It has been frequently remarked that the Jawish race has a wonderful power of adaptation to all climates. Jews are found in all parts of the globe, and Seem to possess a remarkable facility for sectionalization, even under the most unfavorable circumstances, Mesopo-1 tamm is considered the mother country of the Abrahamic family, as well as the cradle of the human race. Some years: ago a small colony of Jows, were tound in the ancient city of Sennar, in the south of Mesopotamia, and in the vicinity of ancient Bubylon. Of the seventy families composing the colony one claimed to be descended from King that the most delicate stomach will bear Joachim, the rest from the house of Levi. A colony of Jews appear to have settled in China about the beginning of the Third century of the Christian era. under the dynasty of Han. In 1704 Father Gouzani, a Roman Catholic missionary, found seven families near Pekin.

In 1686 a Portuguese Jew of Amsterdam, named De Pavia, discovered a sect of Jews in Cochin China. According to a tradicion preserved among them, they were descended from a tribe of Jews who has quitted Palestine on the destruction of the accord temple, THE KASKINE CO., 3 Warren St., New York. From their long residence in Cochin they had become completely bronzed. These are not the same as the Malabar Jews. The Jewish traveler Benjamin, sometimes called Benjamin the Second. discovered a colony of Jaws, evidently of Persian origin, in Hindoxian. They were known as "Babylonian Jews," on account of their having migrated from Babylonia. They observed the essential rites of Judaism, and strictly avoided intermarriage with other sects. In the beginning of the Saventh century a Jewish colony settled in Cayenne, in the West Indies, one of the most inhospitable climates in South America, Cayenne was subsequently conquered

by the French, who made it a penal settlement, and the Jewish colony was forced to retire to Surinam. Notwithstanding frequent persecutions, Jews are still found in Persia, more especially to the south of the Caspian sea, where the soil is very fertile, but the c'imate very unhealthy. The principal city is Balprosh, where about 150 Jewish families reside in almost complete isolation. Tartary, and are engaged in the wool and silk trade or in the sale of citrons. They, too, trace their origin from the 15c. their ancestors settled in Persia to the time of Nebuchadnezzar, and did not respond to the appeal of Exra to return to Palestine. Their mode of life resembles that of the Persians in general, merwalls he They hold the beard in high sulcome, and it was been been some free to weak spots.

They have the beard in high sulcome, and it was been some free to weak spots. of the law from Banded. The combine- | t of the Jewish race which induced a warm, French writer on "Medical Geography" to express the opinion that "it is questionable whether the crossing of human advantages in relation to the species; " for the Jewish race seems in a wonderful manner culmble of adapting itself to and urosary complaints cored by "Bucha-Pails." every change of climate, while others

The Jew is found in every part of the world; in Europe, from Norway to Gibralter ; in Africa, from Algiers to the Cape of Good Hope: in Asia, from | arise from indigestion, such as Cochin to the Caucasus; from Jaffa to Pekin. He has peopled Australia, and has given proofs of his powers of acclimatization under the topics, where people of European orgin have constantly failed to perpetuate themselves.

The habit of punctuality is a profitable one to cultivate. A boy or a man who is sure to keep every appointment he makes, has added just so much capital stock to his character. Every emplayer, every customer is eager to enter into business relations with him. Unpunctuality brings its punishment

in a thousand ways, small and great, Not long ago a part of the stock in a large publishing house in one of our large cities was seized by the sheriff to | making healthy bile and pure satisfy a comparatively small claim, the | nlood, and opens the culverts justice of which, the firm was con- and sluiceways for the outlet testing. The disagreentle circumstance of disease. Sold everywhere occurred simply because the lawyer | and gumpanised to cure. employed by the firm missed his tram. and thus gave the opposing counsel in the case an advantage, which he was

Wolf Dogs in Mentanna.

The various range associations here recently imported from Colorado a lot of stag hounds which were recommended as excellent wolf exterminators, and they are more than pleased with their investment. The dogs get away with more wolves than the same number of men armed with Winchesters could,-Wolves have been very numerous in all this section for some time, and have lessened the profits of stock men materially by killing sheep and calves. When the hounds arrived they were kept in confinement for awhile and then they were turned loose. Six of them went with one party of men out on the range, and in less than two hours they had twelve wolves at bay. The fight that eventually occurred is described by eyewitness as most interesting.

