The first item reads "To balance in hands f treasurer at last settlement, \$45,584.80." Now run down the column to where the balance is struck, we find in hands of treasurer \$58,927.95. Now examine the entire statement and then ask yourselves if there is any evidence to show illiberality on the part of the officials who were placed in the several offices they now hold by the votes of the taxpayers of the county, and the left side, on Saturday evening of last who are responsible to the people for their flicial actions.

The statement throughout looks as if an heroic effort had been made to spend the taxes collected from the people and that the effort failed by \$58,627.95. I don't see how any other construction can be put

It is a well-known fact that the townhips elect assessors for the express purpose of making a just valuation of property made taxable by law. They are first ship, has purchased a lot in the East ward bound in an iron-clad oath to perform their duties in a stipulated manner. Well, they go to every taxpayer in their respective districts and actually see for themselves. They hand in their books when completed to the commissioners. What then? They are ordered to go back and value property higher. I am informed that some of the assessors actually did go back and make a Sunday afternoon, J. C. McClellan, a second assessment. Some others refused giving as a reason that they had "made their respective assessments under oath and could not change them." What then: The commissioners multiplied the valuation by 3. DEAR SHE-Mr. John Styne, of Read township, who is one of the present candidates for the office of justice of the peace in this township, is highly spoken of as a man who attends strictly to his own business. He acted in the capacity of army secretary for Uncle Sam during part of John Staner as bookkeeper for seven years; then in the employ of Gluson & Co. for six years; also was employed by J M. Troxell for two years as bookkeeper; he is new in the employ of the Great Bend Coal Co. His qualifications are second to none in the county for the office for which he has been nominated and we have not prices. To get the benefit of the stores the least doubt but that he will be elected CITIZEN.

The Bincklick Railroad. A correspondent of the Altcona Times on

February 8th, 1892. Monday, in writing about the railroad down the Blacklick gives the following: It is announced from Harrisburg that a charter has recently been granted by the the "Ebensburg and Blacklick Rallroad ng, it is alleged, to construct a railroad thirty-five miles long, from connection

with the Cambria and Clearfield railroad between Kaylor's and Ebensburg stations, n Cambria county, through Blacklick valley to a connection with the Indiana branch of the Pennsylvania railroad near Blacklick station, etc. Now this informaion in some respects is definite, particularly in not naming, if known, the precise point where a junction of the projected road will be made with the Cambria and Clearfield railroad. Now, whether the line will certainly pass through Ebensburg and Blacklick or not, the inference, therefore,

Kaylor's via Ebensburg. Should such a course have been decided upon by the Pennsylvania railroad company in the construction of this thirty-five miles say, o road, no doubt has been done after careful and systematic investigations were made of the several routes leading through the Blacklick valleys, based upon accurate and instrumental surveys of those routes,

embracing directness, minimum gradients,

conomical construction, etc. There is no question that a number of feasible and desirable natural routes lead off in the proper direction from the vicinity of the line of the Cambria and Clearfield railroad, north or northwest of the borough of Ebensburg, presenting favorable facilities and inducements for the adoption of some one of them; for example there is middle branch of B'acklick creek and attendant valley, some two miles north and west of Ebensburg, affording all the prerequisites of practicable grades, cheapness of onstruction, etc., from its head to junction with the Blacklick valley; then the west branch of blacklink-stream and valey-a short distance beyond, paralleling the first named, and presenting equal natural advantages with the first mentioned for laying out and constructing a rallroad, and still further on towards Nicktown and Carrolltown and also within reach of connection with the Cambria and Clearfield ine and the vaileys of Morrison's Run, Elk Lick Run, Dutch Run, etc., tributaries of the north branch of Blacklick creek and valley and with the last named stream and valley penetrating as extensive and

valuable coal territory as abounds in

'ambria county. The remarkable natural and material esources and advantages that would beong to any one of these last mentioned routes for the construction of this proposed railroad, in regard to directness and consequent saving in distance, light gradients and cheap construction, in connection with the vast deposits of coal, imas the miscellaneous traffic such a road would develop render its importance incalculable, if wisely located, and, therefore, meriting more than cursory consider-Wednesday aged 68 years. It has been shown that it need not prove a difficult task to "pick and choose" a sultable and profitable route through Cambria county, and, if this link is to be built, the presumption is that the Pennsylvania Railroad company will view the matter in the naked light of its soundest judgment and best interests, materially, and without in the least being governed by sentiment or sympathy for individuals, localities, places or people or their idiosyncracies, but, all things being equal. will adopt that line of construction con- Pennsylvania system, two cents per mile. sidered most expedient and advantageous in all respects. In the following of which it is to be hoped no special or personal privileges or favors will be granted, nor selfish ag grandizement permitted.

It is now definitely settled that the route adopted from Kaylor's is that following the line of the Ebensburg and Cresson branch through Ebensburg and down past the old toll gate at the west end of town, striking the Blacklick at Edward Owens' old dam. At a meeting of the directors on tried them, but because the leading hospi-Wednesday of last week at Philadelphia. the Ebensburg route was adopted, provided the right of way can be secured without too much expense. On Tuesday the engineers ran a portion of a new line near the steam tannery in Ebensburg which will locate the line a little further south at that point and do considerable less damage to the tannery property.

IF you are wide awake you will not wait until the last moment before taking advantage of the great bargains we are going to give you this pay-day week. In domestics we have several brands that we will sell at less

than we can buy them to-day. The household department is full of bargains, as you will see by the tickets displayed on goods. In the Men's furnishing de-

partment we have decided hold a great SHIRT SALE this week, shirts of every description, Flannel, Outing, Cheviot, Madras, Percale, laundried and unprices that will surprise you, but only for a few days.

Again we call your attention to our carpet stock. If you will glance at our south windows you will see an indication of new spring styles in Brussels and Tapestries, with or without berders. As in the past three seasons, boller was lifted bodily from its foundation light colorings prevail and once more the artists who originate Houpt was busy, and in passing crushed the designs and color combinahis skull as if it had been an egg shell. tions have excelled all their pravious efforts in the beauty and elegance of patterns for the approaching spring season.

The bargain list in carpets is not yet exhausted but will be continued through the present month. Some idea of these goods can be had by a few prices in the window display.

In every case they are marked far below the actual price we paid for them. The low prices are made simply because the remnant thus marked is all we have of the pattern, and no more will be ordered.

"Seeing is Believing." And a good lamp must be simple; when it is not must be simple; when it is not good—these not good. Simple, Beautiful, Good—these must be simple; when it is not simple it is words mean much, but to see "The Rochester" will impress the truth more forcibly. All metal, tough and seamless, and made in three pieces only, it is absolutely safe and unbreakable. Like Aladdin's of old, it is indeed a "wonderful lamp," for its marvelous light is purer and brighter than gas light, softer than electric light and more cheerful than either. Look for this stamp—The Rochester. If the lamp dealer has n't the genuine Rochester, and the style you want send to us for our new illustrated catalogue, and we will send you a lamp safely by express—your choice of over 2,000 varieties from the Largest Lamp Store in the World.
