## Chinese Cream CAMPHOR!

THE GREAT REMEDY FOR HE

RELIEF OF PAIN IN MAN AND BEAST!

Commands the attention of all who have been inveterate sufferers of RHEUMA-TISM, NEURALGIA, HEADACHE, BACKACHE, FROSTED FEET, STIFF JOINTS, and all pains in every portion of the body. The seat of pain is reached by exciting the pores to action, thus enabling the curative properties of the CHINESE CREAM CAMPHOR to enter, which stifles the pain as soon as the affected parts are reached. The liniment must, upon each application, be rubbed in thoroughly; and in cases of Rhenmatism of long standing it should be used three or four times a day, and four applications made each time, until Care, however, should be exercised after the pores are opened, to prevent taking cold.

## FOR HORSES Chinese CREAM Camphor

It relieves Sprained Joints, Thrush in Feet, Sweeny, Poll Evil, Blood and Bone Spavins, Ringbone, and all hard lumps caused by kicks or other bruises. For of Appetite, and Weakness, use the IRON HORSE AND CATTLE POWDER.

Age A half-pint bottle of the CHINESE CHEAM CANVHOR can be had for 50 cents from E. James, Druggist, Ebensburg, Pa.
N. B.—The testimonials of persons using this preparation, either on themselves or their horses, will be thankfully received.

TESTIMONIALS. I have tried the Chinese Cream Camphor for Rheamatism and Nervous Headache, and have found in it instant relief. I have never found its equal in all my travels,—Gronge By 8g, London, Eng., (son of Capt. Sir Geo. Byng, R. I. N., Sin-gapore, India.)

I used the Chinese Cream Camphor for a severe attack of Rhemostism in the right shoulder and attack of Rhonmatism in the right shoulder, and can sincerely say, after having tried several other well-known remedies, that it is the best thing I ever used, curing me completely.—Mill.ARD F. Watton, III N. Alst street, West Philadelphia, March I, 1881. March I, 1881.

After one application of the Chinese Gream Camphor I was released of frosted feet.—Natura Elekan, 415 North Third street, Philadelphia, Pa., Jan. 12, 1881.

Having suffored severely with frosted feet I used the Chinese tream Campher three times, rubbing it in thoroughly, and was cured. My mother tried it for nervous headache, obtaining instant relief, —Axron S. Tatzat, 1215 Molon street, Philad'a. Jan. 15, 1881.

[4-8-6m.]

1s a sure cure for all ordinary diseases of Horses Cattle, Sheep'and Swine. It cures and prevent CHICKEN CHOLERA. Your cow is certain to yield 25 PERCENT, MORE AND BETTER MILK AND BUTTER STOCK FATTENS ON ONE-FOURTH LESS

Being in possession of a large number of excel-lent testimonials, I subjoin a few: I have been using your Cattle Powder for horses, cows, chickens and pigs, and find it a pussy-class thing.—Groupe Boxb, Germantown, Pa. I have used two packs of your Cattle Powder on my cow and chickens. The cow gave nearly Twice the quantity of nilk she did before. My chickens were dying, but were cured immediate by after I had used the powder. Yours, truly. Jonas Paroun, Dallas, N. C.

I have used your Cattle Powder and must say it is the best for horses, cattle, sheep, etc. Tried it on poul'ry for many complaints, with success in string cass.—Jon. Whayen, Berrysville, Pa. Last summer you sent men package of your pow-der which I gave to my poultry, and have not had one droopy turkey or chicken since.—Mrs. WM. KNAPP, Orange, N. Y. Send me a pack or two of your Cattle Pewder.
The pack I got from you last winter cuncum TME
chickey chockes. I gave some of it to a neighbor and it cured his chickens. John Williams,
Spruce Vale, Ohio.