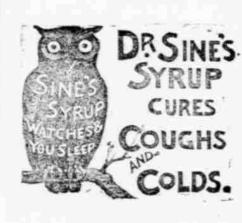

The dogs specar to work on an understanding, and their movements indicate as much difference as human beings would exhibit. Hunting in couples, they invariably bring down their game. One of them will selve a wolf by i the neck and throw him twenty feet in the air before he knows what ails him, and when he comes down the other grabs him and pulls him limb from limb. In the big fight spoken of this plan was followed by the dogs, who went at it like veterans, and they had finished nine of the weives when the others turned tail and got away. Every day now when the runchers want a little fun they take the dogs out, and it is not long before a wolf is scared up. The honnus are ted on corn bread and buttermilk, and the only taste of flesh that they get is when they nib a worf,

"What's the Score ?"

Once upon an evening dreary. As I stepped forth, sad and weary, After eight straight hours of labor. Stepped forth from the office door To forget the cares that talked me, In the sunlight as I basked me, Promptly an acquaintance asked me. "What's the score ?" Only that and nothing more.

Base ball loafers made me gloomy And I sought a street more roomy. Where I'd meet no one that knew ms. None that I had met before. There before me stood a granger "Surely," thought I, "there's no danger -Thought was interrupted. 'Stranger, What's the score ""

This he asked and nothing more. Fled I to a narrow alley And my courage tried to rally, Forth into the street to sally And to face this fearful bore. But I heard a window shutter Ope, a Mother Hubbard flutter And a washerwoman mutter, "Mister, what's the score?"

Then I sought a livery stable, Hired a steed with coat of sable. Rode as fast as I was able To the Schuylkill's Fairmont shore. Galloped like a convict hounded, Till by forest trees surrounded-Even then the question sounded, "What's the score ?"

That and nothing, nothing more. "Base ball crazy world, have pity." Moaned I, as I sought the city, With determination gritty, Thence to go forevermore To some wild Pike county thicket, So I went to buy a ticket, "What's the score ?" Asked the agent, nothing more.

"Man, if you be man or devil, To Alaska let me travel And this mystery upravel-If there be on earth a shore Where they do not care who pitches : Who bats into out-field ditches; Where no one who lives there itches To know what's the score !

Hence! The birthplace of the blizzard. Or the equatorial lizard : All the world from a to izzard I will hasten to explore! Let the spot be wildly dreary, Of it I will never weary If I can escape the query, Everlasting, dreary query, "What's the score ?"

The Spanish Passion for Dancing.

I presume that those who have traveled in Spain hardly realize how thoroughly that country is given to the worship of St. Vitus. Says a recent writter: "The dance demon seizes on Spaniards at all times and under all circumstances-in the streets, on the public squares, under the porches of stately mansions. A peripatetic musician comes along, strumming his guitar, and in an instant the maid servant throw aside their brooms, the workwomen set down the pitchers they are carrying to the fountain, the muleteers leave their mules, the innkeeper forgets your dinner, and all spring forward, arms akimbo and eyes sparkling. Their feet just touch the ground, they balance in unison with the music, and dance with their souls

as well as with their bodies. "Let a tourist visit Toledo and put up at the ancient hostelry De Lino, and let a guitar-player station himself under the great sombre archway that Don Quixote himself would not have passed without a foreboding of evil. He will see with his own eyes how the natural order of things will be disarranged and everything thrown into confusion. A fandango will begin in the court, the kitchen, and the street, and amid such a hubbub that he will think he has taken leave of his senses. "One day at St. Sebastian the regi-

ment passed by with a band at its head. A fandango was played. "Even the children who had been industriously engaged in making dirt ples pricked up their ears, caught each other by the waist, and tried to go through the steps. Their nurses joined in snapping their fingers. The passers by came to the assistance of the The soldiers themselves couldn't stand the temptation, but fell out of the ranks and mingled in the dance."

Why They Acquitted Him.

A revolutionary soldier had been indicted for passing counterfeit money. Charles M. Lee defended the silver haired veteran on histrial. The evidence against him was clear, and there was not a shadow of dcubt of his guilt. Still, he was a man who had followed Gen. "Mad Anthony" Wayne up the craggy steep of Stony Point, on the dark night of July 15, 1779, when that fortress was carried by storm.

Lee summed up the case with rare vehemence, graphically described the bloody attack on Stony Point, and, with tears dripping down his cheeks, implored the jury to acquit the old soldier. It was not then known that the foreman of the jury had been with the defendant on the perilous night. The jury were out an hour. When it returned, the clerk asked :

"Gentlemen of the jury, have you greed upon a verdict ?" "We have."

