HOW DIGNITARIES WERE BROUGHT Magnificent Trains Run Over Pennsylvania 'ysiem. Chicago Herate that 2s, 1802

One of the most important and successful extures in connection with the dedicatory exercises of the World's Fair grounds, and one which fully illustrates the wonderful progress which our country has made within the last half century, was the move ment made by the Pennsylvania Rai road Company of the cabinet officers, the su preme court justices, and the diplomatic corps from Washington to this city and back. It required three special trains to perform this function, and Vice Presiden-Frank Thompson, to whom the credit of the achievement is due, made requisition on the Pullman Palace Car Company for the finest equipment which those famous car builders could produce. The result was a triple section train such as has never before glided over the country. A crew of twenty-five persons, including stewards, ooks, writers, porters, maids, electricians and machinists, in addition to the usua quota of trainmen, was required to insure proper service. The outfit resembled in a omewhat lessened degree the persona q iii ment of an ocean greyhound of which the trains were a duplication on land,

These trains were provided and tendered for the use of the distinguished guests of C I ago by Vice President Thomson They were run from Washington to Chicago as sections of she regulor " Chicago Limited," of which they were duplicates, and they conformed to the regular schedule of that train. With the thorough or ganization of the Pennsylvania Railr ad Company and its splendid system they came through the entire distance, on the special schedule time arranged for them, without accident or delay of any kind, and this in the face of an extraordinarily increased passenger traffic. The great line is in such excellent physical condition, so well protected by the safeguards of modern invention and so perfectly managed by a corps of men who have been educated and trained under the eyes of its high officials, that a movement of this kind, extraordinary as it may appear to the public, was effected without interference in any manner with the routine of everyday traffic.

It is safe to say that while no other country in the world would be able to move the entire organization of its governmen: a distance of one thousand, miles, so there is no other railroad company which could grapple with such a problem and solve it with the ease to the person in interests and the credit to itself that has distinguished this achievement of the Pennsylvania Railroad. It reflects the utmost credit on Vice President Thomson, who planned, and his associates, who executed the brilsful work when the resources of this line will be drawn upon to furnish adequate transportation facilities to the hosts who