VAN DYKE'S SULPHUR SOAP

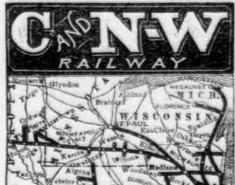

Is superior to all other soaps. It is combined with Sulphur in its pure, unadulterated state, which enters the pores of the skin, being absorbed into the blood through the minute capillaries, and thus acts upon the skin, whether it be healthy or in a diseased condition, both locally and constituoually, thereby eliminating all impurities from the blood and oxciting the skin to healthy action. It produces a fineness, purity and freshness of the complexion which is unequalled, and can be produced by no other means. No toilet, nursery or bathroom is complete without it. It makes the skin soft, clear, pure, white and healthy; is cleansing, deodoring, disinfecting, soothing, healing and puritying; removes dandroff, chafing, nicers, sores, eruptions, roughness and rodness of the skin; relieves itching, burning and stinging of the skin, and irritation of biling and stinging insects; will relieve itching. Burning and stinging insects; will relieve itching. Burning and stinging insects; will relieve itching. Files when nothing cle will have any effect. Ask for Vax Byrke's Sclyner Soap: insist upon it, and take no imitation. Soid by druggists. Aschenizach & Millier, Proprietors, No. 301 Callowhill Street, Philadelphia, Pa. For sale by M. L. Oarman and E. James, Druggist, Ebensburg, Pa.

Hamburg Tea (ASK FOR LENGERKEN'S, THE ONLY GENUINE.) The Creat BLOOD PURIFIER And Furgative, which was known to the famous old Arabian physicians as early as the ninth century, is adapted to the relief of Fevers, Constipation, Febrile Complaints, Want of Appetite, Dropsy and Hemorrholds. It has a decided advantage over all other purgatives, being more thorough in cleansing out the system, without producing the agonizing, griping pains and straining which accompany the action of other eatherties. When Pimples or other skin diseases are also present, sham poot the affected parts thoroughly with Van Dyke's Sulphur Soap. Aschenbach & Miller, proprietors, 2d and Callowhill St., Fhilladneighia, Pa. Sold by E. James, Diregist, Ebensburg, Pa. [11-6.]v.]

E. James, Druggist, Ebensburg, Pa. [11-6,-1y.] CELEBRATED H. H. H. MEDICINE. Persons afficted with aches and pains, and who have not tried the great H. H. H. Medicine, do not know its powers in removing pain. Give it a trial for Rheumatism, Neuralgia, and particularly Diphtheria. A sure cure for horses aufering with Bone or Blood Spavin, Foll Evil and Colic. Be sure and ask for the H. H. H. Medicine, manufactured by D. D. Tomlinson, Philadelphia, as the popularity of the same has led other partics to put an inferior article into the market bearing the same name. Sold by druggists everywhere.

AGENTS WANTED EVERYWHERE to sent thing Machine ever invented. Will knit pair of stockings, with HEEL and TOE complete, in sommittee. It will also knit a great variety of fancy, work for the sent variety of fancy. work for which there is always a ready market. Send for circular and terms to the Twombly Hnitting Hachine Co., 65 Washington St., Boston, Mass.

Parsons' Purgative Pills make New Rich Blood, and will conspletely change the blood in the entire system in three months. Any person who will take a pill each night from 1 to 12 weeks may be resolved to sound health, if such a thing be possible. Sent by mail for 8 letter stamps be possible. WOOD WEAVING.

We take the following details concerning a very peculiar industry from a recent number of Cassell's Magazine: One of the busiest towns of the manufacturing district of the Austrian empire is Ehrenberg, lying close to the Saxon frontier, and distinguished from other towns and villages for its curious industry of wood weaving-sparterie work, as it is called-which was introduced something more than a century ago by a carpenter named Anton Men-The threads used for weaving are no thicker than writing paper, and vary width from the fifth to the twentyfifth part of an inch. The aspen is the only tree whose wood is sufficiently tough and pliable to supply these threads in the required lengths. This tree was formerly indigenous to Bohemia, but has now almost entirely disappeared, so that the raw material for the sporterie work has to be brought from Russian Poland. The wood used for the purpose of weaving must be free from knots, as the smaller defects or irregularities, such as ordinary persons would hardly notice, make the fibers It is the short and best route between Chicago and quite unfit for working. Arrived in Ehrenberg, the wood is planed and di-Ehrenberg, the wood is planed and divided into pieces nearly 21 inches wide. When these have been made perfectly smooth they are divided again by an instrument resembling a plane, but furnished with a number of fine knife blades, which mark the wood at regular distances, according to the width the strips are to be. This process requires the utmost dexterity and nicety, as it is absolutely essential that the divider shall exactly follow the directions of the fiber, and for this reason, among others, it must always be done by hand. The divider makes incisions one-fifth

