#### NEITHER GORRILLAS NOR MEN.

A JAPANESE TRIBE OF HAIRY PEOPLE WHO POSSESS TAILS.

Can it be supposed that when Dean Swift libeled humanity by degrading it below the level of the brutes in his dreadful fiction of the Yahoos he ever imagined that there existed aught that approximated toward the odious picture. Yet such is the case. There are, undoubtedly, races whose attributes do, in various degrees, suggest, if they do not realize, the misanthropic fables of the men-beasts of Houyhunms Land. The Niamniams of Africa, who live between the Gulf of Benin and Abyssinda, are said to have tails, a statement confirmed by Dr. Hubsh, of Constantinople, in The "hairy people" mentioned of 1851. old by Hanno seem to have a real existence, apart from the goriila, judging from Miss Bird's account of the Ainos of Japan, a strange, savage, and littleknown race, supposed to be the aborigines of that country, but now only to be found on the Island of Yezo. They are, she says, of the most ferocious aspect, owing to the profusion of their thick, soft black hair and beards, and to the singular fact that their bodies are commonly covered with a vigorous growth of black bair or fur, upward of an inch in length, and incrusted with dirt, for the Ainos never wash. Their food is a "stew of abominable things," and a "thick soup made of putty-clay, which is boiled with the bulb of a white lilly. They believed themselves to be descended from dogs, but other characteristics of this strange people are not unamia-ble. Beyond these instances, and presenting a far more striking resemblance to the Yahoo type, there are the Veddas in Weodahs of Ceylon, their duplicates or Bernco of New Guinea, and kindred varieties discovered in the Philippine Islands, Terra del Fuego, and South America. Only none of these are so hateful as the creatures of Swift's invention. It needed the fierce indignation against his kind, which he has recorded in his epitaph, to depict them. The Veddas and similar races on the island of the Asiatic archipelago are described as the aborigines of their respective countries, who have shrunk into the jungle and forest to escape from civilization, and have lived there for upwards of two thousand years. They construct no habitations, but lodge in caves or trees or under overhauging rocks,-They are stunted in size, seldom exceeding four feet eight inches in stature, and but feebly built, except as regards their arms, which the constant use of the bow renders very muscular, not withstanding their short, ape-like thumbs. With this weapon they kill animals for food, devouring, besides, snakes, reptiles, wild honey, ants, eggs, and carrien of all kinds. They lack both memory and foresight, cannot count or discriminate between colors, are filthy in their habits. and in everything save a rudimentary language of uncouth guttural sounds and some dim vestiges of religion and social order, are the beasts of the field. Saddest perhaps of all, they never laugh. When they die they believe they become devils. Yet this benighted and outcast race, so low in organization, habits and character as scarcely to be distinguished from the monkeys of the jungle among whom they live, practice by instinct virtues which are not too common in civ-Some of these unfortunate quarrel. creatures have been half-tamed by the Cingalese and sent to out-door work. like the Yahoos of the Houylinl nus. -When the Prince of Wales visited the island in 1876, certain of the jungle Veddas were actually caught in snares and traps to be exhibited to him; and one of the number-a female-positively died of fright in being secured. It was not a humane transaction. The Veddas are regarded merely as animals. Finally, it may be remarked, in connection with Swift's curious anticipation, that he placed Houyhnhums Land near the great island continent of Australia. It appears in the map of the first edition of Gulliver" as due south of Nuvst's Land, in about thirty-eight degrees south latitude, and one hundred and fifty-five degrees east longitude. Now, Ceylon is but fifty-five degrees west of this locality, though above, as New Guinea is just below, the equator. The Yahoos could not have been better ac-

On the 1st of this month our stock of Men's and Boys' Clothing and Gents' Furnishing Goods at Oak Hall was seven hundred and forty-three thousand one hundred

and seventy-five dollars and eighty-one cents.

A 743. 175. 81 These are the exact figures.

Where is there another such stock to select from ? The old house has been remodeled. The old hands (most of them) are still there. The old principles of just and right prices, sound goods, fashionable styles, substantial finish, are strictly adhered to.

John Wallancaker

Who founded the business, is at Oak Hall every day looking after things, and in all the history of Oak Hall it was

hever so wide awake

to push up its high standards and drop down to lowest prices.

An old-time greeting to our friends everywhere, and another cordial invitation extended to come to Oak Hall.

Wanamaker & Brown,

DR. B. J. KENDALL & Co.-Gents : I think my duly to render you my thanks for benefits a profits which I have derived from your invalual profits which I have derived from your invaluable and far famed Spavin Cure. My coursin and I had a valuable stabilion worth \$4,000 which had a very and spavin, and was pronounced by four eminent veturinary surgeons beyond any cure, and that the horse was done forver. As a had remort I ad-vised my cousin to try a bottle of Kendali's Spavin Cure. It had a magical effect—the third bottle ouged it and the horse is as well as ever. Dr. Dick, of Edinburgh, the eminent veterinary surgeon was an uncle of mine, and I take great interest in a-sisting his profession. Yours, truly, IANDE A, WILSON, Civil Engineer.

#### Kendall's SPAVIN Cure Witten, MINN., Jan. 11, 1881.

Witnow, Mixw., Jan. 11, 1881. B. J. KENDALL & CO.-Gents: Having got a horse book of you by mail a year ago, the contents of which persunded me to try Kendall's Sparin Care on the hind leg of one of my horses, which was hadly swollen and could not be reduced by any other remody, I got two bottles of Preston & Laddith, Draggints of Wassea, which completely eured my horse. About five years ago I had a three year old coll sweenled very bad. I used your remedy as given in your book without rowelling, and I must say to your credit that the coll is en-tirely curred, which is a surprise, not only to my self, but affe to my neighbors. You sent me the book for the triffing sum of 2b cents and H I could not get another like it I would not take twonty five dullars for it. Yours, truly, Gro, Marness.

### From a PROMINENT PHYSICIAN. WASHINGTONVILLE, OHIO, June 17, 1850.

Washinvorovville, Ohlo, June H, 1880. Dr. B. J. KENDALL & Co.-Gentz: Reading cour edvertisement in Turf, Field and Farm, of Ket dall's Spavin Cure, and having a valuable and speedy house who had been have from spavin for eighteen months, I sent to you for a bottle by express, which in six works removed all lameness and enlargement, and also a large splint from an-other horse, and both horses are to-day as sound as colts. The one bottle was works to me one hun-dred dollars. Respectfully years. H. A, HERFOLETY, H. D.
