EBENSBURG. PA., FRIDAY. - - - JULY 22, 1881.

DEAN STANLEY, a famous divine,

died in London, on Monday last, aged

about 66 years.

IT will be three weeks to-morrow since the attempt was made on the life of the President, and the latest bulletins from the White House justify a reasonable assurance of his recovery. The attending physicians still refuse to say that he is out of danger, or that he is convalescent, but their language is "that he progresses steadily toward convalescence," and if they can repeat that announcement at intervals during the

next ten days his recovery may be re-

garded as fully assured. THE Johnstown Tribune of Friday last, in mentioning the fact that Judge Black had published in the North American Review for the present month a re- ful assumption by the Vice President of ply to an article by Bob Ingersoll in last month's Review, takes occasion to annihilate the Judge by speaking of him in following chaste and elegant style: "The Christian religion will not be benefited by a defense from such an old beast as in Mr. Arthur himself. And this, too, Black." There is no wit and certainly not because he is an exceptionally bad on no wisdom in this, and it can only be dangerous man as public men are now compared to a "mousing owl" hawking estimated, but simply because he has at an imperial eagle.

"WING'S BREWERS HAND BOOK" for 1881, an official authority with brewers, as we learn from the New York World, fully sets forth the magnitude and rapid increase of lager beer manufacture in this country for the year ending May 1, 1881, as compared with the four previous years. From the "Hand Book" it appears that the total sales in the United States for the year ending May 1, 1881, amounted to 14,125,466 barrels, showing an increase as compared to 1880, when the total sales amounted to 12,800,900 barrels, of 1,324,566 barrels. The largest sales by States during the year ending May 1, 1881, were as follows : New York, 4,856,428 barrels; Pennsylvania, 1,398.154 barrels; Ohio, 1,291,203 barreis; Wisconsin, 927,297 barrels: Illinois, 870,275 barrels; Missouri, 803,427 barrels, and Massachusetts, the home of barrels, and Massachusetts, the home of that whining statesman, GeorgeF. The course of the cyclone could distinctly discerned and it seemed to be noving in separate volumes from the north and south. At 4.30 o'clock black clouds gathered with great rapidity. The thunder and lightning were terrific. The wind blew a hurricane, while the rain descended in nding sheets. There was a moment's lull, and then a cyclone struck the town, almost destroying it, and then disappeared as sudenly as it came. Its effects was almost in-escribable. Some houses were struck by ghtning, others were lifted up bodily by the lence of the wind, and others were demolshed by flying debris from other buildings ores of dwellings and stores were nearly stroyed. Very few escaped uninjured. Many had the roofs blown off, or were so bad-ly unjointed by the wind that they will have o be pulled down and rebuilt. The storm was most destructive in the north end of the city: whole blocks of frame buildings were swept away. Hardly a barn or stable escaped, and it is estimated that over one hunred horses and cattle have been destroyed. G. Randolph, mayor of the city, estimate mate is \$35,000. Aside from the loss of life the worst feature of the calamity is that none of the property destroyed is insured against accidents of this kind. The streets are filled with the debris of shattered buildings. The heaviest in-dividual loss falls on J. Hoenstein, who had just completed a brick brewery at a cost of \$30,000. The building was entirely destroyed. No insurance. The eye witnesses say that the scene during and immediately after the storm was fearful to contemplate and be

As the victims of this sad catastrophe are cattered over a comparatively large area it is impossible to get an exact list of the killed and wounded, especially as the cyclone visited West Newton and caused several deaths. The killed so far as known number fourteer and wounded twen'y four, some of whom are probably fatally injured. There are doubtess many others who have been overlooked in the general confusion. The cyclone de-vastated a stretch of country one mile wide and forty miles long and passed through the town of West Newton, Severance, Palmyra, Wilmington and Cario. MARRIAGE insurance companies are not formly regarded with favor by the Judges of this State, in which they have of late sudfenly become numerous. The methods of these concerns are various, but the common practice is to pay certain sums of money to members at their wedding. Judge Henderson of Lebanon county refused to charter on the ground that marriage is not a legitimate subject for insurance, as it does not not depend on contingencies beyond the control of Rockport, Maine, aged ten years, who was the individual. Judge Mitchell of Philadelreported missing a few days ago, was taken phia, on the other hand, grants charters without hesitation.