of an inch deep; the wood is then carefully planed and comes off in thin paper-like strips, some of them not wider than a stout thread. They are gathered up by women as they fall, and are examined and the defective pieces rejected. There is a good deal of waste n the process. The threads or fibers being ready, must be tied in couples at one end before they can be woven. This work is done by little children of four years and upward, who earn eight cents a day. The weaving is done chiefly by women, and on looms which differ considerably from those in ordinary use, the fiber being not more than 38 to 50 inches in length. The longer by means of a little instrument with an eye like a needle. Until within a few inside, and reduce it to a freezing years this concluded the whole process the "foundations," as they are called, were complete, and nothing more was done except that a few caps were made of them. These were of the simplest description, and anything but becoming. moreover, they were glued together, thus making them unpleasant to wear in hot or wet weather; accordingly they brought but 30 or 60 cents per dozen, and were worn by the very lowest classes.

Within the last few years, however, owing partly to the interest taken by the Government in the manufacture, a great change for the better has taken place. At present Ehrenberg sends out not only the raw material, but readymade goods-fashionable hats of all kinds and a variety of fancy articles skillfully concocted out of the wood fabric: ladies' hats of every description and of the latest fashion, such as no one need be ashamed to wear, are made entirely of wood and sold at astonishing low prices. Men's hats are to be had of all shapes, from the Panama hat-not a whit inferior to that bought in Paristo the common hats exported in large quantities to China, and the linings or foundations of which give stiffness to the fez of the Turkish soldier. The export trade embraces all Europe, from Spain to Russia, extends beyond the Caucasus to India and China, and maintains active relations with North and South America as well as Australia. The manufacturers are in direct communication with the four quarters of the world, and their goods are being introduced into Africa by French and English traders

THE SUN CHOLERA MEDICINE .-More than twenty years ago, when it was found that prevention of cholera was easier than cure, a prescription drawn up by eminent doctors was published in the Sun, and it took the name of "the Sun cholera medicine." Our contemporary never lent its name to a better article. We have seen it in constant use for nearly two-score years and found it to be the best remedy for looseness of the bowels ever devised. No one who has this by him and takes it in time will ever have the cholera. We commend it to all our friends. Even when no cholera is anticipated it is an excellent remedy for colic, diarrhea, etc. Take equal parts of tincture of Cayenne pepper, tincture of opium, tincture of rhubarb, essence of peppermint and spirits of camphor. Mix well. Dose, 15 to 30 drops in a little cold water, according to age and violence of symptoms, repeated every fifteen or twenty minutes until relief is obtained. -N. Y. Journal of Commerce.

A CAT STORY .- In the year 1783 a merchant who resided at Messina, in Sicily, had, it is said, two favorite cats and their manner one day alarmed him. The two animals were anxiously endeavoring to work their way through the door; their master, observing their fruitless labors, opened the door for them. At a second and third door, which they found closed, they repeated their efforts; and on being set completely at liberty, they immediately ran straight through the street, and out of the gate of the town. The merchant, whose curiosity was excited by this strange conduct, followed the animals out of the town into the fields, where he saw them again scratching and burrowing into the earth. Soon after there was a violent shock of an earthquake, and many of the houses in the city fell down, of which the merchant's was one, so that he was indebted for his life to the singular forebodings of these don estic animals.

SUNDRY HINTS .- Salt boxes are easily made, and should be provided. They not only economize in salt, but are much better than the ground for animals to eat from. All who have the comfort of their live stock at heart will provide the postures with a few rubbing posts for them. They save fences which otherwise might be rubbed down, do the animals good, and add pleasure to the owner, who will enjoy seeing the animals use them. He is a poor farmer who does not keep his tools sharp. Better use up the grindstone than the extra muscle in working with a dull hoe or scythe. The few minutes that it takes to grind a tool will make the whole day's work an easier one. Grind the tools! -Agriculturist for June.

IMPORTANT, IF TRUE,-In response publish, says the Altoona Tribune, the following extract which appeared in our issue of May 6th:

The Scientific American gives currency to the statement of a German journal that cases of tetanus, or lock-jaw, have been successfully treated by merely apanything in his line will do well to give him a call before purchasing elsewhere.

