

On Wednesday last week a man named Thomas Dalton, aged about twenty-seven years, who was tramping his way to Pittsburgh and who, laid down to sleep across the track which runs on top of the coke ovens of Gallitzin, was run over and he lay one leg so badly crushed that the physician called to attend him found it necessary to amputate it. As he had no money and no friends he was taken to the almshouse.

Mr. Dalton, of Loretto, Pa., has decided to close out and settle up his present business at that place, therefore, he will sell his present large stock of dry goods at greatly reduced prices, ten to twenty per cent. less than former prices for cash or good marketable produce.

Mr. Dalton's accounts must be settled up on or before November 1st, 1885, after that date his books will be placed in proper hands for immediate collection.

Postmaster Commissioner Black has just decided to increase the pensions who had arms amputated below but near the shoulder joint that they were entitled, under the act of March 3, 1885, to pensions of \$37.50 per month. The decision covers, it is believed, all cases of amputation near the elbow, knee or hip joint where the cut is near as to render the remaining bone useless, the language of the law being identical and the principal involved being the same.

A strange and fatal accident occurred at the Porter House, Williamsport, on Friday last. James Walbert, a well known character and a resident of the town, climbed up on a ladder and fell, striking an iron track hammer on the floor. The claw of the hammer glanced upwards and penetrated Walbert's body under the right armpit. He was literally stabbed to death with the hammer. Death was almost instantaneous, the hammer severed the axillary artery and axillary vein.

New Process flour has got to be all the go and in order to keep up with the times, Mr. Samuel O'Hara, of Munster township, has just finished putting into his mill the most complete and best equipped flouring machinery and now has no more to be found in the State. He is now turning out flour from his new mill that cannot be surpassed. If you wish to have good bread, order a sack of his flour and our word for it you will find it elegant. We have tried it and know whereof we speak.

A Common Sense Idea. Farmers and other outdoor workers, have long suffered from the too rapid wearing out of the soles of their Rubber Boots. Dirt and gravel, when wet, offer the best possible tools for cutting and grinding away the rubber sole of the shoe. This destructive agency Rubber Boots are continually exposed, from the very nature of their use. Some two years ago, however, the CANDEE RUBBER CO., of New Haven, Conn. hit upon the idea of making their boot soles double thick in that part which undergoes the greatest amount of wear. By their invention the extra rubber is added on the ball just where it is needed, and no more else. So that while the boot is increased one hundred fold in durability, the weight is but very slightly increased. This improvement is advertised as the "Thick Ball, H. Childs & Co. of Philadelphia, the "Candee" Co.'s Distributing Agents. For our readers who are interested in the "Candee" boots, I make a small stock, 2 tables and many other articles. Sale to commence at once.
