says that some days ago Mr. Christian Hoover who resides a few miles west of Shippensliving, called at the News office, for information in regard to advertising an astray steer, but thinking the animal might turn up, said he would let the matter rest for the present. One day last week he informed us that the eteer disappeared in October, on the day they were threshing, and after a lapse of forty-one days it was discovered under the straw stack. The cattle in the barn-yard had eaten around and under the old stack and it turns out that the steer was in this place and was gradually covered up with the straw notil unable to get out -Early in December a calf was missing but it was supposed that it got under the stack in a small opening between the old and new stacks. On the sixth of this month the calf was brought out of this place and, greatly to the surprise of the parties, the steer was also posed of out straw which was damp. This with the small opening to admit the air kept the animal alive and lo fair conditon, and its first desire on regaining liberty was a draught of fresh water.