Watches, Jewelry, &c., and satisfaction guaranteed in both work and price.

Plying to the nape of the neck and along the spine large pieces of flannel dipped in hot water of a temperature just bearable to the hand (50° C). This remedy is certainly a very simple one, accessible \$2 to pair awn the grapes with the purposes. Valuable can be larger from High street. [8-27, 75.]

WIND AND WEATHER. - At a recent THE PRESSURE OF WIND .- In a paper meeting of the Farmers' Club of the efore the American Society of Civil American Institute, Mr. A. J. De Voe, Engineers, Mr. C. BISTORY OF COCHINEAL.

Cochineal (Spanish cochinilla, originally the name of the coccus insect, used in dyeing.) is a substance used in dyeing crimson and scarlet, and is employed in the preparation of the colors carmine and lake. It consists of the which feed on plants of the cactus family, particularly on the cochineal plants Opuntia Cochinillifera, Hernandezii, and Tuna,) nearly allied to the prickly pear.

warm parts of America, and is cultivated for the sake of the valuable insect which feeds on it. This cultivation was practiced by the Mexicans long before the country was known to Europeans. It is now carried on also in parts of the West Indies and Peru, and in the Canary Islands, where it forms a very important article of commerce with Europe and United States. The cochineal insect is very small, a pound of cochineal being estimated to contain not less than 70 000 in the dried state. The male is of a deep red color, and has white wings. The female is winglass, and of a deep brown color, covered with a white powder, flat underneath, convex above. The cultivator procures branches laden with these insects, and keeping the branches till the mother-insects have laid their eggs, he places their bodies, with the eggs, in little nests formed of some cottony substance upon the cochineal plants, and the young insects, when hatched, spread them-

selves over them. The gathering of the cochineal is very tedious, and is accomplished by brushing the branches with some soft brush. such as the tail of a squirrel. The insects are killed by boiling water, by heating in ovens, or by exposure to the sun. They must be quickly killed, to prevent them from laying their eggs, which diminishes their value. When killed and dried, they may be kept for almost any length of time without injury. The coloring principle of cochineal is carminic acid (C14 H14 O8), known in an impure state as carmine, and combined with alumina as carmine lake.

Cochineal is used for dyeing wool and silk scarlet and crimson. The colors are very brilliant, but not durable. They are easily spotted by water and alkalies. The mordants used are alum. cream of tartar, and tin salt.

IS HORSESHOEING USELESS ?- A Tecent issue of Frazer's Magazine contains an article by Sir George W. Cox, in which he estimates that the Euglish custom of horseshoeing costs the nation annually as much as \$45,000,000, which might be saved if the horses were allowed to go unshod. He'quotes authorities from Xenophon, who marched his horses unshod from Cudaxa over the Armenia Highlands to the walls of Trebizond, down to the "free lanciers" of the present day, and contends that it is safer, cheaper and better to let the horses go unshed over the hardest roads, and especially in the slippery streets of London. He estimates that over twelve million dollars would be saved in the farriers' bills alone; and he calculates further that the working life of a horse would be trebled by the change, so that a horse which is now worn out at twelve years would live to thirty-six. The figures seem somewhat startling and have hardly been sufficiently proved to be trustworthy. Meanwhile, it is said that a medical man in Waterbury, Conn., has not put shoes on his horses for two years, driving them winter, summer, spring and autumn with bare feet without any trouble. The doctor's theory is that nature has provided for the horse that a horse can travel over all kinds of roads: that the hoof will be moist, and that the frog coming to the ground keeps the hoof properly spread, and free from founder and other diseases,

SAVING SEED CORN .-- It is early to make the suggestion for saving the seed corn, but it is always in time to make a useful suggestion, such as we have frequently had occasion to present in regard to the greatly increased crop to be obtained from the securing of good seed. The Cincinnati Enquirer says We do not think we would be far out of the way if we were to assert that the farmers of Ohio, Indiana, Illinois and West Virginia are losing a million dol-lars annually on account of their neglect in properly selecting their seed corn. Going through the field in September, and selecting the best ears before the hosks are entirely dry, and leaving two or three husks on each ear, then braiding from six to ten ears together, and hanging them up in some dry place-all this is somewhat troublesome, but it pays grandly; for the farmer provides himself with the best possible seed corn. It is not only sure to come up, but being possessed in the highest degree of vitality, the corn plants will show no puny growth, but will exhibit a rank, healthy and vigorous growth from the start. And where a farmer neglects to save his own seed corn, and he has a neighbor who attends to it in the manner described, he had better go to such neighbor and buy his seed corn from him, even if he has to pay four times the regular market price of corn.

