Take inventory. Sow annuals for early.

There is a double oxalis.

Neatness is its own reward. Prone the grapes at once. Plumbs do best on a clay loam. Suppose you get up a stoneboat now. One florist forces sweet peas in win-

Hens are early risers; feed to correspond.

All flowers naturally turn towards the light. Plow one year to the trees; the next

away from them. The most active roots of a tree are

far from the trurk. Early orders at the nurseries will secure good selections.

Kill every plant louse; these increase rapidly from now on. Plant the Favorite or the Optimus to-

mate and you'll not miss it. The sweet vernal grass in pastures gives a fine flavor to dairy products.

Eggs laid without shells come from overfeeding, and lack of lime in the

For a sure catch, many prefer to sow clover seed in February than to do it later.

Hen's eggs hatch in twenty days, turkeys and ducks in twenty-eight days, and geese in thirty days. A dab of mucilage around the base of

camellia flowers will hold their petals much longer from falling. For the hot-bed choose soil from a nice, rich patch where there were neith-

er many weeds nor injurious insects last season. If your farm doesen't pay consider whether it owes you anything. You may not have given it the plant food

and substance that would entitle you to large returns from its bosom. Rats are a pest about the chicken yards. Cats sometimes are almost as bad when there are young chickens about. Do you know how the former detest chloride of lime? If this is scattered about their runs freely they

will clear out. In starting Canna seeds, first soak in warm, but not hot, water for four days. Then plant in a pot of light earth in the warmest window you have; with this treatment they will shoot up like peas. The fact is we always enjoy growing these plants from seed; they come

along so finely. A York State farmer raised 100 bushels of shelled corn to the acre. It was from land that had been two years in clover. Under each hill was placed a bandful of hen manure, dusted with lime. This is a fertilizer that will bring good returns every time, but it must not come in direct contact with

seeds and roots. Notwithstanding the many new sorts of peas offered, our readers will not miss it by planting the First and Best for extra early. Others that should be used are American Wonder for dwarf, Premium Gem and Yorkshire Slive for general crop, and Champion of England for late. Abundance, Stratagem, Esen-bearing and Market Garden, are all worthy of trial.

Some men have great difficulty in marking out, and are obliged to use a line and reel in order to get the rows straight. A good way to do this is to use a wheelbarrow as a marker. Naila crosspiece against the front board to project on both sides of the barrow .-To this, at such a distance from the centre on each side as you want the rows spart, attach a piece of chain to drag on the ground. Then pass back and forth across the patch to be marked, being guided by the last mark made,-The idea in using a wheelbarrow is, that there is little chance of its diverting sideways, and straight rows may easily be made.

In speaking of exercise for hens, an exchange says: With laying begun there will be an appetite for more food; with more food there should be more exercise. But the weather is unfavorable to this outside, so there should be gotten up some kind of a scratching box for chickens. Most any kind of a light, dry material in the box into which some grain has has been scattered, and worked in a little with the foot will do. Remember now that hens, more than any other live stock, naturally exercise themselves in gathering food. It's ly. It is policy now to meet this natur. roam, scratch and peck almost constantal want. How easily done.

After coming up through the yard into the house during some of these flerce andbiting gales, take eno ugh of ferce and bitting gates, take end ugn of your leisure time by the warm fireside FURNITURE to plan for setting out some effective evergreen wind screens this spring .-Don't know what kinds to set? We tell you freely that the White pine, Austrian pine and the Norway spruce are among the quickest growing sorts, and they are not at all expensive. Start with young trees, say planting five feet apart and not too regular; make the soil rich, keep it clean of weeds, and the trees will be eight feet high in a ALTOONA, PA. few years. Then the addition to the comfort and beauty of the home will be worth a hundred times more than the cost amounted to. A word to the wise comfort and beauty of the home will be is sufficient.

One objection often raised to hiring help early is that you have to pay more than by walting some further on. Admitted; but then let us remember that it is the best hands that find places first and at the highest rates. Not near enough distinction is made between the best and merely fair help by farmers. When biring the latter is always high priced, the former is very seldom paid priced, the former is very seldom paid enough proportionately. Hiring is usually done for the season of eight months or more. In such a period of upwards or more. In such a period of upwards or more. of two hundred working days there is a Magents Wanted Training Given Knickerbook of Marie Management of two hundred working days there is a Magents Wanted Training Given Agency. vast difference in the results accruing P. O. For Sic. to one's interests from the man who works faithfully and industriously day after day throughout, or the man who is a mere time server. In point of fact, of two men who may come along asking the same wages, one may easily be wo rth twice as much as the other. Let us discriminate with great care here and pick the batter man.