"Do you find the prisoner at the bar | TIN, COPPER AND SHEET-IRON WARE guilty or not guilty? "Not guilty, because he helped to storm Stony Point!" shouted the foreman.—Henry B. Stanton's "Random
Recollections."

Respectfully invites the attention of his friends and the public in general to the fact that he is still carrying on business at the old stand opposite the Mountain House, Ebensburg, and is prepared to supply from a large stock, or manufacturing to order, any article in his line, from the smallest to the largest, in the best manner and at the lowest living prices.

Remarkable Tale of a Cat.

Here is a cat story which certainly is not outdone in the evidence of intelli- work and ; gence it affords by any dog story that has been told: Mistress Puss lives in a Important to Canvassers. family as its pet and has much attention. Each year, the family go to the country and Mistress goes too, and She has become used, also, to the approaching signs of migration, and knows what it means when the carpets come up and trunks are packed. This particular season Mistress Puss, being the happy mother of a promising kitten. was very anxious and nervous as the time for flitting drew near, and at last became so troubled that she attracted the attention of the family by her peculiar behavior. On following her they

HEARTLESS CRUELTY

u is to delude a poor sufferer into the belief that some worthless liminous will cure rheamatism and neuralpin. Honesty is the best policy in the manufacture of proprietary articles as in all other matters, and the fact that the proprietors of Athlophoros have never claimed for it even all its merit would warrant has not a little to do with its wonderful popularity, and the thousands of grateful imonials received by them show that their policy has been wise as well as right. Experience has amply demonstrated

that mere outward applications are worth-

less. The disease has its seat in the blood,

and any remedy to be successful must deal with the obstructive acid which poisons and inflames it. Athlophoros acts on the blood, muscles and joints directly. It takes the poison out of the blood and carries it out of the system; it invigorates the action of the muscles and limbers the stiffness of the joints. It reaches the liver and kidneys, cleansing them from irritating substances, and, if followed up after the rheumatic conditions cease, it will restore these organs

to regularity and health. West Chazy, N. Y., Aug. 19, 1886. Yours of August 14th, is at hand, and in reply would say that Athlophoros proved the most effectual remedy for neuralgia in the case of my son that I ever tried. After using half a bottle he was not troubled any more for six months.

HENRY HARRIS. Mt. Pleasant, Pa., Aug. 10, 1886. I am thankful that I tried Athlophoros. I had rheumatism seven years, part of the time could not move; but to-day I am well and hearty. I write this hoping some

other sufferer may try it.
: W. S. FLEMING. Every druggist should keep Athlophoros and Athlophoros Pills, but where they cannot be bought of the druggist the Athlophoros Co., 112 Wall St., New York, will send either (carriage paid) on receipt of regular price, which is \$1.00 per bottle for Athlophoros and 50c. for Pills. for liver and kidney diseases dyspepsia, in-gestion, weakness, nervous debility, diseases, women, construction, headache, impure of women, construction, headache, impure blood, &c., Athlophoros Pills are unequaled.

Boiling Coffee.

Whether coffee shall be boiled or not will probably be always a question. Many think it has a raw taste if not boiled; others contend that, in boiling much of the aroma is lost. Boiling makes the mixture roily, and it must stand long enough to let the grounds settle and the liquid become clear, Some albuminous material will help to clear it. Fish skin, isinglass, cold water, and eggs are used for this purpose. Eggs give it a flavor and body, and, no doubt, Improve an inferior quality of coffee; but they increase the cost of the beverage, as aside from their own cost, they clog the grounds, thus making a larger amount of coffee necessary to obtain the desired strength. But if coffee must be boiled, let it be boiled in a closely-covered vessel with a thimble or cork in the spout, as, if left uncovered, the volatile oil, which forms the fragrant aroma, is dissipated; and it should never boil more than five minutes, as longer boiling extracts the tannic acid. There is a widely prevalent, but erroneous netion that long boiling extracts more of the strength and color, and is, therefore, more economical; but strength and color thus gained are obtained at the expense of flavor and wholesomeness.

The Washington Monument.