BONE DUST AND ASHES FORWHEAT. -An Indiana farmer gives the following account of an experiment with bone-dust and wood ashes as fertilizers for wheat. One experiment does not confirm any theory, nor does "one swallow make a summer," but either may serve as an indication : "I applied 600 pounds of dry unleach-

ed ashes to the acre, and sowed wheat on that, and the result was only six bushels to the acre. Adjoining this tract I drilled in 200 pounds of bonedust, and the three acres produced twenty bushels to the acre, being an increased yield of fourteen bushels over the tract sown with wood ashes. The following year I used 600 pounds of bone-dust on the plat where I had previously sown 600 pounds of ashes, and the result was forty bushels of wheat to the acre, being double what the bone produced alone. This experiment satisfied me that ashes alone or boue-dust alone would not give me a yield that paid to my satisfaction. This acre with ashes yielded six bashels; the acre with bone-dust yielded twenty bushels; but when the two were combined I harvested forty bushels. This shows that experiments and a small expenditure of money will do for the progressive farm-

AN ALLEGED CURE FOR THE SMALL-Pox.—A thoroughly qualified medical man, a friend of mine, has recently, in the course of his practice, come upon what he believes and uses as a specific remedy for small-pox. He refuses to make it known himself, but permits me to do so. The remedy is bi-tartrate of potash, the common cream of tartar of the drug stere ; two ounces dissolved in boiling water, with the juice of a lemon and sugar alded. Let the patient drink as much as he likes, but not less than a wineglassful every hour. In some of his cases this medicine has avhibited the most wonderful curative effects. It will purge, but as it is ferfectly harmless this will not matter, and it does not appear to be the cause of cure, the remedy acting specifically on the viris, the pustules collapsing, leaving no pits, a perfect cure following in a short time. - Cor. N. Y. Sun.

An easy way to make hard water soft is this: Fill the wash boiler with hard water, then put half a teacupful of wood ashes into a little cloth bag, let this lie | tand, Maine, in the water until that is warm enough

Is a compound of the virtues of sarsaparil-la, stillingla, mandrake, yellow slock, with the iodide of potash and iron, all powerful blood-making, blood-cleansing, and life-sus-taining elements. It is the purest, safest, and most effectual alterative medicine known or available to the public. The sciences of medicine and chemistry have never produced so valuable a remedy, nor one so produced so variable a remedy, nor one so potent to cure all diseases resulting from impure blood. It cores Scrofula and all scrofulous diseases, Erysipelas, Rose, or St. Anthony's Fire, Pimples and Face-grubs, Pustules, Blotches, Boils, Tumors, Tetter, Humors, Salt Rheum, Scald-head, Ring-worm, Ulcers, Sores, Rheumatism, Mercurial Disease, Neuralgia, Female Weaknesses and Irregularities, Jaundice, Affections of the Liver, Dyspepsia, Emaciation, and General Debility.

By its searching and cleansing qualities it purges out the foul corruptions which contaminate the blood and cause derangement and decay. It stimulates and enlivens the vital functions, promotes energy and strength, restores and preserves health, and infuses new life and vigor throughout the whole system. No sufferer from any disease which arises from impority of the blood need despair who will give AVER'S SARSAPARILLA a fair trial.

It is folly to experiment with the numer ous low-priced mixtures, of cheap materials, and without medicinal virtues, offered as blood-purifiers, while disease becomes more firmly scated. Aven's Sausapanilla is a medicine of such concentrated curative power, that it is by far the best, cheapest, and most reliable blood-parifier known. Physicians know its composition, and pre-scribe it. It has been widely used for forty years, and has won the unqualified confi-dence of millions whom it has benefited.