HONORED AND BLEST .- When a board of eminent physicians and chemists announced the discovery that by combining some well known valuable remedies, the most wonderful medicine was produced, which would cure such a wide range of diseases that most all other remedies could be dispensed with, many were skeptical; but proof of its merits by actual trial his dispelled all doubt, and day the discoverers of that great medicine, Hop Bitters, are honored and blessed by all as benefactors. - Democrat, M. The Story of the Crime.

District Attorney Corkhill, of Washington who has made a therough investigation into the movements of Charles Guiteau from the he first came to that city up to the day he attempted to assassinate the President, has furnished the following statement for blication with the assurance that the facts detailed by him may be relied upon as accurate. He says:

Curate. He says:

The interest felt by the public in the details of the assassination and the many stories published justily me in stating that the following is a correct and accurate statement concerning the points to which reference is made. The assasin, Charles Guiteau, came to Washington City on Sunday evening, March 6, 1881, and stopped at the Ebbitt House, remaining only one day. He then secured a room in another part of the city and has boarded and roomed at various places, full details of which I have. On Wednesday May is 1881 the assassin determined to murder the President, He had neither money nor pistol at the time. About the last of May he went into 6 Mara's store, corner Fifteenth and F streets, this city, and examined some pistole, asking for the largest calibre. He was shown two similar in calibre and only different in price. On Wednesday, June 8, he purchased the pistol which he used, for which he paid ten dollars, he having in the meantime borrowed efficient dollars, he having in the meantime borrowed chased the pixtol which he used, for which he paid ten dollars, he having in the meantime barrowed fitteen dollars from a gentleman in this city on the plea that he wanted to pay his board bill. On the same evening about seven o'closek he took the pistol and went to the feat of Seventeenth street and practiced firing at a board, firing ten shots. He then retained to his bearding three said wiped the pistol dry and wrapped it in his coat and waited his opportunity.

is opportunity.
On Sunday morning, June 12th, he was sitting a Lafayette Park and saw the President leave for n Lafavette Park and saw the President leave for he Christian Church on Vermont avenue, and he it once returned to his room obtained his platol, out it in his hip pocket and followed the President a the church. He entered the church, but found is could not kill him there without danger of cilling some one clie. He noticed the President at near a window. After church he made an extendation of the window and found he could reach twithout any trouble, and that from that point is could shoot the President through the head without killing any one clse. The following Wediesday he went to church, examined the location and window, and became satisfied he could second window, and became satisfied he could scome to make the attempt at the church the following Sunday.

fore to make the attempt at the church the following Sunday.

He learned from the papers that the President would leave the city on Saturday, the 18th of June, with Mrs. Garfield for Long Branch. He therefore determined to meet him at the Jepat. He left his boarding place about five o'clock on Saturday morning, June 18, and went down to the river at the foot of Seventeenth street and fired five 3hots to practice his aim and be certain his pistol was in good order. He then went to the depot, and was in the balles' waiting room or the depot, with his pistol ready when the Presidential party entered. He saw Mrs. Garfield look so weak and frail that he had not the heart to shoot the President in her presence, and as he knew he would have another opportunity he left the depot. He had proviously engaged a carriage to take him to the juit. On Wednesday evening the President and his

On Wednesday evening the President and his son, and I think United States Marshal Henry, went out for a ride. The assassin took his pistry and followel them and watched them for some time, in loopes the carriage would stop, but no apportunity was given. On Friday evening, July 1, he was sitting on a seal in the park, opposite the White House, when he saw the President come out alone. He followed him down the areane to Fifteenth street, and then kept on the opposite side of the street up Fifteenth until the President contents of the street of Mr. Morton's late residence, corner Fifteenth and H streets, for some time, and then, as he was afraid he would attract attention, he went into an alley in the reas of Morton's residence, examined his pistol and waited. The President and Secretary Blaine came out tagether and he followed them over to the gate of the White House, but could get no opportunity to use his weapon.

the White House, but could get no opportunity to use his weapon.

