I have no doubt at all but they're a good institution in their way, and just as necessary as death and taxes-but I'll take mine with out 'em hereafter, for all that,

I mean widows. You see, I always had a secret horror of a mother-in-law and and a widow. This is how it was :

I was traveling from Atlanta to Smithville not long ago, and it so happened that a lone widow and myself were left the only occupants of the firstclass coach half way between Macon and

I saw at once that she was a widow by the look she gave me, and would ASPECIFIC FOR MALARIA. have retired peacefully to the sleeping car but for the fact that it was crowded and not a seat was available,

She knew that she had me, and was not long in letting one know it.

"It's awful traveling alone, sir." "I don't find so, madam," I said, raising up the window and looking out. "No; because you're not a poor widder like I am-that's why. Please let down that window; the draft will kill

"I wish it would," I muttered, as the window came down with a bang.

But she over overheard me. "Oh, he wants to kill me! Conduct-

or! Conductor!" The conductor came running in. He shook me roughly by the arm. "See here, now! None of your insults to a defenseless woman. You'll

not kill anybody on my train. I'll have have you arrested at the next station we arrive at. "He's hurt my affections," sobbed

the widow. "I'll make him pay for it," said the

"A poor lone widow," she cried, It was in vain I sought to explain. got off the train at the next station

and lay low and kept dark for two days. and then I crawled out and sneaked home, a sadder but wiser man. Brethern, no more widders in mine.

Tale of a Pet Fish.

Three months ago B. F. Malone of Harlem was wandering through Fulton Market and saw a basket full of live crawfish. The thought occurred to him that it would be a good plan to buy one and make a pet of it. Mr. Malone purchared a crustacean, and tells this story story of it :

"I took it home and placed it in a tub. It soon became very tame and, among other peculiarities I discovered it was fond of music. Whenever "Yankee Doodie" was played on the piano or whistled the crawfish, when held by the back, using its large claw as a baton, would keep perfect time, and its legs would move with the rapidity of a jig dancer, following the music as long

"One of the most difficult things to teach it," continued Mr. Malone, "was the trick of writing its own name. A penholder would be placed in its claw, and by moving it back and forth over a sheet of paper the trick was accomplished. After a month of this it seemed to understand just what was wanted of it, and it finally succeed in writing its name intelligently. It was interesting to study the fish when asleep. It would fold its large claw under its head, curl itself into a ball with its small claw extended. In this position it would remain for an hour after a banquet of angle worms.

"The other day the crawfish met an unexpected death. Judge Welde had spent a day fishing, and among other fish caught a three-foot cel. This he presented alive to me. I placed the live cel in the tub with the crawfish. The little fellow resented this, and caught the eel with his large claw by the tail, Instantly there was a small-sized war. The eel wound liself around the crawfish and crushed its life out; then it leisurely tore away the stony overcoat and feasted on the remains."

Good Advice Promptly Followed.

In days gone by few Southern lawyers were more distinguished than Luther Martin. He was one day riding to Aunapolis in a stage coach, when his only companion-a young man who had just been admitted to the Bar-addressing "Mr. Martin, you have been wonder-

fully successful in your profession. Are you willing to acquaint me with the secret of your success?17 "If you will pay my expenses during

the few days I shall remain in Annapolis."

"I will," was the earnest response.

"It is in this advice : Deny everything and insist on proof." At Annapolis Mr. Martin enjoyed all

the luxuries that a fine hotel could furnish, regardless of expense, and, when the time for his departure arrived, passed the "bill"-of enormous proportions-to the young lawyer, who was standing near. The latter merely glanced at it, and then returned it to Mr. Martin.

"Aren't you going to pay it?" Mr. Martin asked.

"This bill. Didn't you promise to defray my expenses while I was in An-

"My dear sir," was the quiet reply, "I deny everything and insist upon

The eminent lawyer paid his bill and laughingly said to the young man : "You need no further counsel from

-ONE part cottonseed meal to four parts bran, or mixed ground grain, is a proper proportion of each for cows that are in full flow of milk. Should too much be given it is liable to cause scours. Should this be the case simply withhold the cottonseed meal for a few days and begin its use gradually.

