The Burgher.

One night a lady, on going to her bedroom, long after the rest of the house-hold had retired for the night, saw to ker dismay a man's foot protruding from the drapery of the toilet table. What was she to do? Here was evidently a burglar, the house was a large, rambling old place, and her room, at the very top, so far distant from those of the rest of the household that should she call for help no one could possibly hear her.

Like lightning the thought flashed through her brain. If she could only get at the gong in the hall so as to alarm the household. But then there was the fear of his following her. Walking quietly out of the room, she

closed the door, and, finding the key outside, turned it hastily in the lock. ran down stairs, and sounded such a furious tattoo on the gong as speedily brought the members of the household round her.

The gentlemen of the party, thinking it rather a good joke, ascended to secure the would be burglar, and caught him in the act of emerging from the lady's room, he having succeeded in picking the lock. After a short scuffle he was secured ere he could reach the open window on the ground floor, by which

he had effected an entrance. A spice of humor is often exhibited in the way some people rise to the occa-STOR.

When, at a large public dinner in London some years ago, a gentleman saw a rather suspicious-looking man aitting opposite him at table quietly pocket a silver spoon and fork, he at once seized his spoon and stuck the handle ostentatiously into his button-hole.

tinued across it we would have reached the coast of Labrador, 150 miles further on. As it was we travelled 550 miles in thirteen hours .-- [Richmond Dispatch.

4.4 A Round Peg in a Square Hole.

Another great mistake of parents is made a ittle further on when the education the child is to receive and the work he is to do in life begin to be considered. Most parents have preconceived ideas of what their children shall do in the world, and it is somtlines very hard to modify or change them in accordance with the child's natural tastes. They are like the parents of a boy with when I had acquaintance, who had determined, I think even before the Loy's birth, that must be a lawyer. The boy proved to have no taste what-

ever for the law or for a student's life, but seemed possessed of real mechanical genius. From a child he could do anyng with tools requiring delicate manipulation, was always contriving and in-venting new machines to work with-In short, was a decided genius of the in-ventive order. But he was laboriously drilled in Latin, wept unavailing tears over it, was sent to college at great sacrifee on the part of his friends, gradu-ated, was made to study law, did study was admitted to practice, and tried his best to do what he was unfitted for. Having now come to man's estate, he took the matter into his own hands. turned his law office into a machine shop, and began successfully the work he should have been encouraged to undertake in the first place. - ----

Gold dust buying in the mining towns was a very pr litable business in the early days of California. What was cuited black sand composed principally if from, was always minuted to a greater or less degree with the dust when it was brought to the inver. This had to be blawn out, and often the finest particles of gold were blown out with it.

Thus in an onlice where a large quantity of dust was hought much of the five gold would be scattered around the room. The dustings of a buyer's counter and sweepings of his floor were often worth hundreds of dollars a month. simulates the bayers were suspected of theat ug in a more illegitimate manner by slyle arrow rating some of the gold while they are studing it around and examining it to the blow-pans.-[San Francisco P. C.

Pay of Congressmen.

When a member dies his pay ceases on the day of his death. The salary of the successor commences the day after the decease of the former member, though the election may not occur for several months. The new member, in other words, draws pay for the time he never served.

A member is allowed twenty cents mileage each way, or forty cents a mile one way, and he can check for the full amount of both trips when he takes his seat. He is allowed \$125 a year for stationery. The most of this sum is pocketed.

The members draw their money in different ways. There are probably twenty of the present House who let their salaries run into nest eggs.

There are a couple of dozen of members who always overdraw, or, rather, borrow from the head of the bank. They borrow or get in advance sums ranging from \$10 to \$300, and at the end of the month they have not ing. The great majority of the members draw all that is coming to them at the end of each month, particularly those who

Where Our Senators Were Born.

Five Senators can never become Presi-

dents, as they are foreign-born, Beck having been born in Scotland; Jones, of Nevada, in England; Fair, Sewell, and Jones, of Florida, in Ireland.

New York has given birth to more of the present Senators than any other State, the number being eight. Kentucky, Ohio and Virginia can boast of six each, Virginia and West Virginia being con-sidered in this estimate as one: Massachusetts and Pennsylvania five each, with the remainder scattering. Four een have been born in New England. Only four States west of the Mississippi-Indiana, Missouri, Iowa and Minnesota -have given birth to Senators. Not a Senstor has been born in the

western half of the United States.

Costly Opinion.

A New York lawyer once mets man in the doorway of the court-room who was making change with some employee. The man stopped the lawyer and appealed to him as to the genuineness of a \$5 bill.

"Quite good," said the attorney, complacently putting the note in his pocket

The man thanked him and asked him to return the note. His consolation was the wave of the lawyer's hand as he said:

" I never give an opinion under five dollars."

As to Marriage. A matrimonial authority wisely says :

"These two rules will be safe to fol-

low in all but a few exceptional cases :

First, for a woman to refuse marriage

with any man who is objected to by her

male relatives, provided they are reason-

ably well acquainted with the object of

supposed affection ; and, seco dly, for

a man to refrain from offering his hand

in marriage to a woman who is not ap-

proved by his sister, or, if he has none,

will rarely be heard of asking for bills

"People who observe these precautions

by his judicious lady friends.
