if possible, than any of the prelandsomer, it possible, than any of the pre-ceding issues. Since its change of publishers last January, this magazine has improved with each succeeding number. The present issue of the *Illustrated Scientific News* is overflowing with handsome engravings and in-

teresting and instructive matter.

Among the various subjects illustrated in this issue is a superb specimen of cut glass ware; an exhaustive article on asphaltum and its use in streets and pavements; a new and ingenious hand car, shown in operation; new steel steamer for use in shallow rivers ; the new Jobert telescope, and an interesting paper on physics without apparatus, also ully illustrated.

Every number contains thirty-two pages full of engravings of novelties in science and the useful arts. To be had of all news dealers, or by mail of the publishers, MUNN & Co., 37 Park Row, Yew York, at \$1.50 per annum; single copies 15 cents.

ANSWER THIS QUESTION.-Why do so many people we see around us seem to pre-fer to suffer and be made miserable by indigestion, constipation, dizziness, loss of appetite, coming up of food, yellow skin, etc., when for 75 cts. E. James, Druggist, Ebensburg, Pa., will sell them Shiloh's Vitalizer, which is guaranteed to cure in every instance?

OUR NEW COUNTY SUPERINTENDENT .-Commenting on the recent election of Mr. Lewis Strayer by the School Directors of this county, the current issue of the Johnstown Democrat takes occasion to pay that gentleman the following well deserved com-

pliment: In the selection of Mr. Strayer as superintendent of the schools of this county we think the directors acted wisely. We say this without disparagement to other candidates who were in the field. Mr. Strayer is a young man of robust health, a good scholar, an experienced teacher, and an honest man. We venture to predict that his administration of the office will be in every way successful. The talk about any doubt of his getting his commission is all the taldest kind of balderdash. The number of directors present at the convention is always determined by the number of responses to the roll call. If Mr. Strayer had a majority of those who answered to their names when called, he had a majority of those present. Those who had been there and had gone away, or those who might have been there and were not there then, or even those present and not voting, if there were any such, had nothing to do In the selection of Mr. Straver as superintendent
