Thomas Jefferson.

The beritage of free institutions enjoyed by the people of the United States has come to be such a matter-of course ing of bridges. The principal provis- at the Ebbitt House that have been here and usual possession that, like the air we breathe, its value is unconsidered. It is well enough to look back once in a while at the beginning of our national growth, in order to more clearly understand the drift of the current on which tion as to what they're to get, if any- we move forward. There is no better time for such a retrospect than to-day, the anniversary of the birth of Thomas efferson. No man of the Revolutionary era suc-

> ceeded in impressing his ideas upon the nascent State to like extent with the Father of the Democracy. He was firm in the faith that men could govern themsevies; and the right to vote has been imbedded in our fundamental laws so that the opportunity of governing ourselves cannot be wrested from us. As long as our Republic was comparatively weak and poor the necessity of self-defense and of husbanding our slender resources gave a spur to patriotic impulse and the desire for the public welfare. Jeffersonianism made a splendid start. But we are no longer held together as were the men of the Revolution, who were afraid they might hang apart. As the Nation has become rich and powerful, and as the body of the people has been enlarged by accrehas been wonderfully cheapened. It is doubtful what Mr. Jefferson

if he could scan with his philosophical eyes the inner workings of our Congresses and Legislatures. The voters of the country seem to have lost their hold upon it. Our legislators are not dominated so much by a desire for the public welfare as by designs for the promotion of private ends. Capital sits enthroned in the Senate house. The ballot-box has been grievously corrupted. Upstart political traders undertake to dictate the policy of Administrations. Corporations arrogantly trifle with the rights and seize upon the property of mmunities they were created to serve. Taxes are so laid as to pull down one class of industries in order to build up another class of industries. The sovereign power reserved in the hands of the voters is not used to remedy the tils from which they suffer. On the ruins of our Democracy we seem to be trying

establish a plutocracy. voters of the country to resume busiday may be excellently spent in meditating upon the advantages of selfthe Republic back in the old grooves. per day. -Phila. Record.

Mr. Halstead's Rejection.

The rejection of Murat Halstead for than the party or personal aspects of the on the contrary, his political experience, lested. capacity, and knowledge of the political relations, public men and language of the German nation peculiarly fitted

rejection. In the course of his labors as a journalist he had more than once taken occasion to discuss the composition and character of the Senatorial body. He had shown that many members of the Senate owed their seats to the corrupt use of money and the power of corporations over venal State Legislatures. It is not strange that the Sens ate should seize such an opportunity to wreak its vengeance upon the offending journalist. The offended Senators were judgment is not obscured by the zeal of the partisan.

One important lesson taught anew by this example is the urgent necessity of reorganizing the Senate on a basis in harmony with the spirit of Republican the people, but through the choice of performed the same office in the House, | the country, but in a large degree over neither House has heard anything about ernment. Instead of representing the interests of the people the Senate has become the safe harbor of corporate the Senate, the other in the House, have power, monopolistic privilege and political abuse. If the foolish attack of the Senate upon the freedom of the press in the person of Murat Halstead shall stands his prerogatives and intends to a large sum os money. Under the arouse the American people to the ne-'Australian' election law they would cessity for its thorough purgation his hardly have occurred. REPORTS OF GOVERNMENT CHEMISTS As to Purity and Wholesomeness of the Royal Baking Powder.

"I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of pure and wholesome ingredients. It is a cream of tartar powder of a high degree of merit, and does not contain either alum or phosphates, or other injurious substances. "It is a scientific fact that the Royal Baking Powder is absolutely pure.

or "I have examined a package of Royal Baking Powder, purchased by myself in the market. I find it entirely free from alum, terra alba, or any other injurious substance. HENRY MONTON, Ph.D., President of Stevens Institute of Technology. "I have analyzed a package of Royal Baking Powder. The materials of which

The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1873; at the Centennial, Philadelphia, 1876; at the American Institute, New York, and at State Fairs throughout the country.

No other article of human food has ever received such high, emphatic, and universal endorsement from eminent chemists, physicians, scientists, and Boards of Health all over the world.

Norn-The above Diagram illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schedler. A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, and, besides, affords the advantage of better work. A single trial of the Boyal Baking Powder will convince any fair minded person of these facts. -

While the diagram shows some of the alum powders to be of a higher degree of strength than other powders ranked below them, it is not to be tal ing that they have any value. All alum powders, no matter how high their strength are to be avoided as dangerous.