For a number of years there had existed in the minds of a few persons doubts as to the sufficient size and stability of the foundation. These apprehensions becoming widespread, a joint commission was appointed by Congress, consisting of the President of the United States, the Vice-President of the monument society, the Chief of Engineers of the Army, and the architects of the Capitol and treasury, with instructions to make an investigations of the work already done and to direct and supervise the completion of the structure. This joint commission caused a special investigation to be made by capable engineers, who reported that the foundation was in an unsatisfactory condition, and that it would be "unsafe to subject it to any additional load whatever," The embodiment of these facts in the commission's first report to Congress led to the enactment of a joint resolution June 14, 1878, authorizing the expenditure of "\$36,000, if deemed advisable, in giving greater stability to the foundation."

An anecdote of this date related by well-known citizen of New York may illustrate the anxiety felt at that period as to the safety of that structure. President Hayes had taken out the New Yorker for an afternoon drive, and the carriage stopped in front of the monu-

"I have never been so near before. remarked the guests, "Oh! don't be alarmed." instant replied Mr. Hayes; "the commission has just reported, and it may not fall down for some time yet."

A Child's Extraordmary Pet.

Superintendent Little, of the Union Stock Yards, South St. Paul, tells a story about a snake and his baby that no one will doubt who knows the reputation Little lives in West St. Paul, and his boy, who is four years old, is given the last week the servant went into the yard and discovered the child sitting on the ground amusing itself with poking something with a stick. On closer inspection the something proved to be a large snake of the variety known as the prairie bull. The girl screamed, and rushing into the house, informed Mr. Littell of what she had seen. He ran out and the child was familiarly fondling the body of the seipent, which lay stretched out on the ground apparently hugely enjoying the caresses the child was bestowing on it. Mr. Littell, armed with a club, attacked the snake, which draw itself into a coil the snake, which drew itself into a coil and showed fight. A stroke of the club laid his snakeship out cold, and on measuring the carcass from tip to tip it was found to span one inch over four feet. The child was considerably surprised at the peculiar manner in which his father had treated his pet, and went

so far as to shed tears. The Largest Deg.

Probably the largest dog living is Leo, owned by H. F. Jones, of the town of De Ruyter, N. Y. Leo is of the Newfoundland breed, and measures 7 feet 2 inches from nose to tip of tail, and 34 inches high over his rump, and weighs 2374 pounds. Although in good flesh he is not fat. He is one of the most affectionate creatures, and his devotion to his little mistress, who died a short time ago, is remarkable. Almost daily he visits her grave, and seems to feel her loss quite as deeply as would a human being. Mr. Jones says that he had never been offered large amounts for him, but money could not tempt him; that almost the last thing his daughter said to him before she died was: "Papa, you won't sell Leo, will you?" her arms being twined around his neck. To realize the size of this dog one can stand beside an ordinary table and think of a dog whose hips are three or four inches higher than the table : or a man of ordinary height, with his thumb in his pants pocket and his hand extended horizontally, would have his hand on a level with the dog's back.

Is Life Worth Living?

That depends upon the Liver, for if the Liver is inactive the whole system is out of order-the breath is bad, digestion poor, head dull or aching, energy and hopefulness gone, the spirits are depressed, a heavy weight exists after eating, with general despondency and the blues. The Liver is the housekeeper of the health; and a harmless, simple remedy that acts like Nature, does not constipate afterwards or require constant taking, does not interfere with business or pleasure during its use, makes Simmons Liver Regulator a medical perfection.

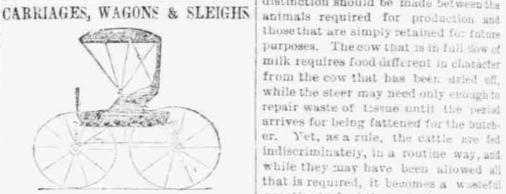

I have tested its virtues personally, and know that for byspepsin, billionsness and Throbbing Headache, it is the best medi-cine the world ever saw. Have tried forty other remedies before Simmons Liver Regulator, and none of them gave more than temporary relief, but the Regulator not only relieved but cured.