Butter Beans.

Many people at the South do not appreciate the value of what is known as the Lima or butter bean. There are three varieties of the Lima bean-the small, the large and Dreer's Improved. The last named produces beans much larger than the small variety, but is less productive, and does not continue bearing throughout the season in the South as does the small variety. The large Lima has been superseded by Dreer's Improved, but the small white Lima, commonly known as the butter bean, is the one most generally cultivated in the cotton States, where it is subject to the attack of no insect enemy, is not depredated upon by poultry, and affords a delicious dish for table use, either as green or dry shelled bean. It is a universal occupant of the Southern gardens for use in summer while green, but few have as yet realized its value for win-

ter use, as a dry bean. It is more easily produced, and more easily preserved than any other species grown in the South. It is considered by some superior to the celebrated "Yankee" or "navy bean;" at any rate it is a perfect substitute for that famous variety. The only difficulty about growing this bean is the fact that it needs a support upon which to climb. This support may be most cheaply furnished by using tall growing varieties of corn. The bean may be planted in rows of corn, and occupy the stalks until gathered.

We feel satisfied that they could be grown with profit anywhere in the South. Unlike the other varieties of beans, no weevil attacks it, and hence there is no difficulty in preserving them through the winter, They should be prepared for cooking by soaking in water 12 hours previous to boiling. They may, however, be cooked without previous soaking, but more time will be required in boiling. They are found on the market, but are not grown in sufficient quantity to place them within reach of the multitude. The supply being small, the price puts them out of reach of the majority of families. This is a crop that should be largely

Chances in Life.

Some very interesting statistics respecting the rate of the French troops stationed in the diffierent colonies have just been supplied to the Academy of Science by Dr. Lagneau, says a Paris Correspondent. The mortality of the soilders in the mother country averages from 9 to 11 per 1,000. In Algeria it ranges from 11 to 12 per 1,000, and in Tunis it is merely a fraction higher. In Cochin, China, however, the death rate doubles, and at Pondicherry it trebles the normal rate in France : while in Tonquin in 1885 it attained the figure of 96 per 1,000; nor is this all, for many soldiers sent home invalided either die on the jonrney or after France has been reacehd. Senegal and Guiana are extremely unhealthy colonies. In the former the mortality among the troops averages 73 per 1,000, while in the latter in bad years it has attained the terrible figure of 257 per 1,000. In Reunion, where the mean death is 29 per 1,000, it rose during the Madagascar expedition to 113 per 1,000. On the other hand, Otaheite and New Caledonia are even more healthy than the mother country, the mortality being

Man and Nature Run Wild.

The intertribal massacres which have taken place lately in the Solomon group of islands, have been the most horrible of their kind. The schooner Enterprise reports that fighting is rife on several islands of the group. Thirty men, women and children were massacred during one onslaught in a single village. The coast tribes were making raids taland and capturing many women and families. Cannibalism sill continues to be popular.

The captured mea are cut up and their flesh is thus disposed of, and the women and children are sold as slaves. The copra trade with the islands is being ruined, in consequence. During a heavy thunderstorm on the of February 5, a water-spout burst near the Huga River in Victoria, Australia, doing immense damage. The houses and a woman were carried away. Her body has not been found. Several families had narrow escapes.

A Noyel Cure for Corns.

"You are troubled with corns, are you?" said a Pittsburger to one of his friends who walked with a peculiar, limping gait. "Well, everybody has a remedy for them, but the trouble with most of the remedies is that they are no good without faith, and the man afflicted with corns generally considers his case hopeless. But I can tell you of a cure that is simple and effectual. Soak the afflicted portion of your feet every night-the longer the better-in crude petroleum, then sacurate a cloth with the same stuff, wraw it around your toe, put your stockings on go to

"A few nights of this treatment will cause the corn to disappear, I first heard of this remedy when I was living in the oil region, and of course I laughed at it, But a little inquiry among the men who worked about the tanks and wells convinced me that they believed in it. They said they were never troubled with corns, and assured me that the frequent wetting of their shoes in the oil-a thing they can not avoid in their occupation-had the effect of driving all these troublesome excrescences away. Try it and it will cure
