EBENSBURG, PA.

FRIDAY, - - - JUNE 21, 1889.

IT looks very much as if the Prohibition party had been hit with a Republican brick.

PENNSYLVANIA is the eight State to down Prohibition at the polls. This is evidently a bad year for Prohibition.

THERE are three thousand six hundred men at work on the railroad between South Fork and Johnstown, The railroad company has done an immense amount of work already, but it will take months to get its line in good condition.

THE Johnstown Tribune, made its first appearance here on Monday last, since the flood. The enterprise of its publisher will encourage other business men to follow in his footsteps and in the busy hum of industry, to push forward and retrieve the fortunes lost on that disastrous day.

THE suffrage amendment proposing to abelish the poll tax qualification of voters is believed to be defeated. Owing to the interest in the prohibitory amendment, the vote on the suffrage amendment was lost sight of and the returns are incomplete, but it is gener. burthens. It does not mean free and ally believed to have been defeated.

Two hundred and one votes against and 160 for abolishing the hereditary principal of the British House of Lords! exclaims the New York Press, A change of twenty-one votes in the House of Commons would have meant a majority. Fortunately for the House of Lords, it is still, as it was and the professional class of the popuwritten in "Iolanthe," doing nothing in particular, and doing it very well.

It seems that Brother Blaine was congratulated prematurely upon the Samoan treaty. He was not quite satisfied with the protocol and required some amendments. But this need cause no alarm. The protocol followed Mr. Bayard's demands so closely that Mr. Blaine would not have been able to call the achievement his if he had not been allowed to put something in htmself.

THE Johnstown Tribune of Wednesday says : We ofen hear it said that the worst wreck of all is on the South Side. To the eye, yes ; for there many houses from the North side went. But the real ruin is where there are neither houses nor people, as in Woodvale, the Second Ward of Conemaugh Borough, and, with the exception of a house or two, the Second and Third Wards of Johnstown, and a good part of Cambria. There is ruin in the lower portious of the South Side, but not complete and pathetic desolation as in the other districts named. Nothing existent will compare with nihility, and it is only in the memories of the living that anything is left of large portions of the town.

THE proverbial generosity of the faraway people of the Pacific coast received another illustration when the news of the Johnstown calamity reached them. Public meetings were held and money was liberally subscribed. While collections were in progress at Seattle. Washington Territory, and several thousand dollars had been cheerfully subscribed as a nucleus for the Territory's offering, the fire king came along and swept \$15,000,000 of business property away. The news was telegraphed all over the coast, and for a moment people were dazed at the second calamity. But only for a moment. The next, the people were subscribing money, not only for Seattle, but also for Johnstown. The collections were made jointly, and some who had subscribed before made second offerings. A remarkable scene occurred at Seattle itself after the fire, when the citizens met to do something about rebuilding. It was announced that in one of the bank safes, still red hot in the debris, were the collections for the Johnstown sufferers. In view of the fact that "charity begins at home," it was hinted that the fund had better be diverted to the home sufferers. The propisition was indignantly voted down and the citizens proceeded to subscribe liberally for its own sufferers besides increasing the Johnstown fund. The citizens of Tacoma, Seattle's rival for supremacy, came nobly to the res-

cue with a fund of \$25,000 cash and supplies sufficient to feed 2,000 people for thirty days, with as much more in reserve if necessary. Truly, the Amercan people are a great institution, on which no flies rest even momentarily.
