

FERMONT, Outc. Jan. 25, 1881. Dir. N. J. Kravnala, & Co.—Gents: I think it my duty to render you my thanks for benedic and profits which I have derived from your invaluable and far famed Spavin Curs. My consin and I not a valuable stullion worth \$4,000 which had a very nad spavin, and was pronounced by four eminent veterinars surgeons beyond any core, and that the horse was fone invever. As a last resert I advised my contract the forms was found to be the forms of the contract. the lors was able lorever. As a last resurt I advised my cousin to try a botthe of Kendall's Spavin Cure. It had a magical effect—the third bottle cured it and the bottle is as well as ever. Dr. Dek, of Edinburgh, the eminent veterinary surgeon was an uncle of mine, and I take great interest in assisting his profession. Yours, truly,

James A. Wilson, Civil Engineer.

Kendall's SPAVIN Cure William, Miss., Jan. 11, 1881. B. J. KESPALL & Co.—Gents: Having got a horse hook of you by mall a year ago, the contents of which persuaded use to try Kendall's Spavin Cure on the hind leg of one of my horses, which was badly swellen and could not be reduced by any other remedy. I not two bottles of Preston & Luddight, Brungists of Wassen, which completely cured my horse. About five years say, I had a three year old out sweenled very had. I need your remains as a like to be a second out to be reduced by the completely cured my horse.

From a PROMINENT PHYSICIAN.

Washingtonville, Onto, June 17, 1850. for digitied months. I won't to you for a bottle by express, which is six weeks removed all lamences and enlargement, and also a large spink from another large, and both horses are to-day as sound as colts. The one lattle was more to me one handred dullars.

Respectfully was a set.

H. A. BERTOLETT, H. D.

I tried everything man could desise to care it, but all in value, and was about to give it up when a friend of mine in this city care is me and recommended "Kemalli's Spacial Core." which I tried with grand results, rainvaring the bone sleve and sizes and of superior were ever of architectures in the city care is me and recommended "Kemalli's Spacial Core." which I tried with grand results, rainvaring the bone sleve and sizes. It then sent Scentts to you for one of your allowed the form Bones, and I think there is no better ones printed on the horse wood like diseases. I have taken great interest in it, out have since sold IS copies for you to my neighbors, and will try and do what good I can by getting them for others.

Yours truly, V. P. r. Murner.

KENDALL'S SPAVIN CURE in its effects.

Simple Experiments in Electricity. simple Experiments in Mectracity.

Simple Experiments in Mectracity.

Simple Experiments in Mectracity.

A great many experiments can be proposition officer who shall hold or who shall within two months have held an office, or appointment or employment in or under the government of the United States, or of this State, or of any city or county, or any municipal board, commission or trust in any city, save only justices of the peace, and aldermen, notaries public and persons in the militia service of the State; nor shall any cited office to be filled at an election at which he shall serve, save only to such subordinate manicipal or local officer, below the grade of city or county officers, as shall be designated by law.

And also the following Acts of Assembly now in force in this State, viz:

A great many experiments can be proposition of the great with glass tubes, sticks of saling wax and sulphur, when only small quantities of electricity are required. The best rubber for a smooth glass tube is the rough side of a black offed slik.

A little breswax drawn over the Surface of a tube will greatly increase its power. In rubbing a tube, the hand should be kept two or three furthers below 'the appear part of the rubber, otherwise the electricity will discharge itself upon the electricity will discharge itself upon the hand and nothing will remain upon the tube for the experiment. When the tube is in very good order, and strongly

proach of any conductor, except what moisture may float in the common atmosphere. THE MAGIC FEATHER. - Electrify : smooth glass tube with a rubber, and hold a small feather at a short distance from it. The feather will instantly fly to the tube, and adhere to it for a short time; it will then fly off, and the tabe can never be brought close to the feath er till it has touched the side of the room, or some other body that commisnicates with the ground. If therefore, you take care to keep the tube between the feather and the side of the rolm cheering judge shall not strend, then the imposence who shall have received the highest number of worse shall appoint a judge in his phase, and if any vacancy shall continue in the board for the space of one hour after the time fixed by law for the opening at the election, the qualified voters of the township, worst, or displict for which such officers have been elected shall elect some of their manner to fill the vacance. ing before the smooth tube, it will be

> continually from one tube to the other, till the electricity of both is discharged. THE ROTATING PIPE. - Lay a watch down on a table, and on the glass buiance a tobacco-pipe very carefully. Next take a wine-glass, rub it quickly with a silk handketchief, and hald it for half a minute before the fire, then apply it to the month end of the pipe. and the latter, attracted by the electricity excited by the friction and warmth of the handkerchief and guass. will immediately follow it; and by carrying the wine-glass around, always in front of the pipe, the latter will continue its rotary motion, the watch glass being the centre on which it ro-TUSTAGE

immediately attracted by an excited

rough tube or a stick of wax, and fly

ELECTRICAL PAPER -Take a piece of common brown paner, about the size of an octavo book, hold it before the fire till quite dry and hot, then draw is briskly under the arms several times, so as to rub it on both sides at once by the cont. The paper will be found so now erfully electrical, that if placed against a wainscoted or papered wall of a room, it will remain there for some minutes without falling. If the paper HAVING general be again wermed, and drawn under the arm as before, and hung up by a thread attached to one corner of it, it will hold up several feathers on each side, Should these fall off from different sides at the same time, they will cling togethe er very strongly ; and if after a minut , they all be shaken off, they will fly to one another in a very singular manner.