A Great Bell for Cologne Cathedral, An official notice has been publish-

of the great bell for the Cathedral Cologne, the solemn inauguration which took place some days ago was great pomp. The bell weighs 27 or kilos., or about 25 tons 13 cw. The clapper alone weighs 800 kiles, or near by 15% cwt. Its perpendicular height is almost 14; feet; its diameter at the mouth nearly 11; feet, Twenty-two cannons taken from the French were assigned by the Emperor William for its manufacture; 5,000 kilos, of the were added. It was cast by Andrews Hamm, of Frankenthal, and 21 mm. (£1,050) were paid for the casting. will be known as the Kalagrajocks Emperor's bell; and as the two other large bells in the cathedral bear of epithets respectively of Pretinea lore cious) and Speciosa (beautiful), this obis styled Gloriosa. It bears above as inscription recording that "William the most august Emperor of the Gar mans and King of the Prussians, mind. ful of the heavenly help granted to him whereby he conducted the late French war to a prosperous issue, and resigned the German empire, caused canners taken from the French to be devoted to founding a bell to be hung in the wonderful cathedral then approaching conpletion," A likeness of St. Peter, the name patron of the church, is on the side, beneath which is a quatrain in the style of the mediaval conceits, praying that, as devout hearts rise heavenward at hearing the sound of the bell, so may the doorkeeper of heaven open widetha gates of the celestial mansion. (in the opposite side is inscribed a sestet in Ggr. man, of which the translation is -"I am called the emperer I proctalm the emperor's honor; On the holy watch tower I am placed I pray for the German empire. That peace and protection

God may ever grant to it."

The bell was solemnly blessed in the cathedral by the Archbishop of Cologne. according to the elaborate ritual set out in the Pontificale Romanusa. The ceremony was very long, many psalms being chanted by the clergy and characters while the bell was being sprinkled with blessed water and anointed with christoand the portion of St. Luke, x, 38.42 was chanted by a deacon. Incense and myrrh were burnt within it, and many symbolical rites performed. The opinions of experts are divided as to whether the note which the bell sounds is C sharp or D.

Feeding Stock. Where stock of all kinds is kept under

one shelter and fed at the barn, some

listinction should be made between the those that are simply retained for future purposes. The cow that is in in milk requires food different in character from the cow that has been gried off. while the steer may need only enough to repair waste of tissue until the period arrives for being fattened for the burcher. Yet, as a rule, the cattle are fed indiscriminately, in a routine way, and while they may have been allowed all that is required, it becomes a wasteful practice to feed that which may be dispensed with under certain circumstances. Without a liberal supply of foot the cows cannot produce large quantities of milk, and the most economical system of feeding a good cow is to use butter. It will not pay to feed inferior food, or that which is lacking to the elements necessary for milk production. The cow that has been dried off and is waiting to come in fresh must also be fed intelligently, not only to provide food for herself and embryo calfs but to bring her into good condition when she is ready for milk; but she will not have that heavy drain on her system which pertains to the cow in full flow. The steer, if fully matured, and if the season be not advanced in order to more easily fatten him for market, is content with very ordinary rations until the time arrives for filing his frame with choice beef. If the wants of each animal be noticed, and the food be given in a manner so as best to promote the objects sought, there will be quite a saving in the course of a season, if the herd is a large one. The same is true of hegs. While the barrows should be kept in a rapidly growing condition, so as to make as large a frame as possible before the time arrives for feeding corn, the sow must be fed with a view or having her in a healthy condition, with a proportion of fat stored up. Yet cern is made the staple grain food by farmers when it is not needed, thus detailing loss by not using discrimination in feed-

Paris in the Sixteenth Century.

Some curious documents just found In the archives of the Paris prefecture of police thrown an interesting and instructive light on the manner in which the streets of Paris were guarded during the night in the Sixteenth cen-To begin with, there were stricgent rules to the effect that each house should have only one door and should be regularly inhabited. This being the case, it was a comparatively easy task to order that the dwellers in the different STANDARD SILVERWARE CUMPANY. houses should in turn keep an eye on what was going on in their respective streets. They were not compelled to tramp up and down the pavement like the modern policeman; the authorities were satisfied if they looked through their windows and watched all that was going on below. If the slightest cry were raised they opened their windows and rang their bells until their neighbors followed suit. The alarm spread from street street, and soon all the bells in Paris were ringing, the windows were lit up, and the inhabitants, armed to the teeth, sailied forth, barring the road to the malefactors, who were al-

I need hardly explain that the Parisof Importers and exporters, 88 William st., New York those days was lilipution in comparison with what it is now; but what an up comfortable way they had of keeping the peace in the Sixteenth century The remedy was positively worse than the disease, for it was bard that the inhabitants of one street should be awakened out of their first sleep because the dwellers in a remote avenue imagined that something wrong was going on. One would fancy that in some quarter or another some noise at least must have been made every night. The slumbers of the Parisians generally must often have been woefully curtailed, Pullers and Standard Agricultural Implements | for whom "all night sittings" were a A. B. FARQUHAR & SON, York Pa. at | stern reality.
