are of the Paterson variety. fortification in the world. It has already cost the Government over \$3,000,000. The water battery is considered one of the finest military works in the world. The loftiest active volcano is Popoca-

peti (smoking mountain), thirty-five miles southwest of Pueblo, Mexico. It is 17,784 feet above the sea level, has a crater three miles in circumference and 1.000 feet deep.

The longest span of wire is used for a between Bezora and Sectanagrum. It is more than 9,000 feet long and is stretched between two hills, each 1,200

The largest ship is the Great Eastern. She is 680 feet long, 83 feet broad and 60 feet deep, being 22,927 burden, 18,916 gross and 13,334 net register. She was annohed January 31.41857.

The largest tunnel in the world is that of St. Gothard, on the line of railroad between Lucerne and Minn. The summit of the tunnel is 900 feet below the surface at Andermatt, and 6,600 feet beneath the peak of Kastelhern, of the St. Gothard group. The tunnel is 264 feet wide, and 19 feet 10 inches from the floor to the crown of the arched roof. It is 94 miles long, 12 miles longerathan the Mt. Cenis tunnel.

The most extensive cavern is the Mammoth Cave, in Edmonson county, Ky. It is near Green river, ten miles from Cave City, and about twenty-eight miles from Bowling Green. The cave consists of a succession of irregular chambers, some of which are large, situated on different levels. Some of these are traversed by navigable branches of the subterranean Echo river. Blind fish are found in its waters.

The largest trees are the mammoth trees in California. One of a grove in Tular county, according to measurement made by members of the State Geological Survey, was shown to be 276 feet and 76 feet at a point 12 feet above the righ and 34 feet in diameter. Some of the largest that have been felled indicate ar, age of from 2,000, to 2,500 years, The largest inland sea is the Caspain

reatest length is 760 miles, its greatest square miles. Great Salt Lake in Utah, which may be properly termed an inland sea, is about 90 miles long, and has a varying breadth of from 80 to 25 miles. Its surface is 4,200 feet above the sea, whereas the surface of the Caspian is 84 feet below the ocean level.

The largest empire in the world is that of Great Britain, comprising 8,557. 658 square miles, more than a sixth part fourth with its 50,000,000 people. Russia ranks second - 8,352,940 square miles.

The highest monolith is the obelisk at Karnak, Egypt. Karnak is on the east bank of the Nile, near Luxor, and occupies a part of the site of an ancient Thebes. The obelisk is ascribed to Hatasu, sister of Pharaoh Thothmes III., who reigned about 1,600 B. C. Its whole length is 122 feet; its weight 400 108 feet 10 inches. The height of the obelisk in Central Park, without pedesons. Its height, without pedestal, is about 168 tons.

The Chinese wall is the largest wall in the world. It was built by the first emperor of the Tain dynasty, about 220 B. C., as a protection against Tartars. It traverses the northern nonedary of China, and is carried over the highest hills, through the deepest valleys, across rivers and every other natural obstacle. Its length is 1,250 miles. Including a parapet of 5 feet, thickness at the base 25 feet and at the top 15 feet. Towers or bastions occur at intervals of about

The largest library is the Bibliotheque National in Paris, founded by Louis X-IV. It centains 1,400,000 volumes, 30-0,000 pamphlets, 175,000 coins and medals. The collection of engravings exceeds. 1,300,000 contained in some 10,-600 volumes. The building which contains these treasures is situated on the Rue Richellen, Its length is 540 feet, its breadth 130 feet. The largest library in New York, in respect of separate works is the Astor. About 190,000 volumes are on its shelves

peats a bogle call until it seems to be sounded from a hundred instruments : and that on the banks of the Naha, be- said borough. tween Bingen and Coblentz, which repeats a sound seventeen times. The most remarkable artifical eche known is that in the Castle of Simmonette, about two miles from Milan. It is occasioned by the existence of two parallel walls of considerable length. AGENTS Wanted oks & Bibles THE ELEPHANT IN THE MIDDLE Matthew Paris mentions that the Soun

of Babylon, Malek el Kamei, sent an els

phant as a rare present to the Eupen Frederick II., in the year A. D. 1923 (s. Frederick Madden's edition of the "The toria Minor," vol. ii., p. 314). But it was not until the year 1255 that the first slept was seen in England. This was press by the King of France to King Henry in The chronicler, John of Ozonesles, chronic the arrival of this animal at London and declares that it was believed that none last ever been brought to Ragland before O the dephant, Marthew Paris made a very good drawing, the original of which is go extant among the Cottonian manuscript h the British Museum (Nero, D. L); and to equally good, but smaller, drawing is graby John de Walingeford, in another Conian manuscript (Julius, D. VII.) In beast arrived at Sandwich, and was to veyed to the Tower of London, when a sheriffs had been directed by royal proper to build a house for it, forty feet in least and twenty feet in breadth, taking mes; lot the building have sufficient strength be fit for any other purpose. The mind ifself was ten feet in height from the top of the back to the ground, and was ten year old. It lived on to the forty-first year of Henry HI., A. D. 1257, in which your has pears from the "Chancellor's Roll " that he the maintinance of the ciephant and t heeper, from Michaelmas to St. Valentine day, immediately before the subsal dist, a the age of twelve years only, the charaamounted to £16 13s. 1d. The name of o keeper is recorded to have been John Good Many chroniclers mention this slephen-(c. g., Matthew Paris, iii., 334; Anish of Burton, i., 929). The "Majora" of Mo. thew Paris states (vol. v., p. 489) that to elephant had ever before been seen on the side of the Alps, but that statement of hardly agree with the record of the slean presented to the German Emperor in A p 1229, as already mentioned. Crowds of people went to see the King's elephon as cording to this author, and we may wall is. lieve it. The drawings seem to indicate a

A NEW RACE OF PEOPLE IN RUSSIA.

......

Indian rather than an African elephant by

it is difficult to determine the question.

In the Revue Scientifique, Mr. G. Le Bin treats at some length a hitherto minuse people inhabiting an obscure part of has sia. Peculiar circumstances having indust the author to visit the Tatras Mountains very curious and beautiful region, and us very little known, since he was appared the first to traverse it, he found there a ritory surrounded on all sides by so mountains and inhabited by a people speak ing a different language from the nancy surrounding them and with whom they had no intercourse. These people, although a than a century ago given up to brigands as the author learned in his study of the are now very industrious and hones. I spite of a climate so harsh that it would be necessary to go to the extreme north to he a similar one; in spite of a very inferio seil, and in spite of an almost Lacylernarkable state of prosperity. They

As regarde its origin, Mr. Lo Box ficelf more and more, and not unitssame selection, the primitive aggles: has become more and more and more geneous and finally formed a new whose homogeneity may possibly still crease, but which already powerous out hereditary characters that permissit to olearly differentiated from all surround

HOW TO TELL WHAT CORN WILL GEL

The Prairie Farmer offers the follow as a test relative to the vitality of seed of "The seed will be plump, beight and a out any wasted appearance in the 's where the grains come together. If grain is out across, or if carefully p down, the 'chit' (germ) will show the nowever, to be remembered in the seed-bearing qualities do not thereby as to be injured. On the contrary, very the the seed yield of a plant is diminished by too luxuriant growth, and from a well-know

"It is well known that the Indiana hald ernde but pretty sure way of saving an corn. How was it? Husking it when " hanging it up in the wigwars in the so it, secure from moisture, in the ground more civilized and better plan is perfectly ripe and bright ears, see. best, trice them up in a dry, siry ish verififrom mice and other vermin."