THE ANIMATED SPIDER. - Cut a bit of cork in the form of a spider, furnish and it with eight white thread legs, and ron go For through the body a long black silk thread, by which hang up the imitation insect. Excite a rod of cealing way and another of glass, both by upons of a rubber, and hold them on each side of the spider, which will vibrate backward

side of the glass with a black silk bandkerchief, or a piece of flannel, and the bran will dance up and down under it with much rapidity, THE EXCITABLE BALL. WHEN and excite a piece of brown maper as befor. lay it on a table, and place upon it a buil, made of elder-pith, about the size of a pea; the balt will immediately run across the paper; and, if a needle be pointed toward it, it will again run to

another part, and so on for a consider-ADRERING GOOSE-QUILLS .- If a piece of paper be placed on a smooth table, and then rubbed smortly with India rubber, the electricity will be so wait great that two or three gives quitts now be made to adhere to the under sub-of the paper after it has been relied from

animals clean. This can only by I enby having their news arranged to adm. of easily cleaning. Owing to be not water, which makes their personners ly wet. If one can so strange lies pens as to have a slat floor and and drainage underneath, it will add to a to the health of the occupants. Ba they are to be kept on the ground, do pen should be thoroughly cleaned on every day and rebedded with dramatic ial. If your pen has the bus sales smell about it, you may know that are not doing your best for your raand that they need attention. Ev pen should be fitted up with tittle boxes, and it is surprising how soon the young calves will eat whole ones and corn. If your calves should get leasy as the best kept calves will sometimes, take some waste grease-land is the best-cut it with a little kerosene and turpentine, and then thicken with some dry pulverized surphir, and rub on the hair where the lice are. Look at the animal next morning, and, if one of the parasites can be found, rub on some

fore the sun," A GOOD JERSEY COW .- An exchange says that Attorney General Hardie, Kentucky, owns one of the most extraordinary of living cows; and she is as yo beautiful as she is good. In a single dress, non-paid, day her yield of butter has been as much see stames. W as two pounds two ounces of butter, and from the time of calving-22nd of May -up to this date the yield has at no time been less than two poinds tom ounces. Tested for four days n succession, at the last of June, the average Described in House, the yield of butter per day was two pounds eight ounces, or at the rate of seventeen pounds and a half each week. Shortly after calving she gave thirty-six pounds of milk per day; and the yield now is from twenty-eight to thirty-one pounds. She has not yet attained the (ni) meas-ure of her powers—being as yet only a nice by nice delices, we will deal heifer. She is a prize, and it will take a sum of money to buy her.

more of the ointment; it works like a

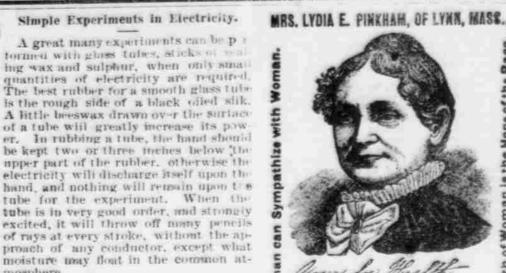

charm: the lice disappear like "dew be-

THE COW WITH HER FIRST CALP, ... BE Address JOHN C WESTS IN SEC. SEE A 181 W 198 Hour St. Charges It is often the case when a heller has her first calf, that the farmer thinks she will not give more milk than will keep \$500 REAVARD! her calf is good condition, and let them run together to teach her the mystery of teing milked the next time she has a calf. In this decision there are two mistakes that go far to spoil the cow for future usefulness.

Wit will july the above tent of the addition that the addition of the part of the addition of the part of the addition of the additi her calf is good condition, and let them

Cows are largely the creatures of hatit, and with their first calf everything is new and strange to them, and they readily submit to be milked and think it is not submit to be milked. Parsons' Purgative Pills make New Rich Blood, and will completely change the blood in the entire system in three months. Any person who will take, pill seek night from ito izweeks may be restored to sound health, if such a thing are he restored to sound health, if such a thing he possible. Sent by mail for 8 letter stamms ing habit is established that they will hard-(ormerly Banger, Me. Il they ever submit to be milked quietly, it is evidently under protest,
