It should, to elect its own school directors: It is not dealed that the borough of Ebensburg is subject to the general borough law of April 3, 1851. The 26th section of that act fixed the number of school directors in a borough at six and directed that they should he elected under the provisions of the laws regulating common schools. They were so elected upon a general tick-

in January last, that each ward in said bor ough should elect one school director. This action of the court was clearly war-ranted by the set of May 15th, 1884, P. L. -159, and its supplements of February 16th, 1883. P. L. page 5, unless there is some other controlling legislation. It was contended on behalf of the plain in error, that the act of May 1st, 1861. entitled "An Act to Divide the Borough of Ebensburg into Two Wards," was such leg-

islation ; that said act was local and special, and under all the authorities was not re pealed by the general set of 1874, and its supplement of 1883. The object of the net of 1861 was merely to divide the borough into two wards. It granted no powers and prescribed no duties in regard to the election of school directors

all this was regulated at the time by peral law; all that the act of 1861 did was to declare that its passage did not disturb these matters; they should remain as here-We are clearly of the opinion that the berough comes within the act of 1874, and its supplements. It follows that the learned judge below committed no error in making the order of January 6th, 1885, and the said

order is affirmed. A Wonderful Discovery.

Surface Indications

What a miner would very properly term "surface indications" of what is beneath, are the Pimples, Sties, Sore Eyes, Bolls, and Cutaneous Eruptions with Boils, and Cutaneous Eruptions with which people are annoyed in spring and early summer. The effete matter accumulated during the winter months, now makes its presence felt, through Nature's endeavors to expel it from the system. While it remains, it is a poison that festers in the blood and may develop into Scrofula. This condition causes derangement of the digestive and assimilatory organs, with a feeling of enervation, languor, and of the digestive and assimilatory organs, with a feeling of enervation, languor, and weariness—often lightly spoken of as "only spring fever." These are evidences that Nature is not able, unaided, to throw of the corrupt atoms which weaken the vital forces. To regain health, Nature must be aided by a thorough blood-purifying medicine; and nothing else is so effective as

Ayer's Sarsaparilla,

which is sufficiently powerful to expel from the system even the taint of Hereditary Scrofula.

The medical profession indorse AYER's The medical profession indorse AYRR's SARSAPARILLA, and many attestations of the cures effected by it come from all parts of the world. It is, in the language of the Hon. Francis Jewett, ex-State Senator of Massachusetts and ex-Mayor of Lowell, "the only preparation that does real, lasting good."