On the morning of Saturday, July 24, he breakfasted at the Riggs House about 7. He then walked up into the park and sat there for an hour. He then took a one-horse avenue car and rode to Sixth street, got out and went into the depot and lottered around there. He had his shoes blacked, and engaged a hackman for two dollars to take him to the juil. He went into a water closest and took his pistol out of his pocket and unwrapped the paper from around it which he had put there for the purpose of preventing the perspiration from his budy dampening the powder. He examined his pistol carefully, tried the trigger and then returned and took a seat in the ladder walting room and as soon as the President entered advisced behind him and fired two shots.

These facts, I think, can be relied upon as accurate, and I give them to the public to centradist certain false numers in connection with this most atractous of atroctous erimes.

Italian Liberty (1) Brutally Exemplified. THE REMOVAL OF THE DEMANS OF POPE PICS THE NINTH IMPEDED AND OUT-

A special cablegram to the N. Y. World, dated 15th last,, furnishes the following i relation to the recent removal for final interment of the remains of the late Pope, and of the indignities, insults and iniquities per-petrated by some of the intamous infidel rabble of the Eternal City on that solemn

The translation of the remains of Pope Pius IX, from its resting place in the Basilica of St. Peter to the tomb provided for it in the church of San Lorenza was accomplished last might and this menting, the removal beginning at midnight and the whole ceremony being ended before daylight. The ceremony was attended and disgreed be some of the most church large areas in Bonne.

m. The tornt in the church of San Lorenzo has been carried from the chapet and, surrounded by a large body of priests and Catholic laymen, the mortuary procession set forth. The coffin was placed appen a clerificawn by horses and the priests and laymen carrying lighted candles. The scene was solemn and sombre in the extreme, but scarcely had the procession left the steps of St. Peter's than an unruly mob of roughs of the city swarmed around it, hustling and intercepting the priests, endeavoring to extinguish the candles and overture the bier, and shouting. "Long live Italy!" "Isom with the Pope!" "Away with the block gowns!" and so on The disturbance became so great and the fear of a terrible scandal was so imminent that the city authorities were compelled to intervene. The police force proving inadequate, some companies of soilthorities were compelled to intervene. The police force proving inadequate, some companies of soldiers were hurriedly sent for. On arriving they dispersed the mob, order was restored, the procession moved on to the church and the coremonies of placing the body in the tomb were completed.

The same correspondent, in a cablegram dated the 16th, furnishes the following in regard to the feeling created in Church circles

Cardinal Jacobini, Papal Secretary of State, in receiving the Ambassadors and Ministers accred-ited to the Vatican, told them that the Pope had instructed him to say that it was the Pope's per-sonal desire that they should interm their Governwith instructions to leave a copy in the hands of the respective Ministers of Foreign Affairs. A correspondent says that the part of the Pope's message relating to religious services in basilicas confirms what has been confidently asserted in high elerical circles, that, had the removal of the body of Flus IX, been effected peaceably, the Pope would have found an early occasion to pass the door of the Vatlean.

Six men have been fixed and imprisoned for disturbing the funeral procession of lone Pius IX, on Thursday last. There was great disorder at the trial of the prisoners and the court was cleared twice. The centences were received with a storm of shouts and hisses. A crowd of people numbering between two and three thousand cheered the prisoners on coming out of the court, and followed them, shouting. Down with the clericals? The soldiers dispersed the mob, which reassembled at the office of one of the clerical newspapers, tore down the bulletin, and then started for the railroad station to protest to the King and Queen, who were arriving from Naples, but a cordon of police prevented a demonstration.

THE MISSING BULLET FOUND, On Monday last District Attorney Corkhill found the dent and for which there has been so much search. It appears that a German glazier, who tramps around the streets repairing windows, went into the depot to get a ten dollar bill changed on the morning the Presi-dent was shot. He was standing in the main room about 40 feet from where the assassin stood and in a south-east direction. He had begun to unstrap his box in which he carried guass, and had got one strap off his shoulders when he heard the noise of the pistol, and immediately three panes of glass in his box were shattered. He at once rush-ed from the depot, thinking it was no place for safety. On Saturday he was cleaning DYSPEPSIA AND LIVER COMPLAINT. -Is it out his box and found the ball in his putty glass, but says they were so close together that he had not time to get away.
